8. *Assessments.*—The statement in Appendix D shows the mode of assessment prevailing in each municipality in the province, the rate at which the tax on holdings or on persons according to their circumstances and property within municipal limits was levied, and the result of any revision of assessment made during the year. The tax on holdings was in force in 36 municipalities, and was levied at rates below the maximum ($7\frac{1}{2}$ per cent. per annum on the annual value of holdings) in the following 13 places :—

Name of Division.	Name of Municipality	Rate of tax.	
Burdwan ...	Hooghly and Chinsurah ...	... $6\frac{1}{4}$	
Presidency ...	Krishnaghur ...	... 6	
	Ranaghat ...	... $6\frac{1}{4}$	
	Santipore ...	... $6\frac{1}{2}$	
Rajshahye ...	Darjeeling ...	... 7	The legal maximum in these municipalities is 10 per cent.
Dacca ...	Dacca ...	... 8	
	Naraingunge ...	... 6	
Patna ...	Sewan ...	... 7	
Bhagulpore ...	Monghyr ...	... 6	
	Jamalpore ...	... 7	
	Bhagulpore ...	... 5	
	Purneah ...	... 6	
	Sahebgunge ...	... $3\frac{1}{2}$	

In regard to the Burdwan Division the Commissioner remarks :—"The maximum rate of $7\frac{1}{2}$ per cent. was levied in all the municipalities in which the tax on holdings was in force, with the exception of Hooghly and Chinsurah, where it was only $6\frac{1}{4}$ per cent. This town has many sanitary wants, and the full rate might, I think, be levied with advantage to the health of the inhabitants. The people are exceedingly well off, and I see no reason why the rate should be lower in this town than in the others." This observation is applicable to most of the other municipalities specified in the above statement. In the Bhagulpore Division the rate is levied below the maximum in every place where a rate is imposed, and it seems that in both Bhagulpore and Monghyr it should be increased: it is satisfactory to see that in Sahebgunge, where the rate is the lowest in the province, it has been raised to 5 per cent. in the current year. In the Nuddea Municipalities, the rates are still unduly low. It is not too much to say that in all municipal towns in Bengal there is a crying want of funds to meet expenditure which is gradually being

forced upon the Commissioners, especially in the direction of improved sanitation. It is equally true that, whether the taxation is based on assessment of holdings, or (as Appendix D will show is more usually the case) on persons according to their circumstances and property, the present rate of taxation is exceedingly low and far from oppressive on the rate-payers. The tax on persons varies at rates from 8 annas to one rupee per cent. on the estimated income of the assessee. The average incidence of municipal taxation throughout Bengal (excluding Calcutta) during the past year was only 11 annas and 11 pies per head of the population, and in no less than 67 municipalities the incidence is so low that it amounts to 8 annas or less per head. The lowest place in the list is taken by Lalgunge in Mozufferpore, where the rate is only two annas and seven pies. By way of comparison it may be noted—the figures are taken for the year 1886-87—that the incidence per head of municipal taxation proper (exclusive of Presidency towns) is in Bombay Re. 1-4-5 and in the Punjab Re. 1-2-6. In Madras it is annas 11-11 and in the North-Western Provinces annas 11-1. These figures show how very moderate is the incidence of municipal taxation in India generally; and especially that it is low in Bengal, where the wealth of the people and their standard of comfort are greater than in other provinces. It is obvious therefore that there is scope for some increase in municipal taxation; and unless there is such an increase, it is impossible that reforms can be undertaken. Under sections 88 and 97 of the law the period during which an assessment once made shall continue in force should be three years only. The object of this provision is that the assessment of holdings and of the tax upon persons should be revised periodically as the prosperity of towns increases; but in many cases it is to be feared that the law is overlooked, and the old assessment allowed to continue unchanged for too long a period. As an instance of this neglect, the Lieutenant-Governor observes that a general revision of assessment was made during the past year in the Comilla Municipality after so long a period as twelve years. On the other hand, His Honour recognises the signs of more vigorous municipal administration in several important places, and he is glad to take this opportunity of intimating to Municipal Commissioners and the local executive authorities that they will always receive the support of Government in the discharge of the responsible duty of revising assessments. The duty is unfortunately a very invidious one, and in its fulfilment the Commissioners must often, as the reports of the past year sufficiently indicate, expect to incur serious unpopularity and obstruction; but the Lieutenant-Governor has no doubt that as a body they will not shrink from it on this account. The enforcement of proper municipal taxation in order to accomplish municipal improvements, and especially sanitary reform, of which all the towns in Bengal are so greatly in need, is one of of the most distinguishing marks of efficiency and aptitude in local self-government.

9. During the past year assessments were revised either generally or partially in 43 municipalities. The revision resulted in a loss of income in five places, viz., Burdwan (Rs. 469), Raneegunge (Rs. 142), Ramjibanpore (Rs. 7), Tikari (Rs. 1,166), and Behar. In the Durbhunga Municipality the assessment was revised, and, with the sanction of Government, the tax on persons was substituted for the rate on holdings. The tax is fixed at the rate of 1 per cent., and all persons having an income of less then Rs. 6 a month have been exempted. The net increase has not yet been determined, but it was expected to be about Rs. 6,000. The Lieutenant-Governor trusts that this expectation will be realised; but he is concerned to notice an observation in the Commissioner's General Administration Report, that the income of the municipality, "instead of increasing as was estimated, has fallen off, and when the Maharajah resumes possession of his market, which has been decreed to him by order of the Civil Court, there will be a further reduction." The reason of this apparent failure is not explained, but it is presumed that it is due to the opposition of the rate-payers, and is temporary only. Under somewhat similar circumstances the amount of increase obtained by revision of assessments in the Rampore Beauleah Municipality is reported to have been Rs. 2,042. The rate of tax on income of persons was raised from 8 to 12 annas per cent., and is therefore still very low, but the effect of the revision is thus described by the Chairman in his report:—"A hue and cry was raised, in which those whose

assessments had not been increased, nay, even those who had been exempted from assessment, joined. The municipal office was literally beseiged with objection petitions. A memorial was sent to His Honour the Lieutenant-Governor, complaining against the enhancement. A party of men, who affected to pose as friends of the poor, but who really had at heart some grudge against the municipality, actively set about rousing the people against it under this colourable pretext. For nearly two months there was scarcely any collection of house-tax. Everybody refused to pay. It was a time of serious trial of the Municipal Commissioners. By a policy of conciliation and firmness, and by promptly deciding the objections, order was restored." In Santipore, Purulia, Chupra, Monghyr, Cuttack, and Comillah, revisions of assessment led to increase of taxation unaccompanied apparently by any administrative difficulty. But in the petty municipality of Jugdishpore, in the Shahabad district, where the revision resulted only in an increase of Rs. 100 in the income, dissensions rose so high that a criminal case was instituted by one Municipal Commissioner against another, and some of the rate-payers who had sided with him, for obstructing him as he was returning from the municipal office after deciding some objections against enhanced assessment, and for threatening to kill him in case the tax was increased. The accused were convicted and sentenced to pay fines, and the sentence was upheld in appeal. A case even more scandalous than this occurred in the Tikari Municipality, where the Chairman was violently assaulted at his house by a gang of hired *lattials* instigated, according to common report, by an opponent on the Municipal Board, and the Vice-Chairman, who was conspicuous in opposition, was removed from his post.

The year's record shows indeed that the path of duty is strewn with difficulties, which can only be overcome by honest perseverance, consistency, and firmness; but it may be expected that as experience is gained in the benefits derived from municipal improvement, the attitude of the rate-payers, as well as of the more retrograde and obstructive section of Municipal Commissioners, will become, as it has in other portions of the world, more tolerant of necessary taxation.

10. *Fresh imposts levied during the year.*—The provisions of the Act regarding the levying of a tax upon the annual value of holdings were extended during the year to the new municipalities of Cossipore-Chitpore, Manicktolla, and South Suburbs. Sanction was also accorded to the levy by the Commissioners of the Kurseong, Serampore, Bali, English Bazar, and Khoolna municipalities of fees for the cleansing of private latrines within portions, or entire limits, of the respective municipalities.

11. *Extension of various provisions of the Municipal Act and Bye-laws sanctioned during the year.*—The conservancy and other provisions of Part VI of the Act, or portions of them, were extended during the year to Berhampore, Joynugger, Nasirabad, Naihatty, Jungipore, Kishoregunge, English Bazar, Dinapore Nizamut, and Comillah.

Part IX of the Act, which regulates the construction and cleansing of latrines, was extended to Serampore (Mahesh and Rishra and Connagore wards), Bali (excepting the villages of Belur and Malipanchghara), English Bazar, Khoolna, and a portion of Dinagepore.

Part X. which contains provisions for the regulation of markets, was extended to Soory, Bhagulpore, Bhabuah, and Lalbagh or City Moorshedabad.

Bye-laws were framed by the Commissioners of the following municipalities under section 350 of the Act, and confirmed by Government:—

Dinagepore.	Jamui.	Bazitpore
Purulia.	Netrokona.	Comillah.
Nasirabad.	Gya.	Bhagulpore.
Cuttack.	Raghunathpore.	Lalbagh.
Sherepore (district Mymensingh).	Kishoregunge.	Kurseong.
Darjeeling.	Chupra.	Lohardugga.
	Burrisal.	Furreedpore.

Rules for the protection of wild birds and game were framed by the Darjeeling and Cuttack Municipalities under Act XX of 1887, and confirmed by the Local Government.

12. *Income and expenditure.*—The following table compares the opening balances, income, expenditure and closing balances of municipalities, division by division, for the year 1889-90, and those of the preceding year:—

Division.	Opening balance.		Income during the year.		Total funds available for expenditure.		Total expenditure.		Closing balance.	
	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Burdwan ...	90,908	82,947	6,33,367	6,41,058	7,24,275	7,24,005	6,41,243	6,56,816	83,032	67,189
Presidency ...	1,24,240	56,041	9,43,036	5,12,323	10,67,276	5,68,364	9,46,493	4,93,493	1,18,083	74,871
Rajshahye ...	50,408	33,105	2,75,876	2,76,258	3,26,284	3,09,363	2,93,179	2,71,463	33,105	37,900
Dacca ...	31,072	24,634	2,88,337	3,34,230	3,20,309	3,58,864	2,95,675	3,04,875	24,634	53,989
Chittagong ...	6,841	3,285	73,850	67,712	80,691	70,997	76,861	65,601	3,288	5,396
Patna ...	47,803	49,344	4,43,462	4,82,101	4,91,265	5,31,445	4,39,275	4,50,867	51,990	80,578
Bhagulpore ...	40,363	84,535	2,48,468	1,83,515	2,88,831	2,68,050	2,04,296	2,40,206	84,535	27,448
Orissa ...	7,022	1,868	89,521	86,786	96,543	88,654	94,735	85,020	1,868	3,634
Chota Nagpore ...	8,031	10,643	53,847	63,519	61,878	74,162	51,206	63,127	10,672	11,035
Total ...	4,07,588	3,46,402	30,49,764	26,47,502	34,57,352	29,93,904	30,42,963	26,31,468	4,11,207	3,62,436

The large discrepancy between the closing balance of 1888-89 of the municipalities in the Presidency Division and the opening balance for 1889-90, is due to the exclusion from the current accounts of the closing balance of Rs. 62,042 of the late municipality of the Suburbs of Calcutta. The small discrepancies in the other divisions have been explained by the local officers.

13. *Income.*—The total income of the municipalities in Bengal under Act III (B.C.) of 1884 amounted during the year to Rs. 26,47,502, against Rs. 30,49,764 of the previous year. This large apparent falling off is due to the dismemberment of the Suburban Municipality, and as the entire area included within that municipality has not been excluded from the operation of Act III (B.C.) of 1884, no satisfactory comparison can be made between the municipal accounts of 1889-90 and of previous years. Excluding, however, the income from the municipalities in the Presidency Division, the total income of all other municipalities shows an increase of Rs. 42,499 over the receipts of 1888-89. This increase is too small to be considered satisfactory, and is much less than that of previous years The income from taxation proper is shown, division by division (excluding the Presidency), in the following statement:—

Taxation proper.

	Burdwan.	Rajshahye.	Dacca.	Chittagong.	Patna.	Bhagulpore.	Orissa.	Chota Nagpore.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1888-89 ...	5,00,183	1,60,881	2,32,558	51,325	3,22,083	1,38,310	54,712	30,538	14,90,590
1889-90 ...	5,07,501	1,68,252	2,23,819	45,148	3,58,813	1,40,136	65,884	38,541	15,48,094
Increase or decrease ...	+7,318	+7,371	—8,739	—6,177	+36,730	+1,826	+11,172	+8,003	+57,504

The general result shows some improvement, but it is not so marked as might be expected, looking to the low rate of taxation which prevails, and the urgent need that exists everywhere for increased income to meet necessary expenditure. In regard to the Dacca Division, it is explained that the net decrease is to a large extent nominal, as the collections in 1888-89 included arrears of previous years, and were therefore considerably in excess of the normal realisations. In the case of the Chittagong Municipality, it is stated that a decrease of about Rs. 8,600 in the collections is due partly to the same cause as in the Dacca Division, and partly to the fact that for nearly three months the sircars had to attend on the auditor who was examining the accounts, and that in

consequence the collections were smaller than ought to have been made. These excuses appear to the Lieutenant-Governor to be insufficient. It is satisfactory that the arrears have been liquidated, but they ought not to have been allowed to accrue. In any case it is to be regretted that the total gross collections show a falling off. It is a too common defect in Bengal municipalities that the executive is in arrear with its collections and it has been lately pointed out in a circular of Government that far greater promptitude must be insisted on in the collection or remission of taxes. Not more than one complete year of arrears should in any case be allowed. Municipalities which, like Ranchi and Kurseong, work in a business-like manner never have more than two quarters' arrears, and very often not more than one; and if municipalities in general avail themselves of the means provided in sections 120 to 129 of the Act, there is no reason why collections should ever be allowed to fall more than 12 months into arrear. As a matter of fact, in many municipalities the accounts are four or five years in arrear, and whenever this is the case it affords the clearest evidence of executive inefficiency.

14. The statement in Appendix E shows the details of income under each head, division by division, as compared with that of the year 1888-89. The total receipts from the municipalities in the eight divisions show an increase under the following heads:—

Heads of Revenue.	Amount of increase.
Taxation—	Rs.
Conservancy cess	29,277
License on trades	7,231
Tax on persons according to their circumstances and property Tax on houses and lands	10,039
Tax on vehicles and animals	6,654
Tolls on roads and at ferries	3,424

On the other hand, there was a decrease under major head "Miscellaneous" of Rs. 13,000.

15. *Conservancy Cess.*—A portion of the increase under this head is only apparent, being due to the proper classification of the receipts, and a sum of Rs. 10,437 thus appears under this head against the Patna Municipality and Rs. 7,798 against the municipality of Pooree. The tax was levied for the first time in the municipalities of Bogra (Rs. 1,605), Kurseong (Rs. 870), and Cuttack (Rs. 1,032). There was an increase of income, as compared with 1888-89, of Rs. 2,901 in the Midnapore Municipality, Rs. 1,982 in Rungpore, Rs. 1,777 in Serampore, and Rs. 1,739 in Monghyr. No explanation has been given of the decrease in Howrah, which amounted to Rs. 11,832.

16. *License on trades.*—The figures under this head are also affected by new classification. The increase in the Howrah Municipality amounted to Rs. 1,111.

17. *Tax on persons according to their circumstances and property, and tax on houses and lands.*—These two items have to be reviewed together as the receipts were not accurately classified in the previous year. Deducting the income of Rs. 15,442 from the new municipalities noted in the margin, there was actually a falling off of Rs. 4,603 during the year, which was distributed among the Burdwan, Dacca, Chittagong, and Bhagulpore Divisions. There was a large increase of Rs. 3,408 in the Chota Nagpore Division, excluding the income from the new municipalities, with small increases in the Patna, Orissa, and Rajshahye Divisions. The increase of income was largest in Midnapore (Rs. 3,328), Patna (Rs. 3,032), Hooghly (Rs. 1,978), Gya (Rs. 1,739), Purulia (Rs. 1,262); and there was a falling off in Dacca (Rs. 4,738), Chittagong (Rs. 8,870), Howrah (Rs. 2,774), Bhagulpore (Rs. 2,590), Revilgunge (Rs. 1,974).

Name of Municipality.	Rs.
Dinapore Nizamut ...	9,562
Kharar ...	2,274
Lohardugga ...	1,897
Daltongunge ...	1,709
Total ...	15,442

18. *Tax on vehicles and animals.*—The main increase was in the Patna Division, where it amounted to Rs. 6,128, of which Rs. 3,618 occurred in the Gya Municipality. There was also a large increase of Rs. 4,122 in the municipality of Baranagore in the 24-Pergunnahs, and Rs. 3,211 in Howrah. Midnapore shows a falling off of Rs. 1,983.

19. *Tolls on roads and at ferries.*—No tolls are levied on any roads in any municipality in Bengal. The item therefore refers only to income from ferries. The increase occurred mainly in the Patna Division (Rs 6,980), Chittagong (Rs. 1,700), and Orissa (Rs. 1,121). The Burdwan and Dacca Divisions show a falling off of Rs. 2,982 and Rs. 3,404 respectively. The accounts of the Mozufferpore Municipality show an increase of Rs. 6,670, due to the Victoria Bridge having been damaged by the flood and rendered unfit for traffic. The Chittagong Municipality shows an increase of Rs. 1,468, Cuttack of Rs. 2,386, Balasore of Rs. 1,265, and Lalbagh of Rs. 905.

The decrease in the Burdwan Division occurred in all the municipalities except Utterpara, Baidyabati, and Burdwan, where there was an increase. It was most marked in Hooghly (Rs. 1,398) and Serampore (Rs. 1,245). The decrease, amounting to Rs. 3,150, in the Dacca Municipality is attributed to a change in the system of accounts under which the advance collections have been credited to "Deposits" instead of under "Tolls," and this explanation no doubt accounts for the decrease in other places.

20. The receipts from municipal fines show a falling off from Rs. 32,028 to Rs. 29,992.

21 Water-rates are levied only in Burdwan and Darjeeling. The collections in both places show a small increase, as noted in the margin. The rate at Burdwan was levied at 4½ per cent. as in the preceding year, but the Lieutenant-Governor is glad to observe that, with reference to the necessity of extending the supply of filtered water to all parts of the town, the Municipal Commissioners have raised the rate to 5 per cent. for the current year. The rate at Darjeeling is 2½ per cent. only, and the increase is due to the imposition of the rate for the first time at Goompahar. No water-rate is yet levied in Bhagulpore, but it is, as the Commissioner points out, absolutely necessary either to levy a special rate or to increase the ordinary rate on holdings, if the much-needed extension of the water-works is to be carried out. In Mymensingh and Dacca the munificence of Raja Surjya Kant Acharjya Bahadur and of Nawab Sir Abdul Ghunny, K C.S I., has rendered the imposition of a water-rate unnecessary.

	1888-89. Rs.	1889-90. Rs.
Burdwan	... 13,003	13,207
Darjeeling	...10,205	10,909
	23,208	24,116

22. The grants made to municipalities from Provincial or Local Funds during the year are detailed below :—

Name of municipality.	Amount of grant.	From what fund and for what purpose sanctioned.
	Rs.	
Burdwan ..	1,015	From Government as grant-in-aid to schools maintained by the municipality.
Bankoora ...	1,000	From the District Fund towards the cost of maintenance of the charitable dispensary and for medical aid to mofussil people.
Midnapore ...	6,965	From Government for maintenance of the College and Collegiate School.
	143	From Government for the Hindu Girls' School.
	485	From the Mohsin Fund for the part schooling-fee of Mahomedan boys of the Collegiate School.
	240	From the District Board towards the support of the Charitable Dispensary.
Tumlook ...	60	Ditto ditto.
Chandrakona ..	60	Ditto ditto.
Ramjibanpore ...	60	Ditto ditto.
Khirpai ...	120	Ditto ditto.
Khoolna ...	1,000	From Government for the maintenance of certain roads placed under the charge of the municipality.
Lalbagh ..	3,340	From Government on behalf of the Nizamut for the conservancy of the town.
Darjeeling ...	6,484	From Government for the maintenance of certain Government roads within the municipality.
	1,050	From the Darjeeling Improvement Fund for the repayment of the water-works loan and for the working of the Porters and Dandiwallas Act.

Name of municipality.	Amount of grant.	From what fund and for what purpose sanctioned.
	Rs.	
Rampore Beauleah	1,386	From the Prosunno Nath Roy Fund for the maintenance of the local charitable dispensary.
Nattore ...	1,400	Ditto ditto.
Serajgunge ...	250	From the District Fund for the repairs and extension of the dispensary building.
Burisal ...	800	From the District Fund for the maintenance of the dispensary.
Nasirabad ...	1,000	From Government for the support of the charitable dispensary and the school
Sherpore .	311	From Local Fund. (Purpose not stated.)
Kishoregunge ...	984	
Patna ...	22,725	From the Wahabee Fund to meet the preliminary expenses for a drainage and water-supply scheme.
Sasseram ...	1,200	From the Sasseram Endowment Fund for the support of the Sasseram Dispensary.
Bhagulpore ...	700	From the District Fund for the maintenance of the dispensary.
Deoghur ..	904	Rs. 300 from the Pilgrims' Lodging-house Fund for general improvement and street-lighting. Details of Rs. 600 have not been given.

23. The Lieutenant-Governor notices with satisfaction the following gifts of money or land, and works of public utility executed, by private individuals:—Rs. 3,000 out of Rs. 6,300 promised by Baboo Kali Krishna Tagore of Calcutta for metalling a road in the Baranagore Municipality was received by the municipality during the year. In Santipore a large tank was excavated, at a cost of Rs. 3,000, by Rai Ram Kissen Mukerjee Sahib, and another tank by Goondi Moyra, at a cost of Rs. 1,200, for the benefit of the inhabitants generally. The Nawab Bahadoor of Moorshedabad and his grandmother, Nawab Raisannessa Begum Shaheba, contributed Rs. 1,500 and Rs. 500 respectively towards protective works to save the people of the town from floods. In the South Barrackpore Municipality Baboo Behary Lal Pyne made a gift of Rs. 1,000 for the purpose of establishing a public burning-ghât at Sukchar. In the Soory Municipality Raja Ram Ranjan Chakravarty, Bahadoor, of Hetampore, made a donation of Rs. 1,000 towards the support of the indoor ward of the local charitable dispensary. A donation of Rs. 5,000 was made to the Rampore Beauleah Municipality by the Dighapattia Wards' Estate, in commemoration of the marriage of the two elder wards, to be expended on some work of public utility. It has been decided that the money should be spent on the construction of an underground masonry drainage channel for the most insanitary portion of the town. Another gift of Rs. 925 was made to this municipality by Baboo Girish Chandra Dutta, zemindar of Goalkandi, for the excavation of a tank. The Rungpore Municipality received from Raja Govind Lal Roy a gift of a plot of land for public burial purposes. In Furreedpore a sum of Rs. 1,391 was formally made over by the local Jubilee Committee and credited to the Municipal Fund for excavating a tank. Mir Ali Ahmed Chowdhury made a gift of Rs. 1,814 to the Burrisal Municipality for the construction of a cross road connecting the Katpatti road with the Police Line road and a pucca ghât on the east bank of the Police Line tank. Baboo Bishnu Perkash Narain Singh, of Madhubani in Chumparun, contributed a sum of Rs. 6,600 to the municipality for the construction of a serai, of a building for the municipal middle English and vernacular school, and of a municipal garden. In Bettiah, the Maharaja gave a plot of land for the site of a slaughter-house and a public latrine. At Chaibassa Colonel Samuells, the late Deputy Commissioner of Singbhoom, made a donation of Rs. 1,100 for clearing the lake near which the town stands and for repairing the bathing-ghât on it.

24. *Expenditure.*—The total municipal expenditure of the province was Rs. 26,77,511 during 1890-91, against Rs. 30,42,900 in the preceding year, and the year under report closed with a balance of Rs. 3,16,393, against Rs. 4,14,654 in 1888-89. The following comparative statement shows the percentage of the

municipal income spent in each division under each of the principal heads of expenditure during the last two years :—

Name of Division.	Income during the year.		General establishment.		Public safety.		Public health.		Public instruction.		Public convenience.	
	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.	1888-89.	1889-90.
	Rs.	Rs.										
Burdwan	6,53,367	6,41,058	10·23	10·38	10·31	8·62	44·7	47·89	6·04	6·21	19·35	17·21

25. Here also the fact that the entire area of the late Suburban Municipality has not been excluded from the operation of Act III (B.C.) of 1884 prevents the institution of any accurate comparison between the accounts of 1889-90 and those of the previous year. The statement in Appendix F shows the details of expenditure under each head, division by division. The largest expenditure is incurred on conservancy (Rs. 4,69,867), public works including maintenance and repairs of streets (Rs. 4,57,191), general establishment (Rs. 3,07,495), medical institutions (Rs. 2,30,241), and road-cleaning establishment (Rs. 1,92,741). The chief differences in expenditure, as compared with that of the year 1888-89, in the eight divisions (excluding the Presidency Division) are the following :—

Increase.

Heads of Expenditure.	Amount of increase.
	Rs.
General establishment, including collection charges ...	6,124
Establishment and appliances for extinguishing fires ...	4,491
Street lighting	6,198
Buildings and other works	12,938
Maintenance of medical institutions	5,034
Water-works	49,984
Road watering	4,554
Conservancy and road-cleaning establishment	10,693
Other measures (establishments for markets, slaughter-houses, &c)	13,851
Survey of lands	10,707

Decrease.

	Amount of decrease.
	Rs.
Repairs (to markets, dispensaries, &c.)...	7,164
Drainage works	4,070
Public instruction	5,741
Public works (establishment, new works and repairs) ...	27,835

26. The table above shows that the Municipal Commissioners increased their expenditure on works of general utility. As regards the first item, General establishment, deducting Rs. 3,022 on account of the newly-established municipalities which came into operation during the year, there was on the whole a net increase of Rs. 3,102 in the eight divisions taken together. The percentage of charges under this head to the total income of the year in each division is shown in the margin. It is evident that no standard is followed by the different municipalities in fixing the scale or pay of their establishments, and although for obvious reasons one fixed scale cannot conveniently be employed in all parts of the province, it is incumbent on the Commissioners to try and restrict the expenditure on this item as much as

Name of Division.	Percentages.
Burdwan ...	10·4
Presidency ...	12·0

possible. The Lieutenant-Governor desires to take this opportunity to invite attention to the following remarks recorded on this subject by the Commissioner of the Burdwan Division:—

"The examination of the budgets of the municipalities in this Division for the current year brought to light a marked tendency on the part of Municipal Commissioners to give occasional increases of salary to members of the establishments, instead of laying down a fixed scale (with periodical increases, if necessary) and adhering to it. This practice is one which should, in my opinion, be consistently and firmly discouraged, as being unfair to the tax-payers and demoralizing to the recipients. The funds of all the municipalities are very limited in comparison with their wants, and any increase allowed to establishments must necessarily decrease, *pro tanto*, the surplus available for works of general utility. In most cases the proposed increase was disallowed, and the Municipal Commissioners were asked to consider what their requirements were as regards the strength and pay of their establishments, to lay down a scale once for all, and to adhere to it for the future. The spectacle of a municipal subordinate canvassing the Commissioners to vote for an increase to his pay (not fixed by any scale) is not one that is consistent with a proper discharge of his duties."

These observations of Mr. Toynbee are very pertinent, and should be put into practical application in the case of all municipalities.

27. *Street lighting.*—Fifty-nine municipalities, distributed in the divisions noted in the margin, incur no expenditure on this item. In the Rajshahye Division alone all the municipalities have made some attempt at lighting the streets, however inadequate the results may be. Year after year the Inspector-General of Police brings to the notice of Government the disadvantage at which the Town Police have to work owing to the streets in municipal towns being insufficiently lighted or not lighted at all, and there is no doubt that crime is greatly facilitated and much difficulty caused to efficient police supervision by this omission.

Chota Nagpore	8
Total ...	59

28. *Maintenance of hospitals and dispensaries and vaccination.*—The statement in Appendix G shows the establishment employed and cost incurred by the municipalities on account of vaccination and the results of the vaccine operations. The total municipal expenditure on this item amounted to Rs. 16,847, against Rs. 18,047 of the previous year, out of which latter sum Rs. 3,064 represents the expenditure incurred by the late Suburban Municipality during 1888-89. The provisions of the Compulsory Vaccination Act, 1880, are in force in 130 municipalities, and the total number of persons vaccinated or revaccinated during the year amounted to 98,567, of whom 89,753 were successful cases.

One hundred and twenty municipalities maintained 127 dispensaries (including one temporary institution) during the year. The total cost incurred on account of "Medical institutions" was Rs. 2,30,241, against Rs. 2,29,810 of the previous year. The expenditure on this account increased in the Patna Division from Rs. 58,488 in 1888-89 to Rs. 62,433 during 1889-90, and in Chota Nagpore from Rs. 8,276 to Rs. 10,815. There were increases also in Rajshahye (Rs. 1,310) and Dacca. In Burdwan there was a falling off of Rs. 3,216, in the Presidency Division Rs. 4,603, and in Orissa Rs. 802. In the Sooree Municipality one-half of the cost of maintaining the dispensary was borne by the District Board of Beerbhoom, and hence the reduction of expenditure.

29. *Female Medical education.*—The Municipal Commissioners of Burdwan made a provision of Rs. 240 per annum for the education of one girl in the Campbell Medical School in Calcutta; but as no one availed herself of this offer, it was resolved to utilise the allotment in training a nurse at the Burdwan Charitable Dispensary. Their choice fell upon one Srimati Hemangini Chatterjea, who refused, however, to accept the appointment. They are now trying to secure another duly qualified and trained nurse. In the Pubna district two midwives were appointed, paid partly from the municipal and partly from the district funds. It is stated that, whilst other municipalities in the Division

were ready to incur expenditure on this account, no female students came forward for help, and consequently no help was given. In Burrisal the Municipal Commissioners employed a midwife for the female hospital. There is a female hospital attached to the Bankipore Dispensary, where a trained nurse is employed to look after female patients. Although stipends had been provided for by the municipalities in the Sarun district for female medical students attending the Temple Medical School, no candidates have yet come forward to attend the institution; but the Magistrate reports that the matter has his best attention, and that every endeavour will be made to make the scheme successful. The Lieutenant-Governor regrets that the results should be so discouraging They corroborate what has come to the notice of Government from other sources, that less interest is evinced in Bengal than in other provinces in India in the furtherance of female medical aid to women. Sir Steuart Bayley hopes, however, that both District Boards and Municipalities will persevere in their efforts to extend female medical enterprise in India.

30. *Water-works.*—The increase under this head occurred mainly in Dacca (Rs. 10,372) and Bhagulpore Rs (43,939). The Howrah Municipality reduced its expenditure from Rs. 2,471 to Rs. 413. In Dacca the increased expenditure was due to the extension of the water-works in that town, for which a loan of Rs. 1,25,000 has been sanctioned by Government.

31. *Drainage Works.*—The following municipalities show an increase or decrease of expenditure on this item as compared with the previous year:—

Municipality.	Increase.	Decrease.
	Rs	Rs.
Burdwan	4,255	
Serampore	2,735	...
Darjeeling	...	7,429
Dinagepore	...	7,911
Rampore Beauleah	...	2,271
Dacca	3,383	...
Naraingunge	1,060	...
Patna	...	3,144
Revilgunge	2,343	...
Lalbagh	2,110	...

The decrease in the Darjeeling Municipality is due to the approaching completion of the flagging of its drains, while in Dinagepore the falling off was on account of the large expenditure on drains in 1888-89 owing to the munificence of the Maharajah.

32. *Public instruction.*—The statement in Appendix J shows, division by division, the class and number of schools maintained or aided by municipalities, the number of pupils receiving instruction at them, and the expenditure incurred on them; and also the number and class of other schools within municipal limits. It has been compiled in some cases from figures furnished by Commissioners of Divisions, and in others, where this could not be done, or only incomplete information was furnished, from figures obtained from the Education Department. According to the separate report furnished by the Director of Public Instruction, the total expenditure from Municipal funds on education during the year was Rs 83,000, against an expenditure of Rs. 86,000 during 1888-89. The details are shown in the margin, and betray the fact, which was already well known to Government, that the Municipal grants are still devoted as a rule to the maintenance of English education, and that very little assistance is given to primary schools. The Lieutenant-Governor is glad to notice, however, that there is some improvement in this respect, and that Commissioners of Divisions have not been slow to check the tendency of Municipal Commissioners to aid English education at the cost of the rate payers generally, while only a few of the well-to-do class profit by the schools There are apparently serious difficulties in the way of making the figures furnished by municipalities to the Education Department correspond with those supplied by them to Government; but the matter has received attention, and it is to be hoped that in next year's reports the municipal and Departmental figures will be wholly reconciled.

	Rs.
Secondary ...	53,000
Primary ...	13,000
Female ...	9,000
Special ...	1,000
Buildings ...	4,000
Miscellaneous ...	3,000

33. *Vital statistics.*—Under this head the Lieutenant-Governor deems it advisable to reproduce the remarks he has already recorded in reviewing the report of the Sanitary Commissioner for 1889, as follows :—

"Births are now registered in 137 municipal towns with an aggregate census population of 2,422,994. The ratio of registered births is only 22·76 per thousand, the ratio of male births being 12·05, against female births 10·70. Dr. Gregg observes that the supposed standard of birth-rate in India is 40 per thousand, and it is probably even higher than this. There are indeed six municipalities in Bengal in which the statistics of birth exceed this ratio; but there are no less than 15 in which the statistics are so imperfectly recorded that the ratio is less than 10 per thousand. Among these is South Suburban Municipality, where the ratio is 7·47. In four municipalities—Muktagacha, Jhalokati, Goberdanga, and Nasirabad—the ratio is less than 5 per thousand. In a large and wealthy municipality like Patna the ratio is only 12·98, in Buxar it is 14·71, in Purneah it is 15·45, in Midnapore it is 15·73, in Jessore it is 16·71, in Dacca it is 17·71, in Cuttack it is 17·83, in Berhampore it is 18·89, and in Krishnaghur it is 19·68. When the registration in important municipalities, at the head-quarters of districts, is still so defective, it appears to be hopeless to attempt registration with any approximation to accuracy in rural areas. It is true that the registration for 1889 show a slight improvement over that of 1888, when the ratio of births was only 20·63 ; but the result is still very discouraging, and shows that municipalities as a body do not pay attention to this elementary and very necessary portion of their duties The Lieutenant-Governor has observed that during the current year, according to the statements published weekly in the Gazette, birth registration is still extremely deficient.

Births.

The same remarks are applicable to the registration of deaths in municipalities. The registered mortality in 1889 was 25·03 per thousand, against 24·86 per thousand in 1888. The statistics recorded vary very widely in different municipalities, as the following figures will show :—

Deaths.

	1889.	1888.	Mean of 1884-88.		1889.	1888.	Mean of 1884-88.
Pooree ...	71·4	32·9	50·8	Cuttack ...	20·0	16·2	17·6
Purulia ...	49·5	50 3	28·8	Furreedpore ...	19·0	8·8	21 3

City Moorshedabad...	37·9	33·8	89·4	South Suburban ...	11 2	12·7	14·7
Utterpara ...	37·7	29·0	23 7	Ranaghat ...	10·9	6·6	11·4
Baranagore ...	36·8	30·6	24·4	Kishoregunge ...	10·9	8·4	17·5
Dinagepore ...	33·4	31·5	21·9	Baduria ...	8·6	10·5	11·9
Hooghly ...	31·8	27·5	39·1	Tangail ...	5·3	9·2	18·9

The small improvement effected in the registration as a whole during the past year may be attributed to the special circular issued by Government on the subject, and to the action taken by the Sanitary Commissioner in supplementing the instructions then promulgated ; but the registration in many municipalities is still deplorably defective. There can be no reason why, under proper administrative arrangements, the registration should not be as complete at Patna and Arrah as it is at Gya, for instance, or in Ranaghat and Santipore as it is in Serampore and Utterpara. The South Suburban town is again conspicuous for its imperfect registration. The two newly-created municipalities of Cossipore-Chitpore and Manicktollah, where in the former case, a mortality is registered of 38·9 per thousand, and in the latter only 14 5 per thousand, afford a marked illustration of good and bad work in adjoining localities. It is obvious that these figures supply very little scope for any observation on the comparative health of municipalities during the year."

34. Sir Steuart Bayley is well aware that attention is now being devoted to the registration of these statistics, and he is confident that every year will show further improvement. But the point is one of real importance on which it is necessary to lay special stress; for the efficiency of muincipal administration must always be judged in a large measure by the success which attends the accurate registration of births and deaths, which are the very basis of sanitary enterprise, and in all civilised countries are recorded with the greatest accuracy.

35. *Loans and Sanitation.*—The policy of Government in regard to loans was fully stated in last year's Resolution, and every encouragement is now offered to municipalities to apply for loans for the execution of well-considered schemes of improvement. The following applications have been sanctioned within or immediately after the close of the year :—

(*a*) *Dacca.*—The municipality applied for a loan of Rs. 1,25,000 for extending the water-works to some parts of the town which were not hitherto supplied with filtered water. Rs. 30,000 was advanced during the year, and the balance will be advanced during the current year.

(*b*) *Dinagepore.*—In March 1890 orders were issued sanctioning the grant of a loan of Rs. 10,000 to the Dinagepore Municipality for the completion of the drainage works in that town.

(*c*) *Rampore Beauleah.*—In April 1890 sanction was accorded to the grant of a loan of Rs. 15,000 applied for by the Rampore Beauleah Municipality for the construction of drainage works.

(*d*) *Bankoora.*—A loan of Rs. 5,000 was applied for and sanctioned to the Bankoora Municipality in June 1890 for improving the water-supply in that town by sinking six wells and acquiring and excavating a big tank in the centre of the town.

(*e*) *Pooree.*—The municipality applied for a loan of Rs. 25,000 for the improvement of the drainage of that town. But as the scheme submitted by the municipality was not approved by the Public Works Department of Government and has to be revised in that Department, the application for the loan has been held in abeyance.

(*f*) *Sooree.*—The Sooree Municipality obtained a loan of Rs. 1,000, repayable in four years without interest, from Raja Ram Ranjan Chakrabartty, Bahadoor, of Hetampore, for establishing a municipal market called the "Jubilee Market."

Proposals for loans to the Midnapore, Chupra, and Mozufferpore Municipalities for the improvement of the drainage of those towns have been under consideration, but as the schemes were not matured in any of these places, no final orders have been passed. The Serampore Municipality applied for a loan of Rs. 30,000 for improving drainage, and a notification was published in May 1890, as required by the rules, declaring the intention of the Lieutenant-Governor to sanction the application; but up to the present time no further action has been taken. The Commissioner of the Chota Nagpore Division reports that Rajah Nilmoni Singh Deo of Pachet offered a contribution of Rs. 5,000 towards the cost of improving the water-supply of the town of Purulia, and has since the close of the year paid up Rs. 1,000 as part of his donation. As, however, a larger provision of funds will be necessary for the works, the Municipal Commissioners contemplate borrowing a sum of Rs. 10,000 from Government. The scheme for the Howrah water-works is still under the consideration of Government and it is probable that for this undertaking a comparatively large loan amounting to not less than ten lakhs of rupees will be necessary.

36. Upon the whole, the Lieutenant-Governor is not disappointed with the manner in which municipalities have availed themselves of the more liberal policy inaugurated by Government, and he is quite sure that a very profitable use is being made of the loans already granted. But he would be glad to see the larger municipalities, especially those in Behar, more forward to appreciate the necessity of capital expenditure. He has no doubt that in a short time there will be greater willingness in this direction. It must not be forgotten that municipal administration in Bengal is still in its infancy, and that the Commissioners generally have had no opportunity of appreciating the enormous benefits which result from capital outlay on sanitary and other works. The total expenditure incurred on sanitation in municipalities in Bengal last year (excluding Calcutta) was only Rs. 12,81,031, and the total of loans which had been raised by these municipalities for purposes of sanitary improvement up to the close of the year was less than three lakhs of rupees. By way of comparison it may be mentioned that the single town of Liverpool expended on sanitary improvement during the year 1887-88 the sum of £1,102,004; that the outstanding loans of the Liverpool urban sanitary authority at the close of that year were £3,284,984; that the expenditure in that year of 271 municipal boroughs in England acting as urban sanitary authorities was £15,894,457, and that the amount of outstanding loans of extra metropolitan municipalities was £152,557,155. Of course it is out of question for Bengal Municipalities to expend anything approaching to these vast sums on sanitary improvement, but the figures are quoted as being calculated to impress the imagination with the contrast in municipal development between India and Europe; and although the beginnings in Bengal are very small, it may be hoped that they will rapidly increase, and

that improvements in one town will not fail to stimulate other municipalities to rival its success.

37. *Enforcement of section* 63 *of the Act.*—The provisions of the section empowering the Commissioner of the Division and the Magistrate of the district to suspend the execution of any resolution or order, or prohibit the doing of any act by the Commissioners of a municipality, when such resolution or order or act is in excess of the powers conferred by the law, or is likely to lead to serious breach of the peace, or to cause serious injury or annoyance to the public or to any class or body of persons, were enforced in three municipalities during the year, viz., Dacca, Colgong, and Arrah. The circumstances were unimportant in all cases, and need not be especially noticed.

38. *Miscellaneous.*—The tramway in the town of Patna was completed and was in working order during the year. The length of the tramway is nearly seven miles with 11 sidings to enable cars to cross each other. The total number of passengers carried up to 31st March last was 151,260. There was only one serious accident during the year.

There were serious outbreaks of fire in the municipalities of Nattore, Bogra, and Rungpore, attended with loss of property, but no lives were lost. Great damage was done to the roads by the high floods in Coomarkholly, Nuddea, and Santipore. In Moorshedabad there was an unusual flood during the year, and considerable portions of Lalbagh and Azimgunge were under water. The Nawab Bahadoor of Moorshedabad contributed about Rs. 3,000 for giving relief to the poor in Lalbagh, and Rai Dhunput Singh, Bahadoor, and Rai Bepin Chand and Rai Budh Singh Dudhuria, Bahadoor, subscribed Rs. 500 and 100 respectively for relief of the Azimgunge people who suffered from the flood. In the Manicktollah Municipality a fire occured, causing damage to the extent of about Rs. 40,000.

In April 1889 a tornado passed over some of the villages within and about the Tangail Municipality. Its duration was very short, and it extended over a distance of five miles. It is reported that 139 human lives were lost and 242 persos seriously wounded. The loss of property was estimated at Rs. 19,000. A sudden somewhat similar blast of wind also visited the town of Nalchitti on the night of the 27th October 1889. Its duration was a few minutes only, and it extended over an area of about a mile. Some damage to property was caused, but no lives are reported to have been lost.

39. *Working of the Porters and Dandiwallas Act, V (B.C.) of* 1883, *in Darjeeling.*—The Act did not work satisfactorily during the year, and the table of rates for the hire of porters and dandiwallas was revised. Seventeen prosecutions were instituted and 15 convictions obtained. Three hundred and forty-seven dandiwallas and 229 porters were registered and 494 badges were issued. The cost incurred in the working of the Act was Rs. 170.

40. *Working of the Pilgrims' Lodging-house Act IV (B.C.) of* 1871.—In Pooree the total receipts during the year, including the opening balance of Rs. 3,983-5-2, amounted to Rs. 12,443-14-11, and the expenditure to Rs. 11,255-11-4, against Rs. 18,176-11-4 and Rs. 14,193-6-2 respectively of the preceding year. Excluding the opening balance, the receipts show an increase of nearly Rs. 3,000 over the preceding year. The sum of Rs. 5,000 was paid to the municipality for the cost of conservancy and sanitary improvement of the town. The number of lodging-houses increased from 194, capable of accommodating 5,433 lodgers, to 417, capable of accommodating 11,170 lodgers. Sixty-two pucka drains and 363 pucka latrines were constructed within house premises, and in 408 houses the rooms were provided with suitable windows. The total amount of fines realised amounted to Rs. 911-2-6, against Rs. 1,074-9 in the previous year. Besides contributing largely to the pilgrim hospital in the town of Pooree, the Lodging-house Committee continued to maintain the Pipli and aid the Balianta dispensaries. Altogether the Act worked satisfactorily.

41. The total receipts of the Gya Lodging-house Fund amounted to Rs. 18,400-7-2 (including the balance of the previous year), and the total expenditure was Rs. 13,193-2-11, leaving a balance of Rs. 5,207-4-3. The number of new certificates issued under the Act was 12, against 27 in the preceding year. Four hundred and five licenses were issued, against 476 of 1888-89, and the number of lodgers was 11,659, against 13,485. Altogether 63 prosecutions

were instituted, all of which were disposed of, 57 cases ending in conviction and 6 in acquittal. The total amount of fines imposed was Rs. 211, against Rs. 240. A further sum of Rs. 4,181-4-10 was spent in completing the cholera hospital. The hospital was formally opened in September last for the treatment of sick pilgrims in the old town of Gya. Forty-five cases were treated, of which 27 were cholera cases. There was no epidemic in the lodging-houses. They were kept in good order, and measures were adopted to keep them clean. All the houses are reported to have been regularly inspected by the Health Officer during the pilgrim season. The working of the Act appears, on the whole, to have been satisfactory.

42. In Raneegunge the Act could not be brought into working order, and the town has eventually been withdrawn from its operation after the close of the year.

43. At Chandbally the income of the year, including the opening balance, was Rs. 921 and the expenditure Rs. 655. Two pucca urinals were constructed, a tank was improved, and a large pucca well was sunk at the cost of the Lodging-house Fund. A sufficient number of sweepers was employed to sweep the streets and keep the urinals and public latrines in good order. The Act is reported to be working satisfactorily, and the difficulty which used to be felt in inducing the lodging-house keepers to apply for licenses has passed away.

44. The working of the Lodging-house Act in the town of Garbetta was transferred during the year to the District Board of Midnapore, the special committee under the Act being abolished. The District Board has also been entrusted with the working of the Act at Dantoon, another town on the Jagannath road in the Midnapore district.

45. *General working of the Municipal Act, III (B.C.) of* 1884.—The Commissioner of the Burdwan Division observes:—

Burdwan Division.

"Great credit is due to Rai Nalinaksha Basu, Bahadoor, and to Baboos Eshan Chandra Mitter and Siv Narain Mukerjea, Chairmen of the Burdwan, Hooghly, and Utterpara Municipalities respectively, for their successful administration during the past year. Other Chairmen have also done good work, and so have many of the Vice-Chairmen and members of various municipalities, but their names are too numerous for detailed mention within the limits of this report. On the whole I consider that, in spite of many faults of omission and commission, the municipalities in this Division have worked successfully and have made good use of the funds at their disposal. They are more suited to consultative than to outdoor executive work, and are chiefly dependent for the latter on their Chairman, Vice-Chairman, and subordinates. If no great progress has been made in sanitary and other improvements, it has been due to the want of means rather than to the want of will. The weakest point in the administration of the various municipalities is, I consider, the want of effective outdoor supervision."

46. The Commissioner of the Presidency Division remarks:—"The Act, on the whole, worked well. Both the elected and nominated Commissioners continue generally to take interest in their duties, and the work has been carried on smoothly. I agree with Mr. Forbes in thinking that the party dissensions which so frequently interfered in certain municipalities with the unanimity of their proceedings during the first years of the new system seem to be gradually abating."

Presidency.

47. Speaking of the municipalities in Rajshahye, the Magistrate writes:—

Rajshahye.

"The Beauleah Corporation has discharged its duties very satisfactorily. The relation between me and the Corporation has always been cordial, the Commissioners always showing their willingness to consider the suggestions made by me, and proving themselves always amenable to reason and friendly advice. The Nattore Municipality has also worked very ably. But I would like to see more coherence in the members; they should lay aside all party spirit and work in harmony for the public good. It would be well also if they tried to enlist, not only the sympathies, but the active co-operation of the local zemindars and the people in the introduction of the very many sanitary improvements which the town is sadly in need of." The Magistrate of Rungpore writes:—"The Chairman and Vice-Chairman are both pleaders, busy men, and unable to give their attention to outdoor work. They do their best, and the town is greatly indebted to them for their public spirit. It is, however, much to be wished that, in case

of vacancy in either office, it may be filled by a non-professional resident, able to give more time and attention to inspection." The Deputy Commissioner of Julpigoree, who is also the Chairman of the local municipality, writes thus:—"The provisions of the Act have worked well and without friction throughout the year, though it was found necessary to sacrifice somewhat the interest of municipal funds with regard to the registration of carts owing to the peculiar relation the town bore to the surrounding district. Hundreds of carts passed through the municipality, but as they were shown not to ply habitually, they were exempted from paying registration fees. The Commissioners have evinced great interest in the welfare of the municipality, as evidenced by the interest and trouble they took in the registration of births and deaths. It would be invidious to point out any individual while all have shown such interest, but the names of Baboos Nilmony Pal, Kedarnath Mookerjee, and Moonshee Abdul Hamed require special mention."

The Commissioner of the Rajshahye Division writes:—"The Rampore Beauleah Commissioners showed a want of firmness in dealing with the opposition encountered in the attempt to revise the tax, but from what I have seen of the working of the municipalities as a whole, I have had reason to be very well satisfied with the manner in which the Commissioners have discharged their duties."

48. The Magistrate of Dacca has recorded the following opinion of the working of the Act in his district:—"I have no remarks to make except to regret that more has not been done to keep the principal roads in better repair. The bad condition of the Naraingunge road within municipal area has been repeatedly brought to the notice of the municipality for the last three years, but with no effect. The year has in many respects been one of fairly successful administration." The Magistrate of Backergunge writes as follows:—"In all the municipalities improvements have been effected and the Committees have worked smoothly. In Burisal in particular the members take an interest in their duties and work for the public good." The Magistrate of Mymensingh writes:—"I had not the opportunity of seeing the practical working of the municipalities during the year under review, but from what I have seen of them since I joined the district, and from a perusal of the papers, I am of opinion that the working was, on the whole, satisfactory. The Municipal Commissioners generally take a great deal of interest in their work and spend much of their time for the welfare of their towns. There are certainly some grave shortcomings which require to be repeatedly pointed out and pressed on their attention in order to be remedied. As will be seen from the statements in the appendix, many of the municipalities devote unduly large portions of their income to high education, which generally benefit a small and comparatively well-to-do minority; and the Municipal Commissioners often forget that they should spend most part of their income for the greatest good of the greatest number, and that in this alone lies the justification of municipal taxation. The drainage and sanitation of most of the municipalities require to be better looked after and improved. Many of the Municipal Commissioners have neither the leisure nor the inclination to look to practical details, and often there is not that close supervision over the work of clerks, overseers, and their underlings which is essential to efficiency."

Dacca.

The Commissioner of the Division observes:—"My own acquaintance with these municipalities dates from the current year only. I feel it would be unsafe to generalise on the subject, but I cannot refrain from noticing that the formation of small municipalities which contain merely the nucleus or germ of a town, surrounded by villages whose inhabitants, whatever be their means of livelihood, possess genuine agricultural instincts, was not foreseen, and is not altogether advantageous. Where such conditions prevail, something in the nature of a plebiscite to determine whether a township shall be formed or not is much to be recommended."

In Mr. Power's objection to the establishment of very petty municipalities and to the inclusion in them of agricultural villages the Lieutenant-Governor entirely concurs.

49. The Commissioner of the Chittagong Division writes:—"Generally I do not think progress is being made. Want of funds is the great difficulty which cannot be got over. There has been much good individual work, but there has also been

Chittagong.

great laxness, particularly in the accounts of the Chittagong Municipality. There has been, as usual in almost every town, one or more personal matters which seem to cause much more interest than more important public matters."

Patna.

50. The Commissioner of the Patna Division writes thus with reference to the municipalities in his Division:—"In the Gya Municipality the working of the Act III (B.C.) of 1884 was hardly satisfactory. The Commissioners took some interest in the matter which came before them for discussion, but only held eight meetings. The affairs of the Tikari Municipality form the subject of separate correspondence. The Commissioners of the Arrah Municipality evince an amount of energy which at times is injudicious and has to be checked. The troubles at Jugdispore have already been noticed. The working of the other municipalities in the district is reported to be satisfactory, but I fear they are not what they should be. The Magistrate of Sarun writes that the municipalities in his district have worked much as usual. Those of Revilgunge and Sewan are very poor and cannot do much, but according to their lights and up to the limited extent of their powers they worked well. The affairs of the Chupra Municipality were unsatisfactory till Mr. Bourdillon was elected Chairman, when, with the help of the Sub-Committees, something has been done to remedy the defects, and a fair measure of success has been achieved. The Commissioners of the Durbhunga and Madhubani Municipalities are said to take a fair amount of interest in their work; party feeling is, however, strong among them. In Roserah, which is beyond the pale of immediate official supervision, much time is lost in petty disputes over trifles, while no attention is paid to the interests of the rate-payers. In Chumparun the Municipal Commissioners are said to have as a body worked well, and both the Vice-Chairmen of the Motihari and Bettiah Municipalities take much interest in their work. The working of the Patna Municipality shows no improvement. In the last year's report Mr. Boxwell remarked that the features are 'inadequate conservancy and latrine arrangements, almost absolute absence of supervision, conservancy staff both inadequate and idle, watering and lighting insufficiently supervised, and the drainage of the whole municipality abominably bad.' No effective steps were taken during the year to remove these defects and shortcomings."

Bhagulpore.

51. The Commissioner of the Bhagulpore Division writes:—"As I only joined the Division at the close of the year, I cannot offer any general remarks based on personal knowledge of the working of the municipalities in this Division during its course; but I gather from what I have since observed, as well as from the several annual reports, that the administration of municipal affairs has been on the whole satisfactory, and that the general body of Commissioners have shown a fair amount of interest in the duties entrusted to them, though the real work has in most cases been performed by a few members only. Monghyr, under the superintendence of its non-official Chairman, appears to be a model municipality; and Bhagulpore, which has also at present an energetic non-official Chairman, has shown its enterprise in carrying out the water-supply scheme. No water-rate, however, has yet been levied, and in its absence the ordinary rate on holdings should certainly be raised, so as to cover the large additional expenditure which prevents full justice being done to the other requirements of the town."

Orissa.

52. The Commissioner of the Orissa Division writes:—"The Chairman of the Cuttack Municipality quotes the following passage from a letter from the Sanitary Commissioner for Bengal to show what improvement has been effected in the sanitation and conservancy of the town:—'I was, however, well pleased with the cleanliness of the town and with what I saw and heard as to the manner in which the Municipal Commissioners were performing the duties of their trust. They deserve credit for the good work they have done, and I hope that when I have an opportunity of visiting the town again I will find things in as satisfactory a condition as they were in February last.' The sanitary and conservancy arrangements in the town of Pooree have also improved. The Magistrate remarks:—'There has been substantial improvement and good work done in all these matters. The Municipal Commissioners have adopted many of the

Health Officer's suggestions and worked them out honestly. Except in some low parts in the outskirts, there are few Indian towns where there is less that is offensive to sight and smell than in Pooree, always, of course, excepting crowded pilgrim seasons.' The Balasore Municipality is under the management of Dr. Zorab, the Civil Surgeon, who is Chairman, and of Rajah Boikuntanath Dé, Bahadoor, both of whom take great interest in municipal matters. The Chairman acknowledges the valuable services rendered by the Vice-Chairman, and mentions the construction at his own cost of 225 feet road-side drain in a part of the town where it was very much wanted, and also the excavation of a tank in Soonhat. Dr. Zorab remarks:—'Daily some progress towards sanitation is being made in the municipality, which is, doubtless, the outcome of the great cordiality which exists among the Commissioners. Our means are small, and advance in consequence tardy, but there is no doubt such advancement is secured by their faith in the belief that union is strength.' No remarks were made by the Magistrate on the working of the Kendrapara and Jajpore Municipalities. The Chairman of the Jajpore Municipality remarks that all the Commissioners do not take an active interest in their work, but four or five of them, including the Vice-Chairman, rendered much valuable assistance. There has been some improvement in both these towns."

53. The Commissioner of the Chota Nagpore Division has recorded the following remarks:—"The Deputy Commissioner of Hazaribagh says that the Municipal Commissioners in his district generally took great interest in their duties and expended the funds available to the best advantage. The Deputy Commissioner of Lohardugga reports that the Act worked well in the Ranchi Municipality. The Municipal Commissioners here worked as a rule in complete harmony and union, and were guided by a commendable spirit of independence and intelligence. The presence in the Municipal Committee here of the Civil Surgeon, who looks after a great deal of the sanitary matters of the town, and of the District Engineer, who assists the municipality with his professional advice, has had a salutary effect. The efficiency of the Committee is also greatly due to the active interest taken by its Vice-Chairman, Babu Saroda Kumar Aikat, a member of the local bar. The Municipal Act worked fairly well in the town of Lohardugga, considering that it has been in actual operation there since the commencement of the past year. The Commissioners here, with one or two exceptions, took interest in the affairs of the municipality, but its usefulness is principally due to the exertion of its Chairman, the Revd. Mr. F. Hahn. In Daltongunge, the absence of a Chairman for the greater portion of the year, the want of experience among the Commissioners, and the apathy of the people generally, made the work of the year a trying one, but it is hoped that in time the municipality here will be a useful institution. In Manbhoom the Purulia Municipality was, on the whole, managed well. The Commissioners, with few exceptions, took interest in their duties and, besides the business at meetings, assisted in the execution of work of the different wards. In Jhalda things were not satisfactory. The former Chairman, the Tehsildar of the Jhaldah Ward's Estate, was dismissed for fraud from the service of the Court of Wards and was required to vacate his municipal appointment. When in December last the late Deputy Commissioner visited the town, he found considerable dissatisfaction prevalent at the proceedings of the Vice-Chairman and some other Commissioners. He took steps to set matters right. The Raghunathpur Municipality is settling down to its work. Its fund, however, is scanty, and it has not therefore been able to do much. The Chaibassa Municipality worked fairly well during the past year. Its Chairman, Dr. S. J. Manook, took great interest in its affairs."

Chota Nagpore.

54. The Lieutenant-Governor has reproduced these remarks at length, as he considers they afford the best general commentary on the administration of municipalities during the year. It will be seen that the opinion of local officers is upon the whole favourable, although it does not fail to notice defects and probe the weak points of the system. Sir Steuart Bayley in this Resolution also has not hesitated to indicate many important matters in regard to which there is urgent need of improvement. But he has also been at pains to make it clear that the past year has been characterised by much good work and honest devotion to public duty. In several municipalities credit is due to the Chairmen

and Vice-Chairmen for their energetic administration under very difficult conditions. The thanks of Government are emphatically accorded to these gentlemen, and also to the district officers and divisional Commissioners to whose kindly and sympathetic co-operation and guidance much of the success attained must justly be attributed. The Lieutenant-Governor desires also to acknowledge the general excellence of the reports received from Commissioners, and especially that submitted by Mr. Toynbee, the Officiating Commissioner of Burdwan.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Government of Bengal.

WORKS OF PUBLIC UTILITY CONSTRUCTED IN 1889.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Mis. Pub. Improvements.

No. 2979 *M.P.I., dated the* 25*th November* 1890.

READ—

Statement of works of public utility constructed by private individuals in the several districts of Bengal during the year 1889.

Read again—

Statement of similar works constructed during 1888, and the Resolution thereon.

REMARKS.—The following works of public utility were constructed by private individuals during 1889:—

	No. of works.	Cost. Rs.	A.	P.
Public buildings	9	45,082	0	0
Roads	8	21,610	0	0
Bridges	4	13,446	10	0
Embankments or bunds	42	21,833	0	6
Ghâts	5	4,950	0	0
Tanks	659	4,10,684	11	6
Wells	106	32,145	0	0
Miscellaneous	5	8,525	12	0
		5,58,277	2	0
Petty works	...	90,856	13	9
Total ...	838	6,49,133	15	9

The subjoined statement shows the number of works costing more than Rs. 200 each which were constructed during the past year, and the amounts contributed, including donations for petty works, as compared with the figures for the two previous years—

YEAR.	Number of works costing between Rs. 200 and Rs. 500 each.	Number of works costing more than Rs. 500 each.	Total number of works costing Rs. 200 and upwards each.	Total expenditure on works costing Rs. 200 and upwards each.	Add cost of petty works under Rs. 200.	Total contribution.
				Rs. A. P.	Rs. A. P.	Rs. A. P.

The following works are specially noted:—

Public Buildings.—Babu Ram Chunder Gowku contributed Rs. 16,000 for an alms house at Deoghur, and contributions for similar works at Kaziwolichak and Chowliaganj, amounting to Rs. 10,000 and Rs. 8,000, were made respectively by Torul Mull Marwari and Lalla Chand Dilsukraj. A hospital was constructed in the town of Cuttack by Rajah Badyanath Pundit at a cost of Rs. 6,000, and Dr. Kalipodo Gupta, F.R.C.S., spent a further sum of Rs. 1,750 during the year in completing the charitable dispensary at Halishahar in the 24-Pergunnahs. The balance of the total amount of Rs. 45,082 contributed under this head is made up of three donations of Rs. 1,000 each and one below Rs. 500.

Roads.—The contributions, amounting to Rs. 21,610, under this head show a considerable increase when compared with the figures of 1888. Babu Nrisingha Nath Addy contributed Rs. 15,000 for a metalled road from Bandarhati to the Haripal railway station, and Rs. 4,020 were given by Rajah Baikunthanath De Bahadur for a metalled road from Balasore to Nulkool. His Highness the Maharajah of Cooch Behar contributed Rs. 1,050 for repairs to certain roads in the Julpigoree district.

Bridges.—The total contributions amounted to Rs. 13,446. Rajah Joti Prosad Gorga of Maisadal contributed Rs. 7,000 for a masonry bridge on the khal near Gewkhali, and His Highness the Maharajah of Cooch Behar spent Rs. 6,196 on bridges on the Patgram road.

Embankments or Bunds.—Of the sum of Rs. 21,833 contributed, Rs 16,793 were spent by the Durbhunga Raj on 30 bunds in the Bhagulpore district.

Ghâts.—Babu Shib Chundra Chattopadhyaya contributed Rs. 2,000 for a masonry ghât on the river Hooghly at Bellore, and Dr. Kalipodo Gupta, F.R.C.S., spent Rs. 1,000 in completing a masonry ghât at Halishahar in the 24-Pergunnahs. The total expenditure on ghâts amounted to Rs. 4,950.

Tanks.—The number of tanks constructed and re-excavated during the year was very large: the expenditure on these works amounted to Rs. 4,10,684.

The Maharajah of Durbhunga contributed Rs. 8,604 for four tanks in the Mozufferpore district, and Mussomut Rajbunsi Koer contributed Rs. 7,050 and Shaikh Sakhawat Rs. 4,000 for tanks in the same district. Babu Lachmi Narain Singh spent Rs. 5,500 on two tanks. Babus Jadab Chandra Saha and Krishna Behari Rai contributed Rs. 3,000 each; Babu Raghu Das Rs. 2,700; Babu Shib Charan Sahoo and others Rs. 2,538; Babu Kakra Mandal and others Rs. 2,357; Manorath Khawas Rs. 2,200; Babu Lalla Jha Rs. 2,100; Sheik Kanahri Rs. 2,050; Kumar Jogendra Nath Rai, Babu Gobinda Nath Saha Choudhury, Hari Kristo Poddar, Babu Gulab Missor, Tilak Mandar, Babu Ramlal Choudhri and Jahnabi Choudhurani Rs. 2,000 each; Hira Sahoo Rs. 1,951; Jhoomen Mandar and others Rs. 1,905; Jhanti Mandar and others Rs. 1,830; Somman Mandal and others Rs. 1,613; Aghari Mian, Sitai Munder and Ajarject and Totai Mandar Rs. 1,600 each; Jhoomuk Das and others Rs. 1,576; Shyam Mandar and Kasi Mahdar Rs. 1,574; Karman Mandal and others Rs. 1,525; Babus Krishna Chandra Chatterjee, Damodar Mandal, Adyait Chandra Pal, Fatoori Missir, Mussomath Lalit Kuar, Dana Thakur, Jairam Shah, Mushai Mahto, Mohunt Shia, Ram Das, Ramdin Das, Bishun Pergash Singh and the wife of Chulahi Teli Rs. 1,500 each; Nathroo Mander and others and Brojo Sundari Debya Rs. 1,400 each; Harihar Pathuk and others Rs. 1,305; Palat Sah, Dharam Chund Shah, Hari Nath Biswas and others and Goolab Mandar Koiri Rs. 1,300 each; Burmi Kamat and Bhorosi Mandal Rs. 1,242; Babus Jadu Nath Parial, Jorip Pramanick, Iswar Chandra Ghosh, Gauri Naik, Bhangi Jha, Gopal Jha, Butun Sahoo, Janordhan Singh, Lal Sahoo Teli, Birbhadra Sarangi and Srimati Sonamoni Kamarni Rs. 1,200 each; Purno Shaha, Jamir Karigar, Hira Nath Mandar and Colonel W. L. Samuells Rs. 1,100 each; and Prosad Missir Rs. 1,033.

Wells.—One hundred and six wells were constructed at a cost of Rs. 32,145. None of the contributions on this account were large.

Miscellaneous.—The sum of Rs. 8,525, contributed under this head, was spent chiefly on the excavation of water channels Srimati Kamini Sundari Dasi and Babu Harimohun Chackraverty spent Rs. 3,500 and Rs. 1,500 respectively on the construction of khals at Jogoti and Gogia in the Nuddea district, and Babu Taralukhya Nath Biswas and others Rs. 1,624 on the re-excavation of the Shreerakole khal in the 24-Pergunnahs.

RESOLUTION.—The Lieutenant-Governor notices with satisfaction that there has been a considerable increase during the year under review, both in the number of works of public utility constructed and the amount contributed for them, and His Honour desires that the thanks of the Government for their public spirit and liberality may be conveyed to those who have supplied the means wherewith the numerous works entered in the statement have been constructed.

Letters of acknowledgment will be forwarded by the Government to those who have constructed works costing over Rs. 500. The rest will receive the usual acknowledgment from the Commissioner or the Magistrate of the Division.

ORDER.—Ordered that a copy of this Resolution, and of the statement, be forwarded to the Board of Revenue, Lower Provinces, and to all Commissioners of Divisions; to the Commissioner of Chota Nagpore and to all Superintending Engineers of Public Works Circles in Bengal for information.

Ordered also that a copy of this Resolution, and of the statement, be forwarded to the Revenue and Judicial Departments of this Government for information.

Ordered also that this Resolution and the statement be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

E. J. MARTIN,

Joint-Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 22nd November 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
	Western Districts.		
BURDWAN DIVN. 1	Burdwan Nov. 22, '90	Nil	Weather—bright and cold. Prospects of crops excellent. All agricultural operations in progress to the fullest extent. Price of common rice 16 seers per rupee on an average.
2	Bankoora ,, 22, '90	Nil	Weather—seasonable. *Nuan dhan* is being reaped. *Amun dhan* is ripening. *Rubbi* sowings still continue. Sugarcane doing well. Yesterday (21st) at about 1 P.M. a large swarm of winged locusts alighted at the Sudder station and many miles round it, doing much injury to the young *rubbi* plants, but, as far as known, none to rice. Report as to extent of damage not yet received. Common rice selling at 20 seers per rupee both at Sudder and Bissenpore.
3	Birbhum ,, 22, '90	Nil	Clear and fine weather. Prospects of crops continue to be excellent. Price of rice from 17 to 20 seers per rupee.
4	Midnapur ,, 22, '90	Nil	Weather—dry; winds northerly. Rice being cut in some places. In Ghatal rain would improve *rubbi* crops. Prices of common rice :— Srs. Sudder ... ... 16; Tumlook ... ... 16; Ghatal ... ... 16; Contai ... ... 19 } per rupee.
5	Hooghly ,, 22, '90	Nil	Weather—cold, especially at night. Prospects of all crops good. Harvesting of rice commenced. Prices of common rice :— Srs. Sudder ... ... 13; Serampore ... ... 13; Jehanabad ... ... 16¾ } per rupee.
	Howrah ,, 22, '90	Nil	Weather—seasonable. *Amun* crop doing well. Prospects good. Price of common rice 14 to 14½ seers per rupee.
	Central Districts.		
PRESIDENCY DIVN. 6	24-Perghs. Nov. 25, '90	Nil	Weather—seasonable. Prospects of *amun* crop excellent. Ploughing going on for winter crops. On the 18th there was a flight of locusts over the Bussirhat subdivisional head-quarters. The insects passed from north-west to south-east direction and did slight damage to *rubbi* crops. Prices stationary.
7	Nuddea ,, 22, '90	Nil	Weather—seasonable. Harvesting of *amun* and sowing of winter crops still going on. Prospects of crops good.
8	Khoolna ,, 22, '90	Nil	Weather—seasonable. Prospects of *amun* favourable except in the flooded area.
9	Jessore ,, 22, '90	Nil	Weather—seasonable. Harvesting of *amun* commenced and price of rice reduced in some places. Sowing of *rubbi* crops still going on. Agricultural loans are still being issued.
10	Moorshedabad ,, 22, '90	Nil	Weather—getting cool. Harvesting of *haimanti* rice commenced. *Rubbi* crops being sown. *Kalai* doing well. Prospects good.
RAJSHAHYE DIVN. 11	Dinagepur ,, 22, '90	Nil	Weather—seasonable. Prospects of crops continue good. Price of rice stationary. No more damage by locusts reported.
12	Rajshahye ,, 22, '90	Nil	Weather—dry and cool. Harvesting of winter paddy commenced. Prospects good. Prospects of ganja improving. *Rubbi* crops being sown.
13	Rungpur ,, 22, '90	Nil	Cold weather has set in. Everything promises fairly. Winter rice ripening and will be a heavy crop. A good deal of jute has remained uncut owing to a great fall in market price.
14	Bogra ,, 22, '90	Nil	Weather—seasonable. Winter rice generally doing very well, and in a few places harvesting has begun. *Rubbi* crops thriving where sown, and other lands are being prepared for them. Common rice selling at 15¾ seers per rupee.
15	Pubna ,, 22, '90	Nil	Weather—seasonable. Prospects of standing crops continue good. *Amun* is being reaped. Mustard and tobacco are being sown. Prices slightly lower.
16	Darjeeling ,, 22, '90	Nil	Weather—bright; mornings and evenings cold. Prospects of crops good. *Marwa* is being harvested. Winter rice doing well in the hills.
17	Julpigoree ,, 22, '90	Nil	Weather—seasonable. Prospects of crops favourable. Price of rice stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Div. 18	Dacca Nov. 22, '90	Nil	Weather—seasonable. Cultivation for winter crops going on. Late rice thriving. Price of common rice 12 to 16 seers per rupee.
19	Furreedpur ,, 22, '90	Nil	Weather—seasonable. State of standing crops fair. *Amun* paddy being harvested. Cultivation and sowing of winter crops in progress. Common rice selling at 13, 14 and 17 seers per rupee at the Sudder, Goalundo, and Madaripur subdivisional head-quarters respectively. Flight of locusts continuing since yesterday (21st); direction west to east; extent of damage cannot at present be estimated.
20	Backergunge ,, 22, '90	Nil	Weather—seasonable. State and prospect of crops fair. Common rice selling at about 13 seers per rupee.
21	Mymensingh ,, 22, '90	Nil	Weather—seasonable. Prospects of *amun* favourable. *Rubbi* sowings still continue. Price of common rice 12½ seers per rupee.
Chittagong Div. 22	Chittagong ,, 25, '90	Nil	Weather—seasonable. Harvesting of early winter rice commenced. Prospects of *amun* promising. Cultivation of vegetable crop continues. Prices unchanged.
23	Noakholly ,, 22, '90	Nil	Weather—seasonable. State of *amun* crop good. *Rubbi* crops progressing.
24	Tipperah ,, 22, '90	Nil	Weather—seasonable. Lands are being prepared for winter crops. *Amun* is being reaped. Prospects good. Prices stationary.
25	Chittagong Hill Tracts. ,, 20, '90	Nil	Weather—seasonable; dense fogs in nights and mornings. Gathering of cotton continues. Harvesting of early plough-paddy going on. Lands are still being ploughed in some places for mustard. Common rice is being sold at 11 seers 6¾ chittacks per rupee.
	Hill Tipperah ...	...	Report not received.
BEHAR.			
Patna Div. 26	Patna Nov. 22, '90	Nil	Weather—cool. Harvesting of paddy commenced in some places. Sowing of *rubbi* and poppy still continues. *Rubbi* crops already sown are growing well. *Rubbi* and cotton look flourishing. Prices of food-grains almost stationary.
27	Gya ,, 32, '90	Nil	Weather—cold and fair. Sowing of *rubbi* and poppy crops finished. Paddy harvest going on throughout the district. Prospects favourable. Prices of food-grains falling.
28	Shahabad ,, 22, '90	Nil	Weather—cool with passing clouds. All crops looking promising.
29	Durbhunga ,, 22, '90	Nil	Weather—getting cool. Harvesting of rice crop commenced in places. *Rubbi* crops look promising. Poppy sowing in progress. Price of common rice falling.
30	Mozufferpur ,, 22, '90	Nil	Weather—seasonable. Prospects of all crops continue excellent. Weather very favourable for poppy cultivation.
31	Sarun ,, 22, '90	Nil	Weather—bright and cool at night. *Rubbi* sowings nearly completed. Prospects excellent. Poppy sowings rapidly progressing.
32	Chumparun ,, 22, '90	Nil	Weather—seasonable. Paddy beginning to ripen. *Rubbi* and poppy sowings progressing and are germinating freely owing to the soil having plenty of moisture.
Bhagulpore Div. 33	Monghyr ,, 22, '90	Nil	Weather—seasonable. State and prospects of winter rice continue favourable. *Rubbi* sowings still going on; early sowings have germinated well.
34	Bhagulpore ,, 22, '90	Nil	Weather—rather warm for the season. *Rubbi* sowings drawing to a close. Prospects of all crops good.
35	Purneah ,, 22, '90	Nil	Weather—somewhat hot during the day; nights cool. In spite of partial damage by floods, a full *aghani* crop may be expected. *Rubbi* crops doing well and promise a good harvest.
36	Maldah ,, 22, '90	Nil	Weather—seasonable Prospects of crops good. Common rice selling at from 13 to 18 seers per rupee.
37	Sonthal Perghs. ,, 22, 90	Nil	Weather—seasonable. Prospects of all crops good. Harvesting of early rice in progress, and a full outturn expected. Common rice selling at 22 seers per rupee.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	38	Cuttack ...	...	Report not received.
	39	Pooree „ 20, '90	Nil	Weather—seasonable. Early *sarad* rice being harvested; outturn estimated at 14 annas. Late *sarad* in ear. Miscellaneous crops doing well. Price of rice 21 to 29 seers per rupee.
	40	Balasore „ 22, '90	Nil	Weather—seasonable. Early winter rice is still being harvested.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh Nov. 22, '90	Nil	Weather—clear and cold. Harvesting of winter rice continues. *Rubbi* sowings nearly completed. Prospects of crops good. Common rice selling at 20 seers per rupee.
	42	Lohardugga „ 22, '90	Nil	Weather—seasonable. Harvesting of winter rice continues. Rain badly wanted for *rubbi*. Prices steady.
	43	Singbhoom „ 22, '90	Nil	Weather—seasonable. Paddy being harvested with a full crop everywhere except in thanna Chakradhurpur, where the outturn is from 8 to 12 annas. *Rubbi* crops thriving. Tussur cocoons expected to yield 16 annas except at Dumuria, where the crop is only 2 annas, and at Baharagora, where it is 8 annas Extent of mustard seed sowings from one anna in Chakradhurpur and Asanboni to 16 annas in Kolhapur.
	44	Manbhoom „ 22, '90	Nil	Weather—dry and fairly cool. Harvesting of winter rice in full swing. Prospects generally favourable.

* Mean of five days. | † Mean of six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numl
are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the
stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 21st of November 1890.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. RAINFALL. Of week. Mean for district.	Of week. Normal mean.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15th May 1890. Mean for district.	Since 15th May 1890. Normal mean.	Since 15th May 1890. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the r are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 25th November* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 21ST OF NOVEMBER 1890.

FINE weather has continued throughout the week, both in Bengal and over the Bay, with high pressure, and temperature generally below the normal. At the commencement of the week the pressure distribution was about normal with slight gradients from west to east, the usual faint wind circulation and cloudless skies. Though a steady rise of pressure went on from the 15th till the 18th, the general conditions underwent no change, except that the defect in temperature began to disappear in the eastern districts. On the 19th pressure fell very slowly in Behar, while the rise continued elsewhere, and from being westerly, wind directions became first irregular, and afterwards east over the whole of the northern half of the province. With this change temperature rose slowly on the 19th in all districts, and on the 20th at all except the stations in East Bengal and part of North Bengal, where excess was almost general, and ranged up to 3·7° at Rampore Beauleah. North-easterly winds were still blowing on Friday, the last day of the week, in North Bengal, North Behar, and parts of South-West and East Bengal, and temperature was generally rising, but otherwise ordinary weather prevailed. In the south of the Bay, however, conditions were beginning to be unsettled; pressure from being very high was falling, and indraught to a low-pressure area in the extreme south was more distinct.

Pressure, as stated above, has been very high throughout the week, especially in the south of the Bay, and the distribution more uniform than usual. Means for the week are all considerably above the normal, excess varying from a twentieth of an inch in Behar and North Bengal to a tenth in the south of Orissa.

Temperature, as compared with the normal, was lowest in the early part of the week, the lowest minimum readings occurring between the 16th and 18th at all except a few stations in East and North Bengal. The highest maximum temperature, however, was generally recorded on the 15th, the first day of the week. In the table giving temperatures at representative stations it will be seen that mean defect during the day has been less than at night at all except Purneah and Darjeeling, where the mean maximum temperature is below and the mean minimum above the normal. For the large divisions means are below the normal by ·5° or less, except in South-West Bengal and South Behar, where defect is 1·1° and 1·4° respectively, and in North Bengal, where there is excess of ·8°.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending the 21st of November 1890.

	Normal mean maximum temperature for the week ending 21st November.	Actual mean maximum temperature for the week ending 21st November 1890.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 21st November.	Actual mean minimum temperature for the week ending 21st November 1890.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 21st November.	Actual mean daily temperature for the week ending 21st November 1890.	Variation of actual mean from the normal.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the New Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≏ dew, ≡ fog.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 24th November 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 1st November 1890.

Births.

The births registered during the week ending with Saturday, the 1st November 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 29·1 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 4·2 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of births per 1,000 of the population per annum	27·5	23·4	23·9	23·0	26·5	24·9	29·1

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 11th Oct. 1890.	18th Oct. 1890.	25th Oct. 1890.	1st Nov. 1890.	Towns.	Weeks ending— 11th Oct. 1890.	18th Oct. 1890.	25th Oct. 1890.	1st Nov. 1890.
Burdwan	13·7	33·6	13·7	33·6	Narainganj	49·7	24·8	70·4	66·2
Midnapore	18·6	7·7	7·7	20·1	Chittagong	9·4	9·4	...	11·7
Hughli and Chinsurah	41·0	49·2	27·9	42·7	Comillah	27·0	27·0	46·2	19·3

Darjiling	51·9	51·9	14·8	...	Poori	13·9	16·8	16·8	21·0
Dacca	18·8	24·0	13·0	27·9	Total ...	29·5	25·0	19·4	29·1

It will be seen that last week the highest birth-rate was returned from Narainganj (66·2) and the lowest from Purneah (3·4). No births were registered during the week in Jessore and Darjiling towns.

Deaths.

The deaths registered during the week under review correspond to an annual rate of 23·7 per 1,000 of the population. The rate of the week is 7·4 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1887—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of deaths per 1,000 of the population per annum	35·9	30·4	23·7	28·1	28·5	31·1	23·7

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 11th Oct. 1890.	18th Oct. 1890.	25th Oct. 1890.	1st Nov. 1890.	Towns.	Weeks ending— 11th Oct. 1890.	18th Oct. 1890.	25th Oct. 1890.	1st Nov. 1890.
Burdwan	24·4	22·9	22·9	35·1	Narainganj	37·2	24·8	41·4	45·5
Midnapore	27·9	12·4	9·3	21·7	Chittagong	16·4	14·1	...	25·8

Bali	28·1	24·6	28·1	14·0	Mozufferpore	24·3	38·9	14·6	14·6
Krishnagar	5·7	7·6	3·8	11·4	Durbhanga	26·7	20·5	29·9	30·0
Ranaghat	12·0	24·0	24·0	24·0	Chupra	27·2	20·1	23·1	17·1
Santipore	3·5	3·5	...	10·5	Bhagulpore	14·5	17·2	...	18·1
Jessore	30·6	...	30·6	40·0	Monghyr	29·8	21·7	24·4	37·1
Rampore Beauleah	44·7	42·0	49·2	39·4	Purneah	17·3	6·9	20·8	27·7
Darjiling	44·5	51·9	44·5	66·7	Poori	42·0	25·2	16·9	35·7
Dacca	18·2	18·2	25·9	20·8	Total ...	25·3	22·8	20·4	23·7

It will be seen that last week the highest mortality occurred in the town of Serampore (82·4) and the lowest in Santipore (10·5).

Measured by last week's mortality, the highest annual death-rates from cholera, fever bowel-complaints and other causes occurred in the following towns:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Patna City	... 5·5	Jessore	... 42·8	Darjiling	... 29·6	Utterpara	... 37·7
Monghyr	... 5·4	Rampore Beauleah	36·8	Serampore	... 15·7	Serampore	... 33·4
		Darjiling	... 29·6			Naraingunj	... 20·4
		Serampore	... 29·4			Poori	... 16·8
		Ranaghat	... 24 0			Gya	... 13·7
		Purneah	... 20·8			Dacca	... 11·0
						Midnapore	... 10·8

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 1·8 from cholera, against 1·9 per 1,000 in the preceding week; 10·5 from fever, against 10·4; 3·3 from bowel-complaints, against 2·8; ·2 from injury, against ·4; and 7·9 from other causes, against 4·8 in the preceding week. No deaths were registered from small-pox during the week.

The mortality of last week according to *Sex*, *Class*, and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	22·4	Christians	... 7·5	Under 1 year	... 200 8
Females	25·2	Hindus	... 24·0	1 and under 5 years	... 35·8
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	89	Mahomedans	... 23·7	5 „ 10 „	... 11·8
				10 „ 15 „	... 7·5
				15 „ 20 „	... 15·4
				20 „ 30 „	... 11·8
				30 „ 40 „	... 16·9
				40 „ 50 „	... 15·8
				50 „ 60 „	... 28·2
				60 years and upwards	... 58·5

Detailed information regarding the vital statistics of the twenty-seven principal town, dealt with in the above review will be found in the statement appended.

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of August 1890.

Increases.	Tons.
Coal	1,689
For railway and flotilla consumption.	
Rice	2,533
Goalundo contributed 11,000 maunds and the Northern Section the remainder.	
Railway plant and rolling-stock	7,652
For repairs and renewals.	
Salt	929
The despatches from Chitpore increased by 44,914 maunds.	

Decreases.	Tons.
Cotton piece-goods	767
Ordinary fluctuation of traffic.	
Jute, screwed	4,522
Narayanganj shows the large decrease of 1,75,380 maunds.	
Jute, unscrewed	1,169
The decrease in despatches from Narayanganj amounted to 52,128 maunds.	
Oil-seeds	1,103
Narayanganj shows the largest decrease, 18,285 maunds, and Narayang follows with a decrease of 5,854 maunds.	

F. P. QUINLAN,
Examiner of Accounts.

CALCUTTA, *the 17th November* 1890.

General remarks on the fluctuation of principal staples carried over the East Indian Railway during the month ended 25th October 1890.

INCREASES.

Coal and coke, up and down.—In the upward traffic there was an increase in the weight carried, attended with a decrease in earnings. The former was due to despatches of short distance Umaria coal from *viâ* Katni to Jubbulpore for the Great Indian

Peninsula Railway, and the decrease in earnings to smaller despatches for the Bombay-Baroda and Central India and the North-Western Railways. The downward traffic showed an advance partly for export to coast ports.

Turmeric. The increase in this commodity occurred chiefly in despatches from Howrah to Patna, Cawnpore and other up-country stations.

Rice (husked and unhusked).—Due to heavier despatches from the loop line stations to stations on the Oudh and Rohilkhand Railway, where the crop was damaged by heavy rains, and to Howrah.

Other rain and spring crops.—The increase was chiefly in Indian-corn and other cheap food-grains from stations on the "B" district to stations on the "B" district, and the Oudh and Rohilkhand Railway.

Government stores.—Chiefly in despatches of ammunition from Howrah and Bhadreswar ghât to Allahabad and Agra, and in ordnance stores from Allahabad Fort and Cawnpore to Agra Delhi, and stations on the North-Western Railway.

Iron.—Consisted chiefly of iron pipes from Howrah for the Allahabad and Agra water-works.

Ghee.—The improvement in this staple was chiefly in despatches from stations in the North-Western Provinces to Howrah, owing to a good demand in Calcutta for the Doorga Poojah holidays.

Salt.—Chiefly in despatches of imported salt from Howrah to the Bengal and North-Western Railway and to the Tirhoot State Railway.

Sugar (refined and unrefined).—The increase was chiefly in imported sugar from Howrah to up-country stations.

Bones.—Chiefly in despatches from Digha Ghât, Mokameh Ghât, and *viâ* Moghalsarai to Bally and Chitpore.

DECREASES

Cotton.—The decrease was chiefly in despatches from Cawnpore and other cotton despatching stations in the "D" district owing to last season having been early.

Piece-goods, European.—There was an increase in the weight carried, attended with a decrease in earnings, due to heavy short distance despatches from Howrah to stations on the "A" and "B" districts, owing to a good demand for the Doorga Poojah Holidays. Despatches to Cawnpore and Delhi show a serious falling off.

Indigo.—The decrease was in despatches from the North-Western Provinces; the crop suffered much from heavy rains in July and August last.

Jute, raw.—The falling off was chiefly in receipts from the Eastern Bengal State Railway *viâ* Naihati and Sahebgunge.

Gunny.—Chiefly in despatches from Howrah and neighbouring stations, owing to the state of the export produce trade.

Gram and pulses.—The improvement in the weight carried was in short lead traffic from stations on the loop line to Patna and stations above, and the decrease in earnings was in long distance traffic from stations on the "D" district.

Railway materials, foreign.—Chiefly in heavier despatches of permanent-way material sent last year from Howrah for the Delhi-Umballa-Kalka Railway.

Seeds.—Chiefly in mustard and other oil seeds from Patna and the Bengal and North-Western and Tirhoot Railways.

OFFER OF RANI MANOMOHINI DEBI OF PUTIYA, IN RAJSHAHYE, TO CONSTRUCT WELLS TO IMPROVE THE SUPPLY OF WATER FOR DRINKING AND BATHING PURPOSES IN THE DISTRICT.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 29th November, 1890.

RESOLUTION.

READ—

A memorandum from the Commissioner of Rajshahye, No. 135P.W., dated the 27th August, 1890; also No. 94P.W.Ct., dated the 7th November, 1890.

RANI MANOMOHINI DEBI of Putiya, in the district of Rajshahye, having offered to construct a number of wells, at an estimated expenditure of Rs. 10,000 to Rs. 12,000 per annum for four or five years, with a view to improving the supply of water for drinking and bathing purposes throughout the district, the Lieutenant-Governor is pleased to accept this offer, and tenders his thanks to the Rani for her public spirit and liberality.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Commissioner of Rajshahye for information and for communication to the Rani.

Ordered also that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,
Secretary to the Government of Bengal.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF DISTRICT BOARDS DURING THE YEAR 1889-90.

MUNICIPAL DEPARTMENT—LOCAL SELF-GOVERNMENT.

Calcutta, the 25th November, 1890.

RESOLUTION.

READ—

The reports from the several Commissioners of Divisions on the working of District Boards during the year 1889-90.

Read again—

The Resolution on the working of District Boards in Bengal during the year 1888-89.

The present reports, which are prepared in accordance with the instructions issued in Government Circular No. 21, dated the 1st November 1889, furnish full information on the working of District Boards during the past year, and under separate orders copies have been liberally supplied to those whom they concern. They are a great improvement on the reports submitted in previous years, and in particular the report of Mr. Toynbee, the Officiating Commissioner of Burdwan, deserves commendation. The statistics which accompany them are given in forms recently prescribed by the Government of India, which were only circulated in July last, and it is largely due to the late arrival of these forms, and the difficulty of substituting them in so short a time for those already in use, that delay has occurred in the submission of the reports.

Constitution of Boards.

2. Form I appended to this Resolution contains particulars regarding the constitution of the District and Local Boards in Bengal, the number of meetings held by the Boards, and the average attendance at meetings. There were during the year 38 District Boards and 106 Local Boards; the area comprised within their jurisdiction was 109,391 square miles, and the total population, according to the census of 1881, was 57,185,307.

3. The total number of members of District Boards, including the Chairmen, was 797, of whom 460 were appointed by Government and 337 were elected. Of the total number of members, 243 were officials and 584 non-officials. The number of Europeans or Eurasians and natives of India respectively was 186 and 611. The average number of members of each District Board was 20·97. It was suggested, in paragraph 7 of the Resolution on the working of District Boards for 1888-89, that the number of members of the District Boards of Bhagulpore, Midnapore, Rungpore, and Sarun might be reduced, and the number of members of the Bhagulpore and Midnapore District Boards now consists of 30 and 24, while a proposal to reduce the number of members of the Rungpore District Board to 26 is under consideration. As in the previous year, the Magistrate of the District was in every instance re-appointed Chairman of the District Board on the expiry of his term of office, under section 24 of the Bengal Local Self-Government Act.

4. The total number of members of Local Boards was 1,203, of whom 768 were nominated by Government and 435 were elected. The elective system is in force in 58 Local Boards. Of the total number of members of Local Boards, 163 were officials and 1,040 non-officials. The number of Europeans or Eurasians and natives of India on the Boards was 97 and 1,106 respectively. The average number of members of each Local Board was 11·35. Midnapore (36) and Arrah (30) head the list in point of numbers, but it has been decided to reduce the numerical strength of these Boards on the expiry of the term of office of the existing incumbents.

5. The statements do not in all cases furnish the professional occupation of the members of Boards. This is, however, a very important point, and instructions will separately issue calling for information under this head in future years as well for District and Local Boards as for Municipal Committees. It was found, on occasion of the first elections in 1887,

that the proportion of zemindars elected to the District Boards was about 30 per cent., of pleaders 26·4 per cent., and of Government servants 17·7 per cent., and it is not likely that the proportion has materially changed. Generally speaking the members of District and Local Boards consist of zemindars and talookdars, pleaders and Government servants, with a somewhat larger proportion of medical practitioners and mooktears in the case of Local Boards, and in districts where they are to be found, indigo and tea planters, railway employés and managers of European firms always enjoy a fair share of representation.

General elections.

6. The year under report witnessed the second general election of members of District and Local Boards which had completed their three years' term of existence, and the elections were on the whole successfully conducted. The following are the remarks recorded by the Divisional Commissioners on the subject.

The Commissioner of Burdwan writes:—

"The second general elections took place during the year under report and new Boards were formed before its close in every district except Midnapore, where the number of members was reduced and the issue of the necessary revised Government notifications took up much time. The elections were, as a rule, successfully conducted, and, with a very few exceptions, fairly suitable and representative members were elected. The pleader element was, perhaps, considering the amount of landed property they possess, disproportionately successful. The educated classes took considerable interest in the elections, but in no case was any general public interest or enthusiasm evoked.

"The elections only failed in one thannah of Burdwan, three of Hooghly, and in one of Beerbhoom. The failures were due in one case to the absence of voters, and in the three others to the absence of timely nominations * * * * *

"The inhabitants of thannahs remote from the head-quarters of districts appear to take more interest in the election of representatives than the urban and semi-urban population."

The Commissioner of the Presidency Division writes:—

"The second general elections took place during the year under report, and new Local Boards were formed in every district before the close of the year. The new District Boards, however, were not constituted till after the close of the year. The elections were on the whole successfully conducted, and, with a few exceptions, fairly suitable and representative members were elected.

"In Jessore and Khulna there was no failure of election in any of the thannahs. In the 24-Pergunnahs there were no elections held in thannah Canning (Sudder) or Harwa (Bussirhat), and out of two and four members for election in thannahs Hasnabad and Dum-Dum respectively, only one was elected for each thannah. In Nuddea the elections failed in thannah Chapra in the Sudder, as 10 per cent. of the registered voters were not present, and in thannahs Gangni and Tehatta in the Meherpore sub-division, as the electors failed to nominate candidates under Rules 28 and 29. In Moorshedabad there were no elections in thannahs Sujagunge, Gorabazar, Doulatabad, Nowada, and Barna in the Sudder sub-division, Sagardighi, Assanpore, Manullabazar, and Shahnagur in the Lalbag sub-division, and Kandi and Khurgram in the Kandi sub-division, in consequence of the omission of the electors to nominate candidates beforehand under Rule 29 All these vacancies were therefore filled up by appointment under section 10 of the Local Self-Government Act."

The Commissioner of Rajshahye states:—

"A general election of members for the Local Boards took place in Rajshahye in December and in Pubna in September last.

"The Magistrate of Rajshahye, who was present at thannahs Puttea, Charghat, Beauleah, and Godagari, states that at each of these places the voters displayed the greatest interest in the proceedings. A Deputy Magistrate was present at Bagmara, and he reports that the voters were animated by the greatest enthusiasm in securing the election of their candidates. The Sub-divisional Officer of Nowgong and the Sub-Deputy Collector of that place, who were present at the thannahs of Nowgong Local Board, state that the voters elected the members with shouts of acclamation and manifestation of the greatest delight.

"The Chairman of the Pubna District Board writes that the dates for the elections having fallen at a season when the flood was at its highest (and the floods of the year were higher than any within recent years), the attendance of the voters was not so large as it would have otherwise been.

"On the whole it appears that a very fair amount of interest was taken in the elections."

The Commissioner of Dacca remarks—

"The second general election of the members of the several Local Boards in the districts of Dacca and Furreedpore was held in the latter part of September 1889.

"It is satisfactory to note that in no case did the elections fail owing to the non-attendance of a sufficient number of voters. In Dacca it is reported that the electors generally displayed considerable interest in the proceedings, and that in several thannahs the excitement was great and the elections were warmly contested. In Furreedpore the paucity of attendance at the

polling stations, specially in those of Bhanga, Baliakandi, Palong, and Kotalipara, is attributed to the unusually heavy floods of last year which prevented many voters from attending."

The Commissioner of Patna writes—

"The Patna District Board completed its three years' term in September 1889; and although arrangements for its reconstitution were commenced early, the new Board, which consists of 24 members, composed of the official and non-official Europeans and Natives in the same proportion as its predecessor, did not assemble till 10th March. The Local Board elections which were held in the Patna District were fairly successful. Out of 28, the total number of members to be elected, 23 were elected, leaving only 5 to be appointed by Government."

Meetings of Boards.

7. Taken together, the total number of meetings held by District Boards was 448, giving an average of 11·79 meetings for each Board. The greatest number of meetings was held in Dinagepore (18), Tipperah (18), Sarun (18), Burdwan (17), Gya (17), Furreedpore (16), and Durbhunga (16), while the least number was held in Hooghly (8), Mymensingh (8), Mozufferpore (8), Chumparun (8), Nuddea (7), Moorshedabad (7), Julpigoree (7), and Jessore (6). Except in the case of Hooghly and Mymensingh, no reason is assigned for the small number of meetings. In regard to Hooghly it is said that, "on the introduction of local self-government three years ago, the members had to meet oftener to consider many important questions of principle which presented themselves for solution, but that matters have since settled into a groove and that fewer meetings had therefore to be called during the year under report than during the two preceding years." In Mymensingh it is stated that "the attention of the Chairman and the other members was devoted more to the execution of the heavy amount of real work done during the year than to taking part in the discussions in the meetings." The Lieutenant-Governor cannot accept either of these reasons as satisfactory, and invites attention to the following remarks recorded by the Commissioner of Burdwan, which are entirely in accordance with the views of Government on this subject:—

"It is difficult to believe that all the business of the various departments now under the control of the District and Local Boards can be transacted in less than 12 meetings during the year. Much of the routine work is no doubt done by the Chairman and Vice-Chairman by the express or implied consent of the Boards; much, too, depends on the individuality of these two officers. But, all things considered, one meeting every month ought to be the minimum number consistently with an intelligent interest in their work on the part of the members. There is, I fear, considerable general truth in the remark made by the Chairman of the Raneegunge Local Board to the effect that, unless matters come before the Board in which the members are directly and personally interested, it is hopeless to expect them to attend regularly. A self-denying public spirit is one of the elements requisite to make local self-government a success in this country."

8. The average attendance at meetings of District Boards was 8·98, the average percentage of attendance being 42·82. The attendance was best in Howrah and Tipperah, amounting to 65 and 62·7 respectively, and worst in Cuttack, where it was only 19·8. In the last-named district six meetings were adjourned for want of a quorum out of 12 convened.

9. The total number of meetings held by all the Local Boards was 788, the average for each being 7·43. Only 8 of the Local Boards held more than 12 meetings, the highest number attained being 15 in Bhubooah. Six of the Boards held 12 meetings, and the rest less than 12 meetings. The Howrah Local Board held only two meetings, while the Local Boards of Beauleah, Nowgong, and Nattore met only once during the year. For all practical purposes, therefore, these Boards did not exist. The average attendance at meetings of Local Boards was 5·69, and the average percentage of attendance was 50·13.

Powers of Local Boards.

10. In most districts Local Boards have been entrusted with the administration of the grants for village roads, pounds, ferries, and primary education. In some instances powers relating to water-supply, the grant of rewards for the destruction of noxious animals, and the management and supervision of grant-in-aid and Boards' middle English schools have also been delegated to them.

Union Committees.

11. No Union Committees have yet been appointed, but a scheme for their gradual establishment has been submitted to the Government of India, and is still under consideration.

Financial results.

12. The following statement, which is abstracted from Forms II and III appended to this Resolution, shows the principal items of income and expenditure of District Boards during the year under review :—

The names of the above headings are taken from the forms prescribed by the Government of India which are appended to this Resolution, with the exception that the words "Pounds" and "Ferries" are substituted for "Police" and "Civil Works" under Income, and the word "Pounds" for "Police" on the Expenditure side of the accounts. These changes have been made because it should be clearly understood that the Police have no concern with, and have no responsibility for, the administration of pounds, which are entirely under District Boards; while the heading "Civil Works" would be misleading when the item concerned almost exclusively relates to ferry receipts. It should be explained also that though the name of the heading "Provincial Rates" has not been altered, the income shown under this head is derived from a "local rate" or cess which is entirely appropriated and spent within the district where it is realised, and that the Road cess is not a provincial rate in the sense in which the Public Works Cess, which is a provincial asset, may be properly so described.

Credit balances.

13. The year 1888-89 closed with a credit balance of Rs. 18,28,843 (corrected figures): at the close of the year 1889-90 this balance was increased to Rs. 19,30,006.

Income.

Land Revenue.

14. Of the total income under this head Rs. 9,365 represent canal tolls realized in Chittagong and the balance sale proceeds of trees, grass, &c. Compared with the previous year, the Chittagong canal revenue shows a falling off to the extent of Rs. 2,213.

Provincial rates.

15. The entire amount, Rs. 34,32,574, under this head represents the balance of the receipts of the District Road Cess which is credited to District Boards after deducting the cost of collection and revaluation. Compared with the previous year, there was an increase of Rs. 78,704 in the income derived from this source, and this item may be expected to increase slowly but surely in consequence of the revaluations which from time to time are effected in all districts. The largest increase during the past year was in Burdwan and Gya, from Rs. 1,02,826 and Rs. 1,76,014 in 1888-89 to Rs. 1,36,865 and Rs. 1,97,198 respectively.

Pounds.

16. The total receipts from pounds under the Cattle Trespass Act, amounting to Rs. 3,94,594 only, show a net decrease of Rs. 37,321 as compared with the collections of 1888-89, and a decrease of Rs. 25,559 as compared with the estimate (Rs. 4,20,153) on which the Provincial adjustments with District Boards were based. The decrease is, however, more apparent than real, and is mainly due to a change in the system of accounts. Under recent orders of Government, the security advances, amounting to one quarter's demand, taken from the pound farmers at the time of settlement in March 1890, were credited to the suspense head of

accounts, "Deposits," pending adjustment by transfer from "Deposits" to "Pound rents," whereas in previous years such advances were directly credited to "Pound rents."

It is useless therefore to institute any comparison between the realizations during the past and previous years. The estimate for the current year amounts to Rs. 4,42,441, and there seems no reason to suppose that there is any real falling off in pound receipts In reply to the observation which was made in last year's Resolution that "if Boards are careful to see that security advances are properly taken, and farmers are not permitted to hold on when default occurs, there should be no arrears," it is pointed out by more than one District Board that some farmers, after retaining their pounds during the profitable months of the year, purposely default when the season is over, and that as they have made their profit they are willing to forfeit their security, and that therefore great difficulty is found in settling the pounds for the remainder of the year. This is no doubt a real difficulty, but a remedy appears to lie in the suggestion which is put forward by the Commissioner of the Presidency Division that the payment of pound rents should be fixed not in equal instalments, but according to the different seasons at which crops are liable to damage from cattle trespass. There is a difficulty also in arranging for the proper inspection of pounds. The practice of placing them under the inspection of Educational officers has been definitely forbidden by Government as tending to interfere with the proper inspection of schools. It is observed that in the Shahabad district the District Board have, with the sanction of the Magistrate, introduced a system of inspection of pounds by the Sub-Inspectors of Police. This is no doubt an important duty of the police, who are bound, under the rules in force, to inspect pounds, to see that food and water are properly supplied, to check the accounts and especially to use their utmost endeavours to prevent the dangers of extortion and fraudulent pounding of cattle. But this function is exercised by the police under the orders of the District Superintendent and Magistrate. The police are entirely independent of, and do not act under the authority of, local bodies. What is needed in the interest of District Boards is the systematic inspection of pounds by some responsible officer on their own behalf. It has lately been observed by the Lieutenant-Governor in this connection that such an inspection ought easily to be arranged without additional expense, and that it should result in an expansion of revenue, "for by an examination of the counterfoils, the inspecting officer could readily ascertain from what distance cattle are usually brought to the pounds, and consequently what room there is for the establishment of new pounds, and he could probably also form a shrewd guess whether the rent realized for the pound was a fair one or not." The management of pounds, in regard to which local bodies have now been vested with ample powers, is a good test of the efficiency of the executive administration of District Boards, and it is therefore specially commended by the Lieutenant-Governor to their attention.

Education.

17. The receipts under Education declined from Rs. 33,996 in 1888-89 to Rs. 30,561 in the year under review. The falling off was chiefly in the districts of Chittagong and Monghyr. In Chittagong the figures show a refund of Rs. 230 on account of excess credits in the preceding year. Taking each item of the receipts separately, there was an increase of Rs. 1,610 in "School fees" and of Rs. 327 in "Contributions," and a decrease of Rs. 5,204 under the head of "Miscellaneous."

Medical.

18. The total income under this head fell from Rs. 10,875 in 1888-89 to Rs. 7,625 in 1889-90.

Ferries.

19. Of the several items which constitute the income under "Civil works," ferry receipts, amounting to Rs. 2,84,164, alone call for notice. Compared with the previous year, there was a falling off of Rs. 1,29,706, but the decrease, like that in the case of pounds, is more fictitious than real. In Nuddea there is a nominal decrease from Rs. 10,834 to Rs. 2,460 in consequence of several ferries having been transferred from the Boards' management to Government. In Bogra there is a decrease from Rs. 9,370 to Rs. 1,410, due principally to the erroneous credit in the previous year of the receipts from Government ferries. A similar reason explains the decrease in Chittagong from Rs. 22,069 to Rs. 10,551, in Patna

from Rs. 21,347 to Rs. 14,154, and in Maldah from Rs. 26,121 to Rs. 963. In Shahabad the receipts decreased from Rs. 15,319 to Rs. 3,929; but as Rs. 19,994 were refunded to Government on account of erroneous credit, a loss of Rs. 16,065 is shown under this head, and is due to a great extent to a change in the system in accounts under which advances which were formerly credited direct are now kept under the head of "Deposits." The amount refunded to Government should properly have been shown under the head of "Refunds." In Mozufferpore there is a decrease of Rs. 6,905 as compared with the preceding year, and also a decrease of Rs. 3,802 as compared with the budget estimate. The first-named decrease is due to the rent for the year 1887-88 originally collected by the Magistrate being transferred to the District Fund in 1888-89, which thus unduly swelled the receipts for that year. The falling off from the estimates is attributed to the "bad state of the ferries made over to the District Board and to short collection of rent owing to the falling off of the grain traffic consequent on the failure of the rice crop in the district during the year 1888-89." The marked decrease in Sarun from Rs. 27,721 to Rs. 4,966 is due to adjustment of accounts. There was a large increase in ferry receipts for the previous year, 1888-89, owing to the orders transferring the ferry receipts not having been communicated until after the close of the year 1887-88. The figures therefore showed the receipts of two years in one. In addition to this, the earnest-money for 1889-90 was included in that year's receipts. Of the districts which show an increase, it is necessary only to explain that the considerable increase in Julpigoree, amounting to Rs. 6,884, is due to the fact that all the ferries in this district have now been transferred by Government to the District Board.

Generally speaking, the Lieutenant-Governor considers that the management of ferries by District Boards has not been unsatisfactory. It is impossible to contend against adverse circumstances such as occurred in Bhagulpore, for instance, where the ferry receipts have fallen off, "owing to the extension of the Tirhoot State Railway much of the traffic to and from North Bhagulpore, formerly carried by the district ferries, being now conveyed across the Ganges by the railway steamers." But in all districts where the approaches to the ferries are kept in good order, and the boats employed in the conveyance of passengers and goods are well looked after, it may be expected that facilities for travelling will be improved, and a gradual increase in income be obtained. When grants were made to District Boards to establish equilibrium between receipts and charges, ferry receipts, amounting to Rs. 2,96,076 per annum, were made over by Government to the Boards; and although no proper comparison can be instituted between this amount and the actuals receipts of the past year, there seems no reason to doubt that there has upon the whole been a perceptible improvement in income. The estimate of local officers for the current year amounts to Rs. 3,55,000.

Contributions.

20. The total amount contributed from Provincial funds to District Boards during the year was Rs. 10,98,148, or Rs. 4,37,799 in excess of the previous year, a result which is chiefly due to late adjustments, the Government grants in many cases for two years, and in some instances for three years, having been drawn by the Boards in the year under report. Special orders have lately been passed to avoid the recurrence of such confusion, and the Accountant-General has been instructed to take action on his own authority to place the fixed annual grants at the disposal of each District Board at the beginning of the financial year. The fixed annual grant made by Government to establish equilibrium between the receipts and charges transferred to the management of District Boards, including charges for stationery and forms, but excluding all other special grants, amounts to Rs. 4,14,915. In addition to this a contract grant was made to District Boards, amounting in the past year to Rs. 2,22,924, for the maintenance of Provincial roads, which, under section 74 of the Act, have been transferred to their charge, and grants of Rs. 1,36,728 and Rs. 37,108 respectively were made to the District Boards of Durbhunga and Mozufferpore for expenditure on relief works.

Debt.

21. The entire amount under this head represents "Deposits and advances." Deposits are sums paid by farmers of pounds and ferries as security for payment of revenue, while advances are sums advanced by the Boards for the execution of works, which

are recovered by adjustment of accounts as the works proceed. In some instances security deposits have been taken from contractors for public works the estimated cost of which was less than Rs. 2,000. Compared with the previous year, there was an increase of Rs. 3,80,539 under both Deposits and Advances. This is chiefly due to the security deposits taken from the farmers of pounds and ferries being credited under this head for the year under report, whereas they were in the previous year credited as pound and ferry collections.

Administration.

22. The cost of general administration has increased from Rs. 2,46,732 in 1888-89 to Rs. 2,58,533 in the year under report. Various reasons have been assigned for the increase, but the chief causes appear to be the transfer of the charges on account of the travelling allowance of members of District Boards from "Miscellaneous" to "Administration" and the increase in the percentage cost of audit and treasury establishments. Considerable sums were also expended during the year in the purchase of furniture for offices of District Boards.

Pensions of Local Fund employés.

23. With the sanction of the Government of India, rules have been laid down declaring the general principles regulating the grant of pensions to employés under local bodies. District Boards are required to pay contribution to pension in case of all pensionable Government officers transferred to their service, and liability for payment of these pensions will then be borne by Government. Special rules have been made applicable to cess establishments entertained by Collectors and sanctioned by the Board of Revenue. It is left for the Boards to make rules which must be sanctioned by the Lieutenant-Governor under section 35 of the Act for employés whose whole service has been under them, and draft model rules have been circulated by Government for the convenience and guidance of Boards in such cases. The Lieutenant-Governor is glad to learn that the promulgation of these rules, which have been long under consideration, has been gratefully acknowledged by the employés on Boards' establishments.

Pounds.

24. The charges on account of cattle-pounds show an increase of Rs. 4,906, which is attributed to the change in the system of accounts, the pay of pound clerks being now charged to "Police" or "Pounds" instead of to "Administration" as in previous years.

Education.

25. Compared with the figures of the previous year, the total expenditure under "Education" shows a decrease of Rs. 26,669. Of the total amount expended, Rs. 1,93,847 represent the cost of inspection, Rs. 2,130. Rs. 72,470, and Rs. 4,06,214 the expenditure on training and special schools, middle schools, and primary schools, respectively, Rs. 2,69,117 the amount of grants-in-aid, Rs. 704 scholarships, and Rs. 59,658 miscellaneous charges. The reports furnished by the Commissioners do not all contain the same information. It is impossible, therefore, to show the statistics regarding schools and scholars in a tabular form. The Lieutenant-Governor, however, notices with satisfaction that the number of primary schools and the expenditure generally on primary education increased during the year. In some districts, notably Midnapore, Howrah, the 24-Pergunnahs, and Moorshedabad, there was a falling off owing to scarcity and floods, but this was more than counterbalanced by the increase in other districts. The number of middle schools slightly declined owing in a great measure to the withdrawal of the grants which had been improperly made in some cases from the allotment for primary education.

26. The Lieutenant-Governor considers it desirable to reproduce in this Resolution the remarks he has already recorded on the educational administration of District Boards when reviewing the annual report of the Director of Public Instruction for the year as follows:—

District Boards as controlling agencies.

The educational functions delegated to the District Boards constituted under Act III (B.C.) of 1885 include the management of Government primary and middle schools, the distribution of the grant-in-aid allotment for middle schools under private management, the administration of the primary grant, the conduct of the annual examinations of primary schools for rewards, and the award of lower primary scholarships. The Boards are also authorized to establish and maintain, with the sanction of Government, schools of technical instruction, and some have already taken up this question with interest and energy. The Technical Institute, for example, established by the District Board of Rungpore, has attained considerable success. With the object of defining more clearly the functions of the Boards and their relations to the officers

of the Department, revised educational rules under the Act were under consideration and public criticism during 1889-80, and finally promulgated by Government on the 18th April last. Experience has already shown the new rules to be greatly superior to the old. They give somewhat larger powers to the District Boards than they had previously enjoyed, while any departure from the existing system, in regard to the administration of funds or the control of schools, is made conditional on the sanction of Government. The power of the Inspector and his position as a controlling officer are more clearly defined. In accordance with the views of Government, Deputy Inspectors of Schools have in nearly every district been appointed ex-officio members, not only of the District Boards, but also of the Education Committees to which these bodies have generally delegated their ordinary executive duties. The advantages of this plan are already apparent, co-operation and efficiency having often taken the place of friction and mismanagement. The Lieutenant-Governor has again the pleasure of observing that the relations between the Boards and the Deputy Inspectors in the majority of districts are eminently satisfactory. Government must look to the good offices of the authorities in the Burdwan and Orissa Divisions, in which differences have arisen, to put things straight as soon as possible. On the other hand, there are indications that in some places the education work of the District Boards has been allowed to lapse too much into the hands of the Chairman or Vice-Chairman in his executive capacity. While the Lieutenant-Governor allows that there is some force in the excuse that it is ordinarily not easy to arouse any enthusiasm for educational work, except on such occasions as present opportunities for the exercise of patronage, he desires that the District Boards, through their Education Committees, may be fully consulted in all matters of principle and importance, and that their functions may not be over-ridden by the executive officers. The Director has, in a very proper spirit, as a friendly critic, drawn attention to some shortcomings in the work of certain District Boards. It is through no fault on their part that their educational operations have in some cases been hampered for want of funds, the income from ferries and pounds not having kept pace with their educational requirements. But they must be held responsible for such matters as great delay in the despatch of business, especially in disposing of reward bills and in making up examination results, irregularities in the method of accounting for public money, misapplication of the primary grant, or failure to spend fully the allotments for primary education. These are matters which the District Boards are quite capable of correcting for themselves. It is not a matter for surprise that their control and management of middle schools of various classes is less efficient than when the work was performed by high officers of the Education Department. Sir Alfred Croft rightly observes that this decline in efficiency is part of the necessary price paid for Local Self-Government. The policy of entrusting District Boards with certain educational work, in which the Department has given them its steady support, has been deliberately adopted for reasons which have often been stated, and improvement can only be obtained by perseverance. The transfer of large educational powers to Local, as distinguished from District, Boards appears to have been prematurely attempted in some places.

Special schools.

27. The following information regarding special schools is furnished. In Hooghly there are 56 Sanskrit toles with 268 students. In Bankoora mention is made of six advanced Arabic or Persian schools with 102 and of 33 Sanskrit toles with 331 pupils. In Rungpore the Bayley Technical School is maintained by the District Board. In Backergunge it is in contemplation to start a technical school for teaching carpentry, &c., at the head-quarters of the district. The Board have also voted two scholarships of Rs. 10 each, tenable in the Seebpore Engineering College. In Mymensing, one of the zemindars is said to have offered Rs. 10,000 for opening a technical school in addition to an annual contribution to be made for its maintenance by the District Board, and the matter is under consideration. The Tipperah Board has founded two scholarships of Rs. 15 each, tenable at the technical branch of the Seebpore Engineering College, and these have been awarded to two natives of the district now pursuing their studies in that college on their contracting to serve under the District Board after the completion of their college career. The Chairman further reports that an attempt is being made to establish an artizan school in Comillah under the auspices of the District Board. The Noakholly Board have offered a scholarship of Rs. 10 at the same college, tenable for five years, but apparently no applications have been made for it. It is satisfactory to see from these reports that District Boards have begun to recognise the desirability of encouraging technical education.

Female Medical Education.

28. The question of providing means for the encouragement of female medical education continued to receive the attention of District Boards. The medical scholarship of Rs. 10 a month offered by the Midnapore District Board was awarded to Sarat Kumari Mittra, a female student of the Campbell Medical School at Calcutta, and she has drawn the stipend since April

1889. The Superintendent of the School speaks favourably of the progress made by her. In Burdwan a sum of Rs. 20 per mensem was set apart for a similar scholarship, and in Bankoora the Board sanctioned the award of a scholarship of Rs. 8 to any female candidate of that district who would be willing to prosecute her studies in any medical school or college, but it appears that no one came forward to take advantage of these offers. The District Board of the 24-Pergunnahs have sanctioned the grant of scholarships of Rs. 5 each a month for two years to two female students of the Campbell Medical School—Srimati Kiron Sasi Mukherjea and Srimati Susila Debi—with effect from the 1st February 1890. Funds were provided by almost all the District Boards in the Rajshahye Division, but no advantage was taken of the opportunities offered. In Rungpore only a scholarship of Rs. 15 per month has been awarded to one Srimati Kailas Bashini Dasi, a student of the Calcutta Female Medical School, who has agreed to practise in the district when qualified. The only district in the Dacca Division where stipends or scholarships were sanctioned by the District Board is Backergunge, where two girls of Brahmo parentage were awarded scholarships of Rs. 10 a month each, tenable in the Campbell Medical School. The District Board, Mymensingh, has, with a view to encourage female medical education, created five appointments of trained nurses under the five Local Boards with a monthly salary or retaining fee of Rs. 25 each. Both Chittagong and Tipperah report that attempts were made to get female students to go to Calcutta for medical education, but no one would come forward. The offer made by the Tipperah Board was for two scholarships of Rs. 15 each, tenable at the Scaldah Campbell Medical School. The Chairman of Tipperah reports that subscriptions are being collected to form an endowment for the establishment of a lady doctor in Comillah, and it is hoped, if this is successful, that it will induce female students to qualify for service in this special branch. In Gya a system of stipends and scholarships for a supply of female native doctors and of trained nurses has been organized during the year, consisting of a midwife, four paid female apprentices, and one mehterani. The monthly expenditure on account of pay of this staff amounts to Rs. 49. The total amount of expenditure incurred during the year, including pay, contingencies, and cost of furniture, &c., was Rs. 1,514-1-9. For the encouragement of female medical candidates who attend the Cuttack Medical School the Cuttack District Board has contributed Rs. 100, to be paid as scholarship to the most deserving female student.

The Lieutenant-Governor has perused this record of the measures adopted by District Boards with much satisfaction, and although the results are not as encouraging as might have been expected, he trusts that the Boards will continue to persevere in this good work, and that the time will come when the fullest advantage will be taken of the opportunities offered to female medical students.

Medical.

29. The total medical expenditure amounts to Rs. 42,546, and shows an increase of Rs. 16,771 compared with the previous year. The outlay on hospitals and dispensaries amounts to Rs. 30,430, and on sanitation to Rs. 8,756 only.

The following statement shows the number of dispensaries maintained by the District Boards and the expenditure incurred during the year:—

District Boards.	Names of dispensaries.	Cost of maintenance.	Remarks.
		Rs.	
Burdwan ...	Mankar ...	472	Government gave a grant of Rs. 150 as half the pay of the Civil Hospital Assistant in charge. The Board also realised Rs. 206 as private subscriptions.
Hooghly ...	Bundipore ...	390	For nine months only. The Board severed its connection with the dispensary on 1st January 1890.
Jessore ...	Jhenidah ...	933	
	Magurah ...		
Khoolna ...	Bagirhat ...	542	
Dinagepore ...	Thakurgaon ...	751	
Bogra ...	Dupchanchea ...	480	
	Burigunge ...	474	
	Joypore ...	450	

District Boards.	Names of dispensaries.	Cost of maintenance.	Remarks.
		Rs.	
Tipperah ...	Chandpore ...	830	
Gya ...	Jehanabad ...	616	Includes the cost of repairing dispensary buildings and cost of vaccination.
	Aurungabad ...	1,044	
	Nowadah ...	536	
	Arwal ...	.....	Established in 1889-90, but no expenditure incurred during the year.
Sarun ...	Mushruk ...	796	
	Digwarah ...	643	
	Maharajgunge .	1,061	
	Darowli ..	1,078	
Bhagulpore ...	Banka ...	1,601	These figures do not tally with those entered in the annual return.
	Mudehpura ...	670	
	Soopool ...	546	
	Protabgunge ...	780	
	Shahpur ..	303	
Purneah ...	Basantpur ...	471	
Pooree ...	Khoorda ..	610	
Balasore ...	Bhuddruck ...	2,208	

Besides the above expenditure, many of the District Boards contributed towards the support of medical institutions which were not under their direct management, and in some instances money was spent in affording medical relief during epidemics. The Burdwan District Board paid Rs. 600 to the support of the municipal dispensary in the town of Burdwan and the Bankoora Board Rs. 1,000 for the maintenance of the dispensary at Bankoora. The Beerbhoom District Board expended Rs. 1,471 in maintaining the Soory Charitable Dispensary for the first ten months, and half the net cost for the remaining two months of the year. This Board also contributed Rs. 360 to the Rampur Hât Dispensary. The Midnapore District Board gave a total sum of Rs. 942 in aid of nine dispensaries in that district. The Nuddea District Board gave Rs. 100 in aid of the Krishnaghur Charitable Dispensary. The District Board of Rungpore gave a quarterly subsidy of Rs. 75 to each of the three dispensaries of Kurigram, Gaibanda, and Nelphamari in that district. The District Board of Pubna gave a contribution of Rs. 250 towards increasing the accommodation of the Serajgunge charitable dispensary. In Dacca the District Board made a grant of Rs. 60 to the dispensary at Manickgunge. In Backergunge a sum of Rs. 1,200 was paid to the Barisal Municipality for the maintenance of the charitable dispensary. In Mymensingh the payment of Rs. 60 per annum to the Nasirabad Municipality was continued during the year. The Tipperah District Board contributed Rs. 150 and Rs. 600 respectively to the Hajigunge and Comillah Dispensaries. The Chittagong Board has arranged to engage a lady doctor, in connection with the Chittagong Municipal Hospital, to attend all female patients free of charge. The Shahabad District Board gave Rs. 275 towards the support of the Nasirgunge Dispensary. The District Boards of Patna, Shahabad, and Sarun spent Rs. 4,723 on sanitation and medical relief. A monthly contribution of Rs. 130 and Rs. 50 was paid by the Monghyr District Board to the dispensaries situated at the head-quarters of the district and the sub-division of Begusarai. The Maldah District Board paid a subscription of Rs. 75 a month to a class IIIB dispensary opened in February last at Mathurapur by Mr. G. Hennessy.

30. Form IV appended to this Resolution contains particulars regarding sanitary works undertaken by District Boards during the year it is stated that in Jessore Rs. 10,000, in Burdwan Rs. 5,000, in the 24-Pergunnahs Rs. 2,000, and in Khulna Rs. 2,000 were allotted for the supply of pure drinking water, but that nothing was spent. The Chairman of the 24-Pergunnahs District Board observes :—

Sanitation.

"The question of water-supply is involved in difficulty. The want of good water is felt all over the country, and applications for the excavation or re-excavation of tanks are made to the District Board from time to time, but the Board find it difficult to comply with such applications. The selection of a few solitary villages for such improvement would appear invidious and might excite discontent in parts of the district which were not selected. Moreover, if a tank were cleared or re-excavated, it would seldom be possible

to secure its preservation or to guard it effectively from all external impurities. A provision of Rs. 2,000 was made in the budget for the last three years, but the amount was not expended, as no scheme of water-supply could be devised which would admit of being carried out with such a small grant."

The explanation given in other districts is of a similar character. The total expenditure incurred under this head in the whole of Bengal was only Rs. 8,756 on account of sanitary arrangements at fairs, and in some places in the excavation of wells and tanks. The result is no doubt of a very unsatisfactory character; but as was pointed out in last year's Resolution without the appointment of local agencies specially entrusted with matters relating to village sanitation and empowered to raise the necessary funds, very little improvement can be expected in this direction. A special report in which this question has been fully discussed has been submitted to the Government of India, and the whole question is now under the consideration of that Government.

Miscellaneous.

31. The expenditure under this head is necessarily of a fluctuating character. An additional charge incurred during the year was the cost on account of the general elections. In some districts this charge has been shown under "Administration," whereas it should have come under "Miscellaneous." The necessary transfers should be made when the accounts are audited and adjusted. The expenditure on account of staging bungalows and serais increased from Rs. 12,840 in 1888-89 to Rs. 14,615 in the year under report. There was also an increase of Rs. 116 in the amount of rewards granted for the destruction of wild animals. The district in which the largest amount of rewards was granted was Rungpore, where, it is said, the District Board paid Rs. 484 for the destruction of 15 tigers, 50 leopards, and 12 cubs.

Famine relief.

32. The total expenditure shown under the head of famine relief amounts to Rs. 2,59,785, the greater part of which was incurred in the districts of Durbhunga (Rs. 1,69,065) and Mozufferpore (Rs. 74,289). The whole outlay was on public works.

With a view to the equitable adjustment of the contribution to be made by Government and the District Boards respectively towards the famine relief expenditure in the affected areas of the Patna Division, it was decided in August 1889 to divide the expenditure into three classes, viz.—

Class I.—Ordinary district works which the District Boards would in any ordinary year have carried out in the affected area, and for which therefore they made no claim on Government for reimbursement.

Class II.—District works undertaken by the Boards as measures of relief, and to be paid for by them.

Class III.—Other relief works, whether carried out by the District Boards or by Government, the cost of which the Districts Boards were unable to bear, and gratuitous relief.

This division recognised distinctly the principle which has been laid down, that the duty of providing relief in the way of work must fall in the first place on local funds before provincial funds can be applied, and that Government should come to the assistance of District Boards only when the expenditure is heavier than they can reasonably be expected to bear consistently with their duties in the non-affected areas the maintenance and repairs of the ordinary district communications and the pay of the permanent establishments.

Under section 99 of the Local Self-Government Act III (B.C.) of 1885, District Boards are empowered to incur expenditure on measures for the relief of famine within such financial limits as may be prescribed by the Commissioner of the Division concerned, and the Bengal Famine Code provides that in districts to which this section of the Act has been extended, relief operations should be governed by rules to be issued under section 138. The provisions of section 99 of the Act have now been extended to all the District Boards of the Province, and rules under section 138 have been prepared and issued for their guidance.

Civil works.

33. The expenditure under the head of "Civil works in charge of Public Works officers" increased by Rs. 2,66,678. It must be explained that the expression Public Works officer does not mean an officer in the Public Works Department of Government, and that the whole of the Civil works referred to were undertaken by Engineers in

the employment of District Boards. The expression is used in the prescribed form of accounts in order to show separately the expenditure on Public Works proper from that incurred on account of ferry establishments, contingencies and refunds, which are considered to be in charge of Civil officers, and amounted in the past year to Rs. 1,10,162. The following statement compares the Public Works expenditure for the past three years:—

Year.	Original works.	Repairs.	Establishment.	Tools and plant.	Water-supply and water-works.	Drainage works.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1887-88	10,72,715	16,04,900	5,20,594	30,225	4,534	.....	32,32,968
1888-89	11,15,614	17,88,953	5,27,598	27,115	6,261	.....	34,65,541
1889-90	11,71,942	19,43,732	5,57,345	32,893	20,960	5,347	37,32,219

Out of a total outlay of Rs. 37,32,219, no less than Rs. 2,22,924 was defrayed from grants paid to the District Boards from Provincial Revenues as a contract allowance for the maintenance of provincial roads, the charge of which has by arrangement been transferred from the Public Works Department of Government to local bodies. The remainder, or Rs. 35,09,295, represents the expenditure incurred from road cess funds. This amount during the past year was exceptionally large, as a considerable outlay was debited in several districts to Civil works which might more properly have been charged against Famine Relief. A sum of Rs. 10,785 in the Bhagulpore district, of Rs. 6,445 in the 24-Pergunnahs' and of Rs. 2,000 in Purneah appears to have been so debited. But the line which separates these heads of account is too slight to render it necessary to order any adjustment. The Lieutenant-Governor regrets that the information furnished is insufficient to enable a comparative statement to be prepared showing the length of roads maintained by District Boards, metalled and unmetalled, and their cost per mile. Separate orders will issue on this point, prescribing a form of statement for adoption in future years.

In the districts marginally noted a considerable expenditure was incurred on original works. The most important of these was the construction of the new Tangail road from Phulbariah to Kalihati, 26 miles in length, on which the District Board of Mymensingh spent no less than Rs. 63,000. As a rule the expenditure on original works is largest in the Patna Division and smallest in the Presidency, where the most striking feature of the figures is the small proportion of funds spent on original works compared with that spent on maintenance and establishment. Repairs were of the usual character, and do not call for remarks. The Provincial roads transferred to the management of District Boards were on the whole maintained in good condition.

	Expenditure incurred on original works during the year.
	Rs.
Midnapore ...	31,814
Dinagepore ...	40,803
Rungpore ...	60,806
Julpigoree ...	59,422
Dacca ...	35,400
Furreedpore ...	27,216
Backergunge ...	53,366
Mymensing ...	1,63,639

Patna ...	96,253
Gya ...	57,154
Durbhunga ...	65,392
Mozufferpore ...	52,368
Sarun ...	62,289

Village roads.

34. The total amount expended by District Boards (except Mozufferpore, for which no figures have been furnished) on the construction and repair of village roads during the year was Rs. 3,68,952. In the case of Burdwan it is explained that the whole of the grant remained unexpended because money had been misspent in past years, and it was therefore thought advisable to defer spending any money on village roads until a system of proper management and supervision could be devised. This explanation cannot, however, be accepted as satisfactory. The views of the Lieutenant-Governor on this subject were fully expressed in last year's Resolution. District Engineers have recently been authorised by an amended rule to look after the working of the road establishments employed under Local Boards; and although it is true that under a lax system the expenditure on village roads by Local Boards is liable to abuse, there ought to be no difficulty in checking any misuse of the funds allotted for this purpose if the roads are properly scheduled and subjected to professional scrutiny.

Railway feeders.

35. The railway feeder from Haripal to Bhanderbatti, a distance of about six miles in the district of Hooghly, was under construction during the year, and will, it is expected, be soon thrown open to traffic. Another feeder, about two miles in length, from the Grand Trunk Road to the railway station at Galsee, in the Burdwan district, was sanctioned, but owing to delay in land acquisition the work was not commenced.

In Nuddea a small feeder from the Majergram railway station to Majergram village was constructed during the year.

The important feeder road from Gaibanda in the Rungpore district to Hilli station, Northern Bengal State Railway, in the Dinagepore district, was improved by the District Boards of Dinagepore, Bogra, and Rungpore.

In Dacca a railway feeder road connecting the Sripore station with Goshinga, an important market on the Lakhye river, was continued, the outlay amounting to Rs. 2,488. Rajah Rajendra Narain Rai Bahadur, of Bhowal, has given free of cost as much of his land as is required for the road.

The Monghyr District Board undertook during the last year the metalling of the following railway feeder roads:—

(1) Dhararah to Lahota Road, which forms a feeder of the East Indian Railway Station at Dhararah.
(2) Beguserai to Garrah Road, which forms a feeder to the Tirhoot State Railway.
(3) A portion of the Patna Road between Indupore and Burhea Railway Station, which will be a continuation of the Burhea feeder road.

In the district of Bhagulpore an important railway feeder was constructed to join the Rughoopur Station on the Tirhoot State Railway with Simrahi and Panchpararia near the Nepal frontier. The road from Madhepura to Rughoopur is being bridged, and this will bring the sub-divisional head-quarters within 25 miles of the Rughoopur Station.

Tramways.

37. Several proposals for the construction of tramways came under the consideration of District Boards during the year, but no work was actually undertaken. The Howrah-Ampta and Howrah-Sheeakhalla schemes which are intended to facilitate communication between the districts of Howrah and Hooghly, are now under consideration in the Public Works Department. The Dooars Tramway line, for which the Julpigoree District Board has guaranteed Rs. 4,000 annually until the scheme returns 6 per cent. profit, has been undertaken by Messrs. Octavius Steel and Company. Negotiations were opened by the District Board of Patna with certain engineering firms for the construction of a steam tramway on the line of road between Bukhtearpore and Behar. The construction of steam tramways on the Gaya-Nowada Road in the Gaya district and on the Ganges and Darjeeling Road between Purneah and Kissengunge are also under consideration.

Water communications.

39. In many districts expenditure is incurred in the maintenance of water communications as well as roads; but the small items on which money was spent are not of sufficient importance to enumerate in detail.

Steam river service.

38. The following particulars are recorded regarding the services of steam river communications which were either subsidised or undertaken by District Boards during the year.

The steamer service between Rampore Beauleah and Damukdea has been made a daily one, and the Rajshahye District Board increased the subsidy from Rs. 2,400 to Rs. 4,800 per year. A daily steamer service between Pubna and Kushtea was again established from the middle of June, the Pubna District Board paying a subsidy of Rs. 5,200 per year towards its maintenance. The steam ferry between Naraingunge and Munshigunge was taken over from the Traffic Department of the Eastern Bengal State Railway and managed by the District Board. The ferry was worked at a loss of Rs. 1,284, but it was of great benefit to the public. In Backergunge the daily steamer service between Barisal and Khulna was continued, and was of great advantage to the district throughout the year. The Board paid the usual subsidy of Rs. 500 per mensem, minus certain deductions for late arrivals.

The District Board of Noakholly pays a monthly subsidy of Rs. 200 for a bi-weekly steam service with Barrisal. The Tipperah Board has secured the establishment of a daily steamer service between Gouripura and Naraingunge *viâ* Satnal, a station on the Goalundo-Naraingunge line. During three months of the year the want of water prevents the steamer proceeding further than Dandkundi, 32 miles by road from Comillah, but two boats are engaged at a monthly cost of Rs. 30 to run between Elliotgunge, 21 miles from Comillah, and the steamer station. A similar boat arrangement has been made at the same cost between Muradnagar and the steamer station. The Board pay a monthly subsidy of Rs. 200 to Messrs. Kilburn and Company for the steam service, and receive Rs. 100 from the Postal Department for the carriage of mails between Daudkandy and Satnal. The Board also subsidised a steam service at Rs. 225 a month between Chandpore and Chandipore, but the company which undertook the work closed it after a short trial, apparently finding it unprofitable.

The Chairman of the Maldah District Board writes:—

"Early in July through communication by water was established with Rajmehal, and a steamer ran to and fro on alternate days, the distance *viâ* the Kalindri being about 60 miles. This service was furnished by Baboo Nilmoney Chowdhuri. Later on in August the ferry steamer *Jack*, which had been put on the ferry at Rajmehal by the farmer, Baboo Seo Sahai Singh, was allowed to continue the crossing to Inaitpore and Sadullapore *viâ* the Bhagirathi, as the whole country was under water. Sadullapore is about five miles west of English Bazar, and the steamer ran in and out in one day. To Nilmoney Chowdhuri a subsidy of Rs. 400 a month was paid, but no payment was made to the ferry farmer for the trip to Sadullapore. The steamer between English Bazar and Rampore Beauleah made three trips in the week from August 1889 to March 1890, and also received a subsidy of Rs. 400 a month from 1st October 1889. At first Nilmoney Chowdhuri tried to run this line, but his steamers were too small, and ran so irregularly that no subsidy was granted. In October the India General Steam Navigation Company sent up a splendid steamer, called the *Pirih*, which ran till the river subsided in November. The service, however, was kept up till March by a smaller vessel, and a subsidy of Rs. 400 a month was granted. Since June this year a fine steamer, called the *Trout*, has been plying regularly on alternate days. She is timed on Saturdays to catch the mail boat from Beauleah to Sara, thus enabling Maldah passengers to reach Calcutta next morning."

The Lieutenant-Governor has no doubt that the expenditure incurred by District Boards in establishing or subsidising a river steam service is most judicious and has greatly improved communications.

Establishments.

39. The average percentage of cost of establishment on the total outlay on public works during the year was 16·4. The highest percentage was in Chittagong and the lowest in Mymensingh, the figures being 28·4 and 9·1 respectively.

The establishments are reported to have worked satisfactorily during the year.

Loans.

40. No loans were contracted during the year under report, but the Lieutenant-Governor has agreed to grant a loan of two lakhs to the District Board of Dinagepore and Rs. 25,000 to the Julpigoree Board for the construction of bridges on district roads, and since the close of the year has signified his intention to sanction a loan of Rs. 80,000 to the Patna District Board to complete the construction of bridges on the roads from Buktearpore to Behar and from Mosourhi to Tabhera. The restriction referred to in last year's resolution, regarding the class of works for which Boards are empowered to borrow from the Local Government, has now been removed by the Government of India, and the Lieutenant-Governor hopes that District Boards will not hesitate to apply to Government for loans on account of well-considered schemes for the permanent improvement of the communications and general sanitary condition of their districts.

General Remarks.

41. The following are the observations recorded by the Commissioners in their reports on the working of District and Local Boards during the year.

Mr. Toynbee, the Officiating Commissioner of Burdwan writes:—

"On the whole, I am of opinion that both the District and Local Boards have done good work during the year. Now that complete sets of rules have been framed, and the routine work has begun to settle down into a grove, I think that the next step to be taken is to gradually withdraw the appointment of official Chairman. I would not at first allow the members of District Boards to elect their own Chairman, but they might nominate them, and

the District Magistrates in forwarding the nomination might report fully on the business and other qualifications of the nominees. The experiment might for the present be tried in Hooghly and Burdwan. If successful, it should be afterwards extended to other districts in this division. In making this recommendation, I do so on the assumption that the principles of local self-government have been finally accepted as the policy of the future, and that every possible step to that end is to be taken which is consistent with caution and a due regard for the interests of the general public."

Mr. Smith, the Commissioner of the Presidency Division, states:—

"The District Boards have, on the whole, worked smoothly and successfully during the year. The members generally have evinced much interest in the proceedings. The average attendance has been generally a little under half, and has in no case been quite half the number. The average is bad in Jessore, where it was but 30·64 per cent. The largest number of meetings was 13 in the 24-Pergunnahs, and the smallest, 6 in Jessore. In considering these points, however, the great distances from which many of the members have to come must not be overlooked, and I do not think the result is on the whole unsatisfactory, though I should be glad to see improvement, especially in Jessore."

Mr. Lowis, the Commissioner of the Rajshahye Division, says:—

"The District Boards on the whole have worked well, but depend a good deal on the official Chairmen. This is less the case in Pubna, where both District and Local Boards show rather more independence."

Mr. Power, the Officiating Commissioner of the Dacca Division, gives the opinion of Mr. Hare, the Chairman of the Dacca District Board, that "the Act has worked without difficulty;" and quotes the remarks of Mr. Savage, the Chairman of the Backergunge District Board, as follows:—

"The several Boards in the district have done good work, and the members have taken a great deal of interest in the transaction of business brought before them. The Local Boards have been able to open out village roads without having to acquire any land for the purpose, and the intercommunications have been much improved. There has been harmony among the members of the Board, and on the whole I am able to report that Local Self-Government tends to be a success in this district."

Mr. Power briefly records his own opinion in the following words:—

"On the whole the year was one of fair progress."

Mr. Lyall, the Commissioner of Chittagong, makes the following report:—

"The Inspector of Local Works detected the second clerk of the Chittagong Board in malpractices in connection with contracts, but the majority of the Board refused to punish him or take any notice of his conduct. In fact the majority made a personal in place of a public matter of it. Such cases must, I fear, occur at times, and there is no remedy. The more prompt settlement of advances requires attention in this district. The money has been properly spent, but the members who supervise the works are slow in rendering accounts.

"In Noakholly the accounts require attention. They were found very carelessly kept at time of audit. The Chairman ascribes the errors to change of staff. Good work was, however, done in the district. The present Chairman has fully grasped the wants of the district, and considerable improvement may be effected next year.

"The Tipperah Board have taken great interest in their work, and are devoting their attention to improvements in a sanitary direction, and to the provision of increased medical aid in outlying parts.

"The Board have reduced their expenditure on middle schools, but this is a point on which all District Boards require watching, else money which should be spent on roads and communications will be spent on education.

Mr. Kemble, Officiating Commissioner of Patna, writes:—

"All the district officers have expressed an opinion that the members of the District Boards have worked satisfactorily on the whole and in harmony with the executive. Much interest is said to have been manifested by all the members of the Boards in all the districts except Chumparun, in respect to which Mr. Blyth writes:—

"'The general working of the District Board during the year may be regarded as satisfactory, but all the members did not take that amount of interest which might be expected, and the submission of the monthly accounts was often delayed in consequence of their not being regularly audited by the Finance Committee for the want of the attendance of a sufficient number of members to form a quorum.'

"All the District Boards have Standing Committees for the disposal of business. In Patna, Mozufferpore, and Durbhanga especially the members of these Committees are said to have rendered great help to the Boards in auditing accounts, supervising the plans and estimates of the District Engineer, looking after schools, and generally in disposing of the matters laid before them.

"The Local Boards as a rule are said to take but little interest in their work. From Shahabad Mr. Bernard reports that these bodies fail to do full justice to the matters transferred and to the funds allotted to them, some of them leaving large sums unexpended under some heads, especially Sanitation.

"In the Patna district it is reported that the Sudder Local Board showed the greatest amount of activity, and its efforts were in all directions uniformly successful. The other Local Boards did not work well.

"The Local Boards in Mozufferpore held a very few meetings, and the Mozufferpore Local Board is particularly mentioned as being in a distinctly inefficient condition.

"In Durbhanga it is reported that the Somastipur Local Board is energetic, but the Durbhanga and Madhubani Local Boards are much less so.

"I am glad to note that the Magistrate and Collectors bear testimony to the good work done by their Boards. The good work is, however, more of a consultative than an executive nature. In every district one or two men, Native or European, take an interest in one or more special subjects, but few (if any) have time or inclination to look into the working of the Board as a whole, or to control its finances and to enquire into its general efficiency. The consequence is that, as the Chairman is overworked, too much is left to the Secretary. The accounts, especially those of the Local Boards as shown by the reports of the Examiner, are ill-kept and inadequately supervised."

Mr. Quinn, the Officiating Commissioner of Bhagulpore, states:—

"Having only joined the Division in the middle of March, I have but little personal knowledge of the working of the several local bodies during the past year; but it may be gathered from the general tenor of the district reports and statements that the District and Local Boards have on the whole discharged the duties entrusted to them in a satisfactory manner, and that fair progress has been made in the execution of the works under their control. In the Purneah district there was for some time considerable friction between the native members of the District Board and the Engineer, but these differences have been arranged, and here, as in the other districts of the division, harmony generally prevails. There is still of course ample scope for improvement, and among other defects a tendency has been noticed to leave too much of the business of the district body to standing committees, whose conclusions and recommendations are sometimes adopted without due consideration. There is also a disposition in some cases to increase the expenditure on establishments to an unnecessary extent. An instance of this occurred during the past year, when a District Board persisted in raising the pay of some members of their own office establishment and that of the District Engineer on the recommendation of the Finance Committee, though the increase was held to be quite unnecessary by the Commissioner and Inspector of Works, and as regards the District Engineer's establishment was not recommended by that officer himself. In the case in question, I have informed the Board that the total cost of these establishments is already high, and that no increase of the aggregate charges on account of them will be sanctioned in future years in the absence of very convincing reasons. I trust that this declaration may check the further enhancement of individual salaries.

"The Boards have bestowed considerable attention on education, and there has been a general increase in the number both of schools and scholars, including primary schools, of which the Boards are, I think, entitled to share the credit. The relations between the Boards and the Education Department have also been harmonious; but the Inspector complains of delay in the transaction of business, and specially in passing bills, which he attributes to the delegation of executive work of this kind that can be properly performed by the Chairman or Vice-Chairman to Education and Finance Committees which only meet at intervals. There appears to be need of reform in this respect, in effecting which I have expressed my willingness to give any aid in my power."

Mr. Worsley, the Commissioner of Orissa, says:—

"The Local Self-Government Act has been in operation for a comparatively short time, and the system has not had time to develop fully in all departments. Generally speaking, the administration has been satisfactory. In Cuttack, many of the members of the Boards did not take much interest in their work, and the Magistrate and Chairman of the District Board regrets that the work is carried on more as that of a special department of the Magistrate and Collector than as an independent institution as it should be. The Chairman of the Pooree District Board complains that he finds it very difficult to get the monthly accounts audited by the Financial Sub-Committee. This district shows the best results under the heads of "Roads" and "Education." In spite of the prevalence of cholera in the early part of the year, there has been an increase in the number of primary schools and scholars, while the amount expended on village roads shows a marked increase over the allotment of the preceding year. In Balasore the administration was generally successful. The following are the remarks of the Chairman under this head:—

"The general working of all the Boards has been on the whole satisfactory. There has been little or no inclination to faction or obstruction. Private members, perhaps, come less to the fore than at first, but, as a counterpoise to this, they seem more ready to subordinate their own crotchets to the public good. I am not equally satisfied with the system under which all the roads, pounds, and elementary education were devolved on the Local Boards. This is probably the best course as regards outlying sub-divisions, but in the Sudder it results in a great want of local supervision by those with whom the responsibility nominally rests. Neither the Chairman of the Sudder Local Board nor the Vice-Chairman can ever find time to visit places lying more than a few miles from head-quarters. Roads certainly, and probably pounds and schools, would have been better looked after if the District Board had been less lavish in parting with its authority."

42. The Lieutenant-Governor's opinion of the working of District Boards in Bengal was fully stated in last year's Resolution, and the events of the past year merely confirm the views then expressed. Their dilatoriness in dealing with accounts and bills is remarked on by several officers, and another blemish noticeable is the occasional tendency of certain Boards towards factious criticism of, and opposition to, professional authority. The Commissioner of Burdwan writes:—"The Inspector of Local Works is always willing to help and advise the District Boards, and his action in this respect is, I think, appreciated by them all except Burdwan, which seems to resent all interference as an unnecessary and covert attack upon their independence." The Fureedpore District Board is said to have given way to a spirit of "ungenerous criticism against the Engineer, an excellent officer, who ought to have been encouraged rather than thwarted." In the Purneah Board there was extreme friction at one time between the members and their District Engineer, and the interposition of Government was necessary before healthy relations could be restored. Such cases must be characterised as blots. If the members of a District Board cannot always agree with their responsible executive advisers, they should at least be willing to credit them with a single-minded desire to advance the condition of the district. But generally speaking Sir Steuart Bayley can say that the record of the year has been a very favourable one. Good work has again been done and all departments show a satisfactory expansion of administration. When many have done so well, it is perhaps invidious to mention names; but the Lieutenant-Governor observes with pleasure the high commendation bestowed on Rai Nolinaksha Bose of Burdwan, Baboo Lolit Mohun Singh of Hooghly, Baboo Brojo Gopal Bagchi of Rajshahye, and Mr. Syed Sharafudeen of Patna, who are all non-official Vice-Chairmen of their District Boards. The Lieutenant-Governor acknowledges also the valuable service rendered by district officers in their capacity as Chairmen of the Boards. It is no small tribute to the ability of these officers as a body that they should have given effect to the policy of Local Self-Government in these Provinces so efficiently and at the same time with so little friction.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Secretary to the Government of Bengal.

APPENDICES.

FORM No. I.

Statement showing the constitution of Local Boards in Bengal during the year ending 31st March 1890.

Serial No.	Name of Local Board.	Act under which constituted.	Area in square miles.	Population within the area.	Number of members.								Number of meetings held.	Average attendance at each meeting.		
					Ex-officio.	Nominated.	Elected.	Total.	Officials.	Non-officials.	Europeans and Eurasians.	Natives.		Officials.	Non-officials.	Total.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE HOWRAH BRIDGE FOR THE YEAR ENDING ON THE 31ST MARCH 1890.

No. 3219Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

RESOLUTION.

Dated Calcutta, the 29th November 1890.

READ—

Administration Report of the Howrah Bridge for the year ending on the 31st March 1890:

Read again—

Public Works (Marine) Proceedings (A.) for January 1890, Nos. 1 to 3, being the Administration Report of the Howrah Bridge for 1888-89, together with the Resolution recorded thereon.

The actual receipts and expenditure of the Bridge during the year under review, as compared with those of the previous nine years, are shown in the subjoined statement:—

PARTICULARS.	1889-90.	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.	1883-84.	1882-83.	1881-82.	1880-81.

Total ...	1,41,771	2,04,241	1,52,607	1,87,021	2,14,926	1,90,346	1,91,721	1,94,545	2,34,152	2,00,019
Net revenue ..	27,055	60,475	3,07,662	4,11,235	3,15,087	2,70,070	3,44,974	2,91,136	2,20,475	1,93,722
GRAND TOTAL ...	1,68,826	2,64,716	4,60,269	5,98,256	5,30,012	4,60,416	5,36,695	4,85,681	4,54,627	3,93,741

2. The Committee appointed by the Government in January 1888 to consider the revised scale of tolls and fees which should be levied after the Bridge debt had been paid off, estimated that the annual income of the Bridge, after the abolition of the local tolls and the exemption of rice, grain, pulses, seeds and salt from the payment of the terminal charge, would amount to Rs. 1,57,597. The result of the year, which was the first complete year in which the abolition of the local tolls and the terminal charge on the staples of traffic mentioned had effect, shows that the actual receipts exceeded the estimate of the Committee by Rs. 11,229.

3. The net revenue of the year under review amounted to Rs. 27,055, making with the net revenue of previous years a total net revenue of Rs. 34,27,558.

The following statement shows how this amount has been appropriated:—

	To end of 1888-89.	In 1889-90.	Total
	Rs.	Rs.	Rs.
Sinking Fund paid to Government on the Bridge debt	22,41,800	.....	22,41,800
Proportion of Sinking Fund on consolidated loan due to Government for Head Office and officers' quarters paid to Government ...	10,933	1,093	12,026
Proportion of Sinking Fund on debenture loans set aside with the Trustees of the Commissioners' Debenture Loan Account ...	14,096	2,152	16,248
Reserve Fund	7,71,978	..	7,71,978
Pontoon Renewal Fund	.....	48,246	48,246
Contribution for the following new works as detailed in Report for 1884-85:—			
Flat *Howrah*	20 000		
Reserve Section	8,000		
Tug-steamer *Hetty*	1,36,642		
Ferry-steamer *Buckland*	1,23,374		
Police quarters	16,573		
Office machinery and tools for workshop ...	13,321		
Gearing for drawbridge	891		
Two iron buoy boats for floating fenders ...	2,424	.....	3,20,225
	33,59,032	51,491	34,10,523
Balance ...	.....	.....	17,035
Total ...	.....	.....	34,27,558

4. The Bridge was kept in good order during the year, and the sum of Rs. 48,246 was set aside for expenditure when necessary hereafter in renewing the pontoons.

5. During the year the Commissioners were in communication with the Corporation of Calcutta on the subject of the loan of Rs. 2,00,000 from the Bridge reserve fund to be applied towards meeting the interest on the capital expended on the new Central Road leading from the Bridge to Sealdah. The money had, however, not been paid to the Corporation when the year closed.

6. The Bridge was opened for the passage of vessels on 138 occasions, including 34 special Sunday openings. The following statement shows the number and description of vessels which passed through the opening.—

	1889-90.	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.	1883-84.	1882-83.
Sea-going vessels	362	380	331	295	366	403	409	442
Inland steamers and flats	941	878	899	818	1,102	944	733	664
Steam tugs	491	456	397	387	406	342	381	409
Port Commissioners' vessels ...	53	20	46	56	69	56	58	42
Government steamers and flats ...	16	7	6	10	6	10	.....	.. ..
Total ...	1,863	1,741	1,679	1,596	1,949	1,755	1,621	1,557

7. No sea-going vessels collided with the Bridge in passing through the opening, but there were 115 collisions of other vessels, as compared with 91 and 63 during the previous two years. The increase is attributed to the exceptionally strong freshets and eddies of the year under review. Of the 106 cargo and passenger boats which collided with the Bridge, 14 were sunk. One life was lost—that of a man who jumped overboard as his boat was about to collide with the Bridge.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Bridge Commissioners for information.

Ordered also that this Resolution be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILE, *Col.*, R.E.,

Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 29th November 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
	BURDWAN DIVN.		
1	Burdwan Nov. 29, '90	Nil	Weather—bright and cold. All crops as good, and all agricultural operations as advanced, as possible. Prices of common rice :— Srs. Burdwan ... ... 16½ Culna ... ... 16 Cutwa ... ... 18 Ranigunge ... ... 17 } per rupee.
2	Bankoora ,, 29, '90	Nil	Weather—seasonable. Prospects of *amun* rice continue good. Reports from mofussil as to extent of damage to *rubbi* crops by locusts not yet received. Common rice selling at 20 seers per rupee at Sudder and 19 seers at Bissenpore.
3	Birbhum ,, 29, '90	Nil	Clear and fine weather. Harvesting of the crops is in progress, and the outturn is a bumper one. Price of coarse rice from 17 to 24½ seers per rupee.
4	Midnapur ,, 29, '90	Nil	Weather—fine and dry; nights cold. *Amun* paddy is being reaped with an average outturn of about 12 annas. Young *rubbi* crops have suffered slightly from a flight of locusts in parts of the Sudder and Ghatal subdivisions. Prices of common rice :— Srs. Sudder ... ... 16 Tumlook ... . 16 Ghatal ... ... 16 Contai ... ... 18 } per rupee.
5	Hooghly ,, 29, '90	Nil	Cold weather set in, though at times close in the day Outturn of *amun* expected to be almost a bumper one. Winter crops are good, but locusts have turned up here and there and are doing slight damage to them. Prices of common rice :— Srs. Sudder ... ... 13½ Serampore ... ... 13½ Jehanabad ... ... 16¾ } per rupee.
6	Howrah ,, 29, '90	Nil	Weather—seasonable. *Amun* crop is being harvested. Prospect of harvest good. Price of common rice 14 to 14½ seers per rupee.
	Central Districts.		
	PRESIDENCY DIVN.		
7	24-Perghs. Dec. 2, '90	Nil	Weather—seasonable. Prospects of crops good. Harvesting of *amun* and sowing of winter crops still going on. Another flight of locusts passed over parts of the Barrackpore, Baraset, and Bussirhat subdivisions during the week, doing slight damage to the *rubbi* crops in Baraset. Any damage done elsewhere not yet reported. Prices stationary.
8	Nuddea Nov. 29, '90	Nil	Weather—seasonable. Harvesting of *amun* going on. Winter crops doing well.
9	Khoolna ,, 29, '90	Nil	Weather—seasonable. Harvesting of *amun* commenced. Prospects favourable except in flooded area.
10	Jessore ,, 29, '90	Nil	Weather—seasonable. Harvesting of *amun* going on. *Rubbi* crops doing well. Locusts appeared in the Narail and Sudder subdivisions and did much damage to the *rubbi* crops in the latter. Agricultural loans are still being issued where they are urgently needed. Price of rice steady.
11	Moorshedabad ,, 29, '90	Nil	Weather—cool. *Amun* is being reaped. *Rubbi* is still being sown. Prospects good.
	RAJSHAHYE DIVN.		
12	Dinagepur ,, 29, '90	Nil	Weather—seasonable. Prospects of *amun* and sugarcane good. *Amun* expected to be a 16-anna crop. Price of rice as before.
13	Rajshahye ,, 29, '90	Nil	Fair weather, and nights and evenings rather cold. Harvesting of early *amun* going on. Condition of *ganja* plants and sugarcane good. Transplantation of tobacco plants not yet completed. Preparation of land for winter crops in progress.
14	Rungpur ,, 29, '90	Nil	Clear cold weather. *Amun* harvest has begun and promises to be a full average one. Tobacco and potatoes coming on well. Sugarcane ripening.
15	Bogra ,, 29, '90	Nil	Weather—seasonable. State and prospects of crops favourable. Harvesting of winter rice and sugarcane has begun in some places. Common rice selling at 15 seers per rupee.
16	Pubna ,, 29, '90	Nil	Weather—seasonable. Prospects of standing crops continue good. Mustard and tobacco are still being sown. Prices lower than before.
17	Darjeeling ,, 29, '90	Nil	Weather—bright. Mornings and evenings cold. In the Terai mustard is in blossom in many places; potatoes, tobacco, and rice doing well. In the Hills *bhutta* has been harvested and *marua* is being harvested. Prospects good.
18	Julpigoree ,, 29, '90	Nil	Weather—getting cool. Harvesting of *kaimanti* rice commenced in places. Sowing of mustard and tobacco going on. Prices continue stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
DACCA DIVN. 19	Dacca Nov. 29, '90	Nil	Weather—seasonable. Harvesting of *amun* going on. Tobacco and chillies are being planted. Mustard, *mung*, and *maskalai* thriving. *Khesari* and *matar* are being sown. Fodder is available. Common rice sold at from 13 to 16 seers per rupee.
20	Furreedpur ,, 29, '90	Nil	Weather—seasonable. State of crops fair. Harvesting of *amun* paddy in progress. Enquiry is being made regarding damage done to the pulses by locusts in the Sudder subdivision. Common rice selling at from 14 to 17 seers per rupee.
21	Backergunge ,, 29, '90	Nil	Weather—cold and seasonable. State and prospects of crops good. Harvesting of *amun* has commenced. Common rice selling at 13¼ seers per rupee.
22	Mymensingh ,, 29, '90	Nil	Weather—almost all the mornings of the week were foggy Cold season has set in. Prospects of *amun* paddy generally excellent. Paddy on high lands being reaped. *Rubbi* sowings not yet over. Coarse new rice sells at 16 seers per rupee.
CHITTAGONG DIVN. 23	Chittagong Dec. 2, '90	Nil	Weather—seasonable. Cultivation of vegetable crop continues. Harvesting of early winter rice in progress. State and prospects of *amun* very good. Prices stationary.
24	Noakholly Nov. 29, '90	Nil	Weather—seasonable. Reaping of *amun* going on. *Rubbi* crops progressing. Prospects good.
25	Tipperah ,, 29, '90	Nil	Weather—cold and sunshiny. *Amun* paddy is being cut; a full outturn is expected. Cold-weather crops—mustard, chillies, &c.—are being sown.
26	Chittagong Hill Tracts. ,, 27, '90	Nil	Weather—seasonable with foggy mornings. Harvesting of cotton continues. Late plough-paddy ripening. Sowing of mustard nearly over. Lands are being ploughed for tobacco and chillies. Common rice being sold at 11 seers 6¾ chittacks per rupee.
BEHAR.			
PATNA DIVN. 27	Patna Nov. 29, '90	Nil	Weather—cool. Paddy being harvested. *Rubbi* and poppy sowings finished, and prospects continue favourable. Cotton and *rahar* doing well. Prices of food-grains almost stationary.
28	Gya ,, 29, '90	Nil	Weather—cold and seasonable. Harvesting of paddy going on. Prospects of *rubbi* and poppy good. Prices of food-grains stationary.
29	Shahabad ,, 29, '90	Nil	Weather—bright and cool with light west winds. Harvesting of paddy is being pushed on. Prospects of *rubbi* and opium excellent.
30	Durbhunga ,, 29, '90	Nil	Weather—seasonable. Harvesting of rice going on. *Rubbi* looks promising. Poppy sowing almost completed and plants reported to be healthy. Tobacco and *alua* doing well. Price of common rice varying from 14 to 16 seers per rupee.
31	Muzufferpur ,, 29, '90	Nil	Weather—seasonable. Prospects of all crops continue excellent. Weather has been most favourable for the poppy crop.
32	Sarun ,, 29, '90	Nil	Weather—seasonable. *Rubbi* and poppy sowings still going on; prospects excellent. Sugarcane has attained its maturity and pressing will shortly commence.
33	Chumparun ,, 29, '90	Nil	Weather—fair and cool. *Rubbi* sowings have freely germinated, and are coming on well. Harvesting of paddy has commenced; estimated outturn 16 annas.
BHAGULPORE DIVN. 34	Monghyr ,, 29, '90	Nil	Weather—seasonable. Harvesting of winter rice has commenced in places. *Rubbi* sowings nearly finished. Early sowings growing well.
35	Bhagulpore ,, 29, '90	Nil	Weather—seasonable. All crops doing well. Sowings of linseed are up to average. Rice crop promises to be a bumper one.
36	Purneah ,, 29, '90	Nil	Weather—nights cool; sun still hot in day. *Kurthi* and *kalai* being reaped. State of crops continues good.
37	Maldah ,, 29, '90	Nil	Weather—seasonable. Some of the winter rice is ripe, and the harvest has begun. *Kalai*, mustard, wheat, barley, &c., are thriving very well. Common rice selling at from 13 to 18 seers per rupee.
38	Sonthal Perghs. ,, 29, 90	Nil	Weather—seasonable. Rice harvest going on briskly with good outturn. Prospects of spring crops excellent except where damaged by locusts.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	39	Cuttack Nov. 29, '90	Nil	Weather—seasonable. Harvesting of *laghu sarad* continues. Planting of tobacco has just commenced.
	40	Pooree „ 27, '90	Nil	Weather—seasonable. Late *sarad* ripening. *Laghu sarad* being harvested. Miscellaneous crops doing well. Price of common rice 21 to 27 seers per rupee.
	41	Balasore „ 29, '90	Nil	Weather—seasonable. Winter rice being harvested. *Rubbi* crops promise well in the Bhuddruck subdivision.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	42	Hazaribagh Nov. 29, '90	Nil	Weather—clear and cold. Harvesting of winter rice continues; outturn 16 annas almost everywhere expected. *Rubbi* crops doing well. Poppy sowings completed; prospect seems to be good.
	43	Lohardugga „ 29, '90	Nil	Weather—seasonable. Rain is badly wanted for *rubbi*. Harvesting of winter rice is being carried on vigorously.
	44	Singbhoom „ 29, '90	Nil	Weather—seasonable. Harvesting of rice continues with a splendid outturn everywhere. *Rubbi* crops favourably reported on from all quarters. Price of rice stationary.
	45	Manbhoom „ 29, '90	Nil	Weather—seasonable. Harvesting of paddy continues vigorously. Outturn of *jarin tussur* good. Rice selling at from 20 to 25 seers per rupee.

The average fall of the corresponding period for 24 years, S.-G.'s Office ...	65·15

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≏ dew, ≡ fog.

C. LITTLE,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 1st December 1890.

* Mean of six days.

† Explanation.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period ... humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. T... normal means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question dur... the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

Meteorological Division.	Amount of cloud at 8 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Rainfall. Of week. Mean for district.	Normal mean.	Since 1st of month. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.
ud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means
The means of the district are the numerical average of the rainfall return received in the district, i.e., from total rainfall at the subdivisional

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 28th of November 18

Meteorological division.	District.	Station.	Rainfall. Saturday, 22nd November.	Sunday, 23rd November.	Monday, 24th November.	Tuesday, 25th November.	Wednesday, 26th November.	Thursday, 27th November.	Friday, 28th November.	Total number rainy days.	Total Rainfall week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May 1890.	Average rainfall from 15th May to date.

Explanation.— .... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the ret are wanting, the corresponding spaces in the total rainfall columns are left blank.

Calcutta, *the 2nd December* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 28TH OF NOVEMBER 1890.

THE meteorological conditions during the past week have been typical of north-east monsoon weather. The changes which have taken place from day to day have been in all cases small, and of the usual oscillatory nature which characterises fine settled weather. Barometric pressure has been high and above the normal throughout the week. Temperature, which was at first rather high, has fallen almost steadily during the whole week. Humidity has been also moderate. The sky has been practically cloudless at almost all the inland stations, though it has been slightly clouded at the head of the Bay, and there has been an entire absence of rainfall at all stations.

Pressure was at the commencement of the week above the normal over the whole reporting area, the excess usually amounting to from nine to twelve-hundredths of an inch. On the 23rd a distinct rise, varying usually from two to three-hundredths of an inch, took place. This was succeeded on the 24th by a fall of about equal amount, and the fall continued on the 25th, when it equalled about a fortieth of an inch. Pressure still continued to fall for the following two days, and the decrease on the 26th amounted to about two-hundredths of an inch, while on the 27th it was rather less than this; but still the general pressure was about two to five-hundredths of an inch above the normal. On the 28th the fall of pressure had ceased, and a distinct rise commenced, but this only averaged about two or three-hundredths of an inch. It will thus be seen that pressure has been above the normal throughout the week, and the mean pressure has been from six to ten-hundredths of an inch in excess, the excess being usually largest in the south-western districts.

Temperature at the commencement of the week was above the normal over the whole province except at a few stations in South-West and East Bengal On the 23rd there had been a very distinct fall in all districts except at a few of the western stations in Behar, Chutia Nagpur, and South-West Bengal. A further general fall took place on the 24th, the decrease in the mean temperature at many stations equalling about one and-a-half degrees; so that on this day temperature was more nearly normal, though there was still an excess at the western stations in Behar, and a defect at some of the stations in North Bengal. A further fall of temperature was registered on the 25th, and the whole province on this day showed a defect from the normal. Again on the 26th a general fall of from half to one degree was reported, and temperature became about two to three degrees lower than usual over a large part of the province, though again a slight excess had appeared in Behar. On the 27th a further fall, averaging about half a degree, was recorded, and on the 28th the variations were very small, and at some stations there was a slight increase and at others a decrease of temperature. The general defect of temperature on the 28th was, however, not large, and usually ranged from about one to two degrees.

For the whole week the mean temperature has been below the normal in Orissa and East Bengal by about a degree and-a-half, and in South-West and North Bengal by from half to one degree. In the districts of Behar and Chutia Nagpur, on the other hand, temperature has been in excess of the normal by about one degree.

The distribution of temperature during the week and its variation from the normal are, however, best seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with their normal values for the same period From this table it will be seen that the minimum or night temperatures show greater variation from the normal than the day or maximum temperatures do :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending the 28th of November 1890.

	Normal mean maximum temperature for the week ending 28th November.	Actual mean maximum temperature for the week ending 28th November 1890.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 28th November.	Actual mean minimum temperature for the week ending 28th November 1890.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 28th November.	Actual mean daily temperature for the week ending 28th November 1890.	Variation of actual mean from the normal.

Meteorological Office, India ;
The 1st December 1890.

MEMORANDUM.

Monthly review of deaths registered in forty-five districts of Bengal for the month of September 1890.

THE deaths registered in forty-five districts of Bengal during the month of September 1890 were 146,205, and correspond to an annual rate of 26·52 per 1,000 of the aggregate population of those districts, which is 65,859,534. This rate is 3·48 higher than the mean rate of the corresponding months of the past five years 1885—89, and is also higher than the rate of the corresponding period of any of the past five years with which comparison is instituted, *vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Monthly average of five years, 1885–89.	1890.
Ratio of deaths per 1,000 of the population per annum	26·40	21·60	20·28	22·08	24·60	23·04	26·52

The following table shows the highest proportions of deaths registered during the month of September 1890, compared with the corresponding month of 1889 :—

Districts.	Ratio per *mille* during— Sept. 1890.	Sept. 1889.	*Districts.*	Ratio per *mille* during— Sept. 1890.	Sept. 1889.
Gya	48·36	42·24	Hazaribagh	33·00	30·60
Shahabad	38·76	42·84	Rajshahye	31·92	21·48
Khulna	38·16	22·32	Julpaiguri	30·96	25·20
Patna	36·36	36·84	Mozufferpore	30·96	23·76
Monghyr	35·88	45·96	Pubna	30·72	19·92
Darjiling	34·44	35·52	Bhagulpore	30·00	31·80
Jessore	33·96	21·60	Sarun	29·76	26·04

The figures for September 1890 against Gya, Khulna, Jessore, Hazaribagh, Rajshahye, Julpaiguri, Mozufferpore, Pubna, and Sarun show an advance towards accuracy in death registration.

The total mortality during the month under review from the several registered death-causes is compared in the following table with the mortality from those causes in the corresponding month of 1889 and the average of the five years 1885—89 :—

	Ratio per *mille* during— Sept. 1890.	Sept. 1889.	Monthly average of five years, 1885–89.
Cholera	·84	1·32	1·56
Small-pox	·06	·10	·03
Fever	20·16	17·52	16·56
Bowel-complaints	·60	·84	·84
Injury	·72	·72	·60
Other causes	3·84	3·84	3·24

Compared with the figures of both the past periods, there is a noticeable increase in the mortality of September 1890 under the head fever, and a sensible decrease in the death-rate from cholera.

The highest annual death-rates from cholera and fever occurred in the following districts :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*
Mozufferpore	6·48	Gya	37·08
Gya	4·44	Khulna	33·48
Shahabad	4·08	Jessore	31·44
Chumparun	2·88	Julpaiguri	29·52
Patna	2·76	Rajshahye	28·92
Durbhanga	2·40	Monghyr	28·80
Sarun	2·40	Pubna	28·44
		Shahabad	27·96
		Hazaribagh	27·24
		Maldah	24·96
		Murshedabad	24·48
		Noakhali	24·24
		Chittagong	23·88
		Patna	23·40
		Bhagulpore	23·40
		Nuddea	22·20

The mortality of the month under review, according to *Sex*, *Class* and *Age*, was distributed as follows: —

According to Sex.

	Ratio per *mille.*
Males	28·20
Females... ...	25·08
Ratio of male deaths to every 100 female deaths calculated on the proportion such mortality bears to the total male and female population ...	112

According to Class.

	Ratio per *mille.*
Christians ...	18·60
Hindus ...	27·12
Mahomedans ...	25·80
Buddhists ...	16·68
Other classes ...	23·28

According to Age.

	Ratio per *mille.*
Under 1 year	197·64
1 and under 5 years ...	31·08
5 „ 10 „ ...	15·60
10 „ 15 „ ...	13·56
15 „ 20 „ ...	16·08
20 „ 30 „ ...	15·24
30 „ 40 „ ...	17·04
40 „ 50 „ ...	24·00
50 „ 60 „ ...	35·28
60 years and upwards ...	65·76

Detailed information regarding the mortuary statistics of the forty-five districts of Bengal during the month under review will be found in the statement appended.

Office of Sanitary Commissioner for Bengal,

W. H. Gregg, *Dip. Publ. Health, Camb.*,

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 8th November 1890

Births.

The births registered during the week ending with Saturday, the 8th November 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 28·9 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 3·3 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of births per 1000 of the population per annum	27·6	23·5	22·4	27·7	26·9	25·6	28·9

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 18th Oct. 1890.	25th Oct. 1890.	1st Nov. 1890.	8th Nov. 1890.	Towns.	Weeks ending— 18th Oct. 1890.	25th Oct. 1890.	1st Nov. 1890.	8th Nov. 1890.
Burdwan	33·6	13·7	33·6	32·0	Naraingang	24·8	70·4	66·2	115·9

Dacca	24·0	13·9	27·9	31·1	Total ...	25·0	19·4	29·1	28·9

It will be seen that last week the highest birth-rate was returned from Naraingang (115·9) and the lowest from Ranaghat (12·).

Deaths.

The deaths registered during the week under review correspond to an annual rate of 23·9 per 1,000 of the population. The rate of the week is 9·5 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885–89.	1890.
Ratio of deaths per 1,000 of the population per annum	40·0	37·8	25·7	29·7	33·7	33·4	23·9

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 18th Oct. 1890.	25th Oct. 1890.	1st Nov. 1890.	8th Nov. 1890.	Towns.	Weeks ending— 18th Oct. 1890.	25th Oct. 1890.	1st Nov. 1890.	8th Nov. 1890.
Burdwan	22·9	22·9	35·1	25·9	Naraingang	24·8	41·4	45·5	41·4

Santipore	8·5	..	10·5	19·3	Bhagulpore	17·2	...	18·1	16·3
Jessore	...	30·6	49·0	24·5	Monghyr	21·7	25·4	37·1	40·7
Rampore Beauleah	42·0	49·9	39·4	47·3	Purneah	6·9	20·8	27·7	24·2
Darjiling	51·9	44·5	66·7	29·6	Poori	25·2	18·9	35·7	25·2
Dacca	18·2	25·2	20·8	21·4	Total ...	22·8	20·4	23·7	23·9

It will be seen that last week the highest mortality occurred in the town of Rampore Beauleah (47·3) and the lowest in Ranaghat (6·)

Measured by last week's mortality, the highest annual death-rates from cholera, fever, and other causes occurred in the following towns:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Monghyr ...	... 8·1	Rampore Beauleah	... 42·0	Gya ...	... 21·2
Arrah ...	... 7·2	Serampore ...	... 23·5	Narainganj ...	... 20·7
Patna City ...	... 3·6	Bali ...	... 21·1	Serampore ...	... 15·7
Gya ...	... 2·7	Purneah ...	... 20·8	Poori ...	... 14·7
Dacca ...	... 2·6			Monghyr ...	... 12·7
				Midnapore ...	... 12·4
				Krishnagar ...	... 11·3

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 1·9 from cholera, against 1·8 per 1,000 in the preceding week; ·04 from small-pox, against *nil;* 11·3 from fever, against 10·5; 2·7 from bowel-complaints, against 3·3; ·5 from injury, against ·2; and 7·4 from other causes, against 7·9 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	25·0	Christians ...	14·9	Under 1 year	... 188·5
Females	22·6	Hindus ...	22·5	1 and under 5 years	... 29·7
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	110	Mahomedans ...	27·7	5 „ 10 „	... 11·3
				10 „ 15 „	... 13·0
				15 „ 20 „	... 18·6
				20 „ 30 „	... 10·1
				30 „ 40 „	... 15·6
				40 „ 50 „	... 18·7
				50 „ 60 „	... 23·5
				60 years and upwards	... 77·5

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,

The 29th November 1890. *Sanitary Commissioner for Bengal.*

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 15th November 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 15th November 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 24·2 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 3·2 below the average rate of the corresponding week of the past five years, and is also below the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	27·6	26·2	28·2	24·5	30·6	27·4	24·2

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 25th Oct. 1890.	1st Nov. 1890.	8th Nov. 1890.	15th Nov. 1890.	Towns.	Weeks ending— 25th Oct. 1890.	1st Nov. 1890.	8th Nov. 1890.	15th Nov. 1890.
Burdwan	13·7	33·6	32·0	21·4	Naraingunj	70·4	66·2	115·9	74·5
Midnapore	7·7	20·1	17·0	15·5	Chittagong	...	11·7	14·1	16·4
Hughli and Chinsurah	27·9	42·7	27·9	32·8	Comillah	46·2	19·3	27·0	23·1
Serampore	43 2	53·0	30·3	55·0	Patna City	12 3	11·4	15·3	10·7
Utterpara	...	47·2	37·7	37·7	Gya	12 3	16·4	17·8	21·9
Howrah	25·2	31·5	33·8	28·1	Arrah	21·5	21·5	43·1	13·8
Bali	24·6	10·5	21·1	21·1	Mozufferpore	24·3	37·7	32·8	32·8
Krishnagar	15·1	22·7	18·9	13·2	Durbhanga	36·2	59·0	31 5	36·2
Ranaghat	18·0	12·0	12·0	24·0	Chupra	11·1	33 2	19·1	14·1
Santipore	...	19 3	15·8	19·3	Bhagulpore	...	46·2	50·7	37·1
Jessore	12·2	...	12·2	30·6	Monghyr	46·1	51 5	44·3	30·7
Rampore Beauleah	36·8	36·8	44·7	44 7	Purneah	13·9	3·4	27·7	6·9
Darjiling	14 8	...	14·8	44·5	Poori	16·8	21·0	.7·3	14·7
Dacca	13 0	27·9	31·1	24·0	Total ...	19·4	29·1	28·9	24·2

It will be seen that last week the highest birth-rate was returned from Naraingunj (74·5) and the lowest from Purneah (6·9).

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 23·4 per 1,000 of the population. The rate of the week is 9·9 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years with which comparison is instituted—*vide* the figures below—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	39·6	38·4	29·7	26·3	32·3	33·3	23·4

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 25th Oct. 1890.	1st Nov. 1890.	8th Nov. 1890.	15th Nov. 1890.	Towns.	Weeks ending— 25th Oct. 1890.	1st Nov. 1890.	8th Nov. 1890.	15th Nov. 1890.

It will be seen that last week the highest mortality occurred in the town of Serampore (72·6) and the lowest in Krishnagar (5·7).

Measured by last week's mortality, the highest annual death-rates from cholera, fever and other causes occurred in the following towns :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Monghyr ...	6·3	Serampore ...	31·4	Narainganj ...	20·7	Serampore ...	21·6
Gya ...	4·1	Poori ...	31·4	Serampore ...	17·6	Narainganj ...	20·7
Patna City ...	3·6	Jessore ...	30·6			Poori ...	18 9
		Hughli ...	29·5			Gya ...	14·3
		Gya ...	22·5			Midnapore ...	13·9
						Hughli ...	13 1

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 1·8 from cholera, against 1·9 per 1,000 in the preceding week; ·2 from small-pox against ·04; 10·5 from fever, against 11·3; 3·7 from bowel-complaints, against 2·7; ·3 from injury, against ·5; and 6·9 from other causes, against 7·4 in the preceding week. The mortality from small-pox is noticeably severe in Chittagong, there being three deaths (7· per 1,000 of population per annum).

The mortality of last week according to *Sex*, *Class* and *Age* was as follows :—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	25·7	Christians ...	14·9	Under 1 year	168 0
Females	20·9	Hindus ...	23·8	1 and under 5 years ...	25·2
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	123	Mahomedans ...	22·6	5 „ 10 „ ...	14·1
				10 „ 15 „ ...	10·8
				15 „ 20 „ ...	12·2
				20 „ 30 „ ...	17·0
				30 „ 40 „ ...	15·4
				40 „ 50 „ ...	20 8
				50 „ 60 „ ...	28·2
				60 years and upwards ...	53·8

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Pub. Health, Camb.*,

The 29th November 1890. *Sanitary Commissioner for Bengal.*

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, DECEMBER 3, 1890.

Notification.

THE following rules under section 17 and scale of charges under section 33 of Act IV (B.C.) of 1887 have been sanctioned by the Government of Bengal, and are published for general information.

D. R. LYALL,

Chairman of the Port Commissioners, Chittagong.

The 13th November 1890.

RULES UNDER SECTION 17 OF ACT IV (B.C.) OF 1887.

Rule under Clause (d)

Rule I.—All payments of dues under Act IV (B.C.) of 1887 shall be made on bills signed by the Vice-Chairman or other duly authorised officer at the Collector of Customs' sub-treasury of the Chittagong Collectorate.

Rule under Clause (e).

Rule II.—Applications for the supply of spring drinking water shall be made at the Office of the Port Commissioners. Unless in cases of emergency, water will be supplied according to date of receipt of application.

SCALE OF CHARGES UNDER SECTION 33 OF ACT IV (B.C.) OF 1887.

(1) Charges under Clause (*b*).

(*a*) *Occupying fixed moorings.*

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE CHITTAGONG DIVISION FOR THE YEAR 1889-90.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 9th December, 1890.

RESOLUTION.

READ—

The General Administration Report of the Chittagong Division for the year 1889-90.

The report is submitted by Mr. Lyall, who was in charge of the Division during the year with the exception of three months, when Mr. Veasey acted as Commissioner.

Tours.

2. Owing to political considerations in connection with the Chin-Lushai Expedition, the Commissioner during the touring season could not leave the Kurnafuli Valley, to which the Deputy Commissioner of the Hill Tracts was also confined. The tours made by the Collectors of Chittagong and Tipperah and by all sub-divisional officers were satisfactory, and a deficiency in the case of Noakhally is accounted for sufficiently.

Weather, crops, and condition of the people.

3. The weather was favourable for rice and jute throughout the Division and bumper crops of both were obtained in Tipperah. There was, moreover, a happy conjunction of good harvests and high prices, and the Commissioner is able to record:—

"The condition of the agricultural classes, who form the bulk of the population, was raised to a point which it has certainly not reached for many years—probably never in parts

of the Division. In Chittagong, in addition to the good harvest, there was a brisk demand for labour in Aracan, so that the people quite got over the bad effects of the previous year. This district, however, has but little surplus crop, and the condition of the people improved less than in the more favoured districts of Noakhally and Tipperah.

"The people of Tipperah were stated last year to have got over the effects of the previous bad years, and the past year has raised the cultivators to a state of prosperity such as they have never before known. Zemindars, including Government, have in consequence realized rent with ease, loans have been repaid, and the Tipperah Loan Bank, Limited, was left at the close of the year with Rs. 30,000 out of its capital of one lakh of rupees uninvested, because there were no borrowers. This is easily understood when the value of the jute crop is considered. The ryots are calculated by the Collector to have received about 42 lakhs of rupees in cash for this crop alone, while its production at a liberal estimate cannot have cost 10 lakhs. The margin of profit is, therefore, very high. The district is so rich that, in spite of the large increase of jute cultivation, it still exports rice largely, and last year both Calcutta and Dacca took large quantities.

"Some people say that the increased cultivation of staples like jute interferes with the food supply. This is not the fact in Tipperah, as the exports of rice from Brahmanbariah show.

"The great bulk of the jute crop is grown in this subdivision, yet last year, it is calculated, rice and paddy to the value of 1½ million rupees were exported from the sub-division alone, without reckoning the exports from the rest of the district."

Even with respect to the Hill Tracts, where there was a partial failure of the important cotton crop and the Lushai Expedition was a disturbing factor, the Commissioner is able to say that "it is many years since the hillmen have been so free of debt as they are at this moment." A considerable number of persons emigrated during the year from these tracts to Hill Tipperah, but the movement appears due to occasional causes not likely to recur. The labourers of Chittagong visited Burma as usual at the busy season and on a somewhat increased scale, returning with sums varying from Rs. 10 to Rs. 80.

With regard to health, the Hill Tracts only are well spoken of; in the remainder of the Division there was considerable mortality from fever, and in Tipperah and Noakhally a large increase of deaths from cholera.

Trdea and Commerce.

4. The following is extracted from the Commissioner's report:—

"The past year has been the best on record as regards the sea-borne trade of the port, in spite of the great falling off in the rice trade.

"The tables below show a falling off of 11 ships engaged in foreign trade, but an increase of tonnage, the average tonnage having increased from 1,233 tons to 1,447. If ships sailing under foreign flags be excluded, the average tonnage of ships sailing under the British flag is 1,602 tons. Interportal trade has also increased largely both in the number of ships engaged and in tonnage. This is partly due to the British India Steam Navigation Company's running two steamers a week for part of the year and partly to the larger quantity of jute imported:—

Foreign Trade.

	Number of Vessels entered.			Tonnage.		
	Inwards.	Outwards	Total.	Inwards.	Outwards.	Total.
1888-89	45	50	95	56,588	60,604	117,192
1889-90	43	41	84	61,509	60,056	121,565
Difference in 1889-90 ...	—2	—9	—11	+4,921	—548	+4,373

Interportal Trade.

	Number of Vessels entered.			Tonnage.		
	Inwards.	Outwards.	Total.	Inwards.	Outwards.	Total.
1888-89	845	837	1,682	165,818	165,495	330,313
1889-90	982	982	1,964	176,650	179,445	356,095
Increase in 1889-90 ...	137	145	282	11,232	13,950	25,182

'The value of the total sea-borne trade of the port increased by the large sum of Rs. 51,13,005, the figures being Rs. 3,16,96,588 as against Rs. 2,65,83,583. Until now the figures of 1887-88 were the highest, but the past year shows an increase of Rs. 26,13,788 as compared with them. So recently as 1876-77 the whole value of the trade of the port was only Rs. 54,39,320, or little more than the increase of the past year, and in these 13 years the value of the trade of the port has sextupled itself, and this with no increased facilities.

"When the Assam Railway is in working, the growth should be even faster, and it is difficult to understand why, in the face of such an increase of trade, there should be any hesitation in making the railway."

The Commissioner gives tables of articles of export and import and explains the fluctuations. There was a large decrease in the export of rice and paddy, the boat traders who generally supply Chittagong preferring to meet the demand in the western districts of Bengal as involving less danger to their boats and cargo. The great increase in the export of jute gives the Commissioner occasion to insist on the advantages that would accrue from a railway. He says:—

"The export of jute is the highest on record, being 222,846 cwt. over last year and 89,222 cwt. higher than 1887-88, which was up to then the highest figure.

"The growth of the jute export trade is very remarkable. It began in 1877-78, when the exports amounted to 130,775 cwt. Five years after, in 1882-83, it amounted to 1,149,257 cwt., and now it has reached 1,505,703 cwt., and this large figure would speedily be doubled if a railway were constructed.

"I do not use the word 'doubled' unadvisedly, but deliberately and with the full conviction that I am not guilty of exaggeration."

The export of tea was 1,172,549lb this year as compared with 1,222,786lb last year. The decrease of 50,237lb is attributed to weather unfavourable for production. In the Hill Tracts the trade in india-rubber is stated to have almost died out, the trees being probably exhausted.

Port of Chittagong.

5. The port of Chittagong under the Commissioners of the Port Trust (this being their first complete year of management) appears to be in a flourishing condition. The port fund closed with a credit balance of Rs. 1,10,397-5-3. The pilotage fund shows a debit balance of Rs. 4,970-6-4½, which will probably be decreased during the year. The barque *Grosvenor* was wrecked during the year, the *Will Duthie* was destroyed by fire, and a fire, which was happily extinguished, occurred on board the barque *Ophelia* partly loaded with jute. Stringent rules are under consideration to meet this source of danger.

Police and Criminal Justice.

There was an increase in reported crime, from 14,955 cases in 1888 to 15,713 in 1889, which is accounted for only in so far as the prosperity of the cultivators afforded them greater facilities for petty prosecutions, and the demand for jute land in Tipperah led to the institution of charges of riot, trespass or mischief. Agrarian disputes of every kind are evidently in this Division a fertile source of crime, at least of collisions involving subsequent magisterial proceedings; and it is to be hoped that the settlement of the Chittagong district, which is being effected at present, may ultimately bring about permanent improvement in this respect, by removing the uncertainty as to possession or ownership which is at the root of such contentions. The Commissioner considers that the conduct of the police and of the chowkidars was good on the whole, noticing that in one important case considerable detective ability was displayed, and that there were few convictions of officers. The returns, however, show that an unusual proportion of prosecutions were unsuccessful, a failure attributed by the Commissioner to pressure of work which, he thinks, prevented Magistrates giving due attention to some cases, particularly in Chittagong and Tipperah. The explanation is of a novel character, and is hardly borne out by the facts that the percentage of convictions was lowest, not in Chittagong or Tipperah, but in the comparatively small district of Noakhally; and that it was most conspicuous in cases tried by benches. The Lieutenant-Governor notices with satisfaction the high tribute paid to the efficiency and good services of the frontier police.

Revenue collections.

7. The collections on account of land revenue were good, inasmuch as they exceeded the current demand and considerably reduced the outstanding balance. In regard to direct management the Commissioner observes:—

"The system of khas collection in Chittagong is now, I consider, an assured success, and Government is collecting a large and safe revenue at a cost of under 10 per cent. (9·5

was the exact figure last year), instead of paying 20 per cent. to izaradars and realizing from them with difficulty. All the five circles collected over 100 per cent on the current demand, which was Rs. 3,94,874, the collections being Rs. 4,36,457. The highest percentage on the current demand was 119, which was obtained in the Raozan circle.

"In Tipperah, although the returns show a balance of Rs. 3,15[illegible] in estates under direct management, this was reduced by collections and remissions to Rs 2,441, while advance collections reached the sum of Rs. 3,431, so that actually Rs. 990 were collected in excess of the whole demand, arrear and current. These figures prove the prosperous state of the district beyond contradiction."

In Noakhally results were not so good, and a scheme has since been prepared for effecting an improvement in the system.

In the Hill Tracts collections also improved, the table showing Rs. 2,51,651-3-4 as against Rs. 1,74,599-0-3 last year. But about Rs. 65,000 of this increase consists of a large accession to the post-office revenue, due to the Chin-Lushai Expedition.

Local self-government institutions.

8. The Commissioner notices the bad influence which is not unfrequently exercised in the administration of boards and municipalities by party spirit arising out of personal questions. But, he adds,—"in spite of such drawbacks, much good work has been done during the past year, particularly by the Tipperah Board, who have also ceased to employ primary school money in supporting higher class schools. They have in hand or in contemplation some really useful new roads and are about to deepen some important khals, and have taken up the question of increasing the number of dispensaries and of improving the water-supply of the district in a business-like spirit. They have also fostered improved steamer communication with other districts. The Noakhally Board, I think, showed a want of appreciation of the importance of improving the inland water system of the district in deciding to drop the scheme for improving the Nadona khal, but they seem now disposed to take it up again."

Conduct of zemindars.

9. The Lieutenant-Governor desires to take this opportunity of acknowledging the valuable services of the tribal Chiefs in the Hill Tracts in getting together men for the Chin-Lushai Expedition. The thanks of the Lieutenant-Governor are given to Mr. Lyall for his excellent administration of the Division during the past and many previous years. The remarks of the Commissioner regarding the conduct of officers will, as usual, be forwarded to the Appointment Department; those upon Mr. Slack, Collector of Chittagong, are noticed by His Honour as particularly favourable.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

REPORT ON EMIGRATION FROM THE DISTRICT OF SARUN.

THE following report is published at the suggestion of the Commissioner of Patna for general information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

The 4th December, 1890.

No. 6096., dated Bankipore, the 30th September, 1890.

From—W. KEMBLE, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to forward a copy of an interesting report by the Collector of Sarun on the emigration from his district for publication, if it is considered advisable, in the *Calcutta Gazette*. It was first received more than two months ago, but was returned to Mr. Bourdillon at his own request in order that some further and fuller information regarding travellers by railway, which he hoped to be able to procure, might be incorporated in it. These hopes have, however, not been realized, as he has ascertained that as yet most of those who emigrate from Sarun make their journey on foot.

2. The noticeable feature in this emigration is that it is only temporary. So long as the women will not emigrate, and the men send all their earnings back to their homes, returning themselves at intervals, there is no hope of reducing the pressure of the people on the land. Under the circumstances, emigration seems likely to bring about an increase in population.

3. The absence of emigration to Assam is remarkable. I would remark that Goalpara is not one of the Assam tea districts: it belongs properly to the same category as Rungpore. It is satisfactory to see that Sarun men have found their way to Burmah.

No. 1401, dated Chupra, the 8th—10th July, 1890.

From—J. A. BOURDILLON, Esq., Magistrate of Sarun,
To—The Commissioner of the Patna Division.

IN my Annual Administration Report for the year 1889-90, I mentioned that I had been making enquiries about emigration from Sarun, and that I hoped to submit a further report before long. The compilation of the materials for this report has been a more tedious task than I had anticipated, and it is only now that I am able to lay it before you.

2. Four sources of information on this subject are available, viz., (*a*) the people themselves, through the medium of the police, unofficial Europeans, and other local residents in the district; (*b*) the statistics of distribution at the census of 1881; (*c*) the figures of the Postal Department in regard to money-orders paid in Sarun; and, lastly, (*d*) statistics of passenger traffic on the railway. The facts and inferences afforded by the first three will be found detailed below.

3. Emigration from Sarun should be divided first of all into the *quasi*-permanent and the temporary. In the former category I place all those cases in which men leave the district for a year or two at a time, or even longer; the temporary emigration, on the other hand, lasts only a few months.

4. The *quasi*-permanent emigration is affected mostly by two classes of persons—Mahomedans and better class Hindus. The Mahomedans go very largely to Calcutta where they may be found in domestic service as khidmatgars, syces, and drivers of hackney carriages. The better class Hindus go as cartmen and durwans to Calcutta and Darjeeling, while a considerable number of lower caste men, such as Chamars, Dusadhs, and Gareris go as syces. These men remain away for a year or two—sometimes more—making remitances and paying occasional visits to their homes. When a Mahomedan or a low caste Hindu is once well established in a good situation or business, he not infrequently sends for his wife and family.

5. As to the earnings of these people it is difficult to make any exact calculation. They certainly do well, for besides keeping themselves in an expensive place like Calcutta, they remit considerable sums home. Light is sometimes thrown on this side of native life by small incidents. In 1887 a Sarun Mahomedan was executed here for the murder of his aunt following on a quarrel about the expenditure of money he had sent from Calcutta.

It appeared that he had remitted Rs. 80 in two years, and he had led by no means an economical life nor been in continuous employ : the man was by profession a wrestler and as such had travelled literally all over India, but had been, among other things, a gentleman's servant, a ticca-garry driver, and a river boatman.

6. The better class Hindu cartman drives down his cart and bullocks to Calcutta, and when he has repaid his mahajan and made as much as he thinks sufficient, he sells them off and returns home.

7. A few are now going to Burmah voluntarily, besides the very considerable numbers in the Burmah Military Police. These are chiefly domestic servants, such as dhobis, sweepers, and bearers, and they generally follow some relation or fellow villager who has preceded them to this El Dorado.

8. The tea districts and the colonies generally known as "Mirich" (Mauritius) get *very* few men from Sarun, and the figure of the recruiter is seldom seen. The few who do go to the labour districts go privately following some friend or relation, while my experience of the emigrants over sea is that they are usually people who, for some reason for other, find absence from their village advisable. A few do go however. Mr. Reid of Moniara quotes the case of a man in his *dehat* who has returned from Natal with Rs. 10,000. In another part of the district two coolies from the Mauritius, husband and wife, brought back a sum of Rs. 3,500, which proved a veritable Pandora's box to them.

9. On the whole, however, the *quasi*-permanent emigrants do not contribute one-tenth of the Sarun men who may be found in the cold weather scattered all over Upper India. These are mostly mere winter visitants, and to them I now turn.

10. Even in a district so purely agricultural as this, there is not constant employment in the fields for all its swarming population except at one season of the year. The first season of agricultural leisure (to follow the order of the Hindu year) is when the *rubbi* is sown : this is usually accomplished by the end of Kartic (middle of November), and then nothing has to be done except by the poppy cultivators till Phagun-Chait when the *rubbi* has to be cut (March and April). Moreover, the indigo manufacturing season is over and cattle and men all require rest. But even in the *rubbi* harvest all the men of a family are not required, for the light crops of an Indian harvest are gathered very largely in this district by women and children. Consequently there is no work for all the men till the rain falls, when the lands have to be prepared and the *bhadoi* and the rice sown, and when this is done it is time to commence once more the cutting and carting of indigo for manufacture.

11. Seeing, then, that their presence at home is absolutely necessary only from June till November, an immense number of Sarun men spend the months from December to May elsewhere. As soon as the *rubbi* is sown, the exodus begins. Formerly it was confined to the lower classes, but of late years it has been shared by all. Three great characteristics, besides that of brevity, distinguish this emigration from the other, viz., the emigrants go in other directions, all classes go, and hardly any women go except to very near-at-hand places.

12. The destination of a vast proportion of the winter emigrants is "the East" as they themselves call it, and when pressed for further detail it will be found that this means Purneah and Bhagulpore in the Bhagulpore Division, Bogra, Rungpore and Darjeeling in the Rajshahye Division; or further east still, beyond Calcutta and Howrah—the districts of Dacca and Mymensingh. Field labour of the simplest description is the object of these men, such as digging and cleaning tanks, repairing roads, making railway embankments and harvesting the winter rice crop. When women go they either work with their husbands, or else earn an income by grinding corn for the Banias. Some few follow the homely slighted Kahar's trade; while the great majority of those who go to Calcutta and Howrah work as common coolies in the streets, or as mill hands in the mills round the metropolis. The earthwork of the Assam-Behar Railway through Purneah, and of the Northern Bengal Railway in Rungpore, Bogra and Dinagepore, has been largely constructed by Sarun men, and the preparation of the Mymensing-Dacca Branch of the Eastern Bengal Railway attracted a considerable number who now repeat their annual visit to cut the jute in Mymensing and load it in Dacca and Naraingunge.

13. The result of many enquiries seems to show that these emigrants, provided that they keep their health, make about Rs. 50 or Rs. 60 each as profit. Part of this is sent home by money-order when half of their stay is over, and the remainder they bring with them in May and June. Out of this the mahajan has to be paid who advanced them the money necessary for their railway or road expenses and supplied the immediate wants of the family at home till remittances arrived from the eastward. I calculate, therefore, that a net profit of Rs. 30 or Rs. 40 is about what an ordinarily fortunate man makes over the trip. But the proviso quoted above is a very important one, and it is significant how universal is its introduction into all conversations on the subject. Fever is what the Behari fears in Bengal, and the fear of it is another potent inducement driving him home before the rains set in.

14. Mr. Hodding of Burhoga states that a native in his district has started an emigration agency. He charges Re. 1 a head for his services and interest at 25 per cent. on money advanced. In consideration of these payments he gives all information as to route, organizes parties, and lends money merely on personal security. He is said to be doing a good business.

15. The above facts, based mostly on the statements of planters and others, are fully borne out by the figures of the census and the statistics of the Postal Money-order Department.

16. On the 17th February 1881, the number of Sarun born men found in other districts of these provinces was 124,211, and they were most numerous in the following districts:—

Chumparun ...	... 44,835	Purneah ...	... 2,824
Mozufferpore ...	... 10,095	24-Pergunnahs ...	... 2,798
Calcutta and Suburbs	... 9,081	Shahabad ...	... 2,204
Rungpore ...	... 7,269	Howrah ...	... 2,112
Patna ...	... 6,813	Dinagepore ...	... 2,068
Mymensingh ...	... 5,124	Monghyr ...	... 1,979
Durbhunga ...	... 3,593	Maldah ...	... 1,712
Bhagulpore ...	... 3,335	Tipperah ...	... 1,534

17. Omitting the other districts of the Patna Division between which and Sarun there is of course a constant coming and going, it will be seen that the districts stand in the following order:—

Calcutta and Suburbs,	Bhagulpore,	Dinagepore,
Rungpore,	Purneah,	Monghyr,
Mymensingh,	24-Pergunnahs,	Maldah,
	Howrah,	Tipperah,

and this supports very closely the statements of local experts. Still further confirmation to them is afforded by an examination of the comparative figures for male and female emigrants. In Calcutta and the Suburbs and in Howrah, where, as I have said, it is more common for emigrants to settle for some time, the proportion of women to men is 1 in 4, and in the 24-Pergunnahs it is 1 in 5; while in Dinagepore and Rungpore it is 1 in 10 and in Mymensingh, which contributes many boatmen, 1 in 41. In Purneah, Bhagulpore, Maldah and Monghyr, which are districts nearer home, the proportion is from 1 in 2½ (Bhagulpore) to 1 in 8 in Maldah.

18. The statistics of the Postal Department afford similar information. By the courtesy of that department the registers of all money-orders paid in Sarun between the 1st January and 31st December 1889 were placed at my disposal, and I had them tabulated under my supervision.

The total amount paid away in that period was Rs. 11,22,350, and deducting the sum of Rs. 82,056, paid on orders issued from post-offices in the Sarun district, and which represent only local remittances, there remains a sum of Rs. 10,40,294 paid into the district from outside.

19. How much of this sum was sent in the way of family remittances, and how much in the course of trade or business, it is obviously impossible to say; but it is to be remembered that the money-order system has not yet touched that of remittance by *hoondi* and cheque, as means of adjusting commercial transaction, and it is to be noticed that the general average value of each of these money-orders was less than Rs. 20. When it is recollected also that whatever mercantile remittances took place were probably for largest sums, thus raising the general average, the conclusion seems incontrovertible that a vast majority of these orders were for very small sums and almost certainly family remittances.

20. I have tabulated in an appendix the localities from which these money-orders issued, and if the figures do not absolutely prove that Sarun men travel all over India, they show that they have correspondents all over the Empire.

21. The following is the order in which the different revenue divisions of these provinces stand in respect of their remittances, and lower down some district figures will be given:—

	Rs.		Rs.
Calcutta	1,44,935	Chittagong Division ...	12,766
Burdwan Division ...	92,144	Patna (excluding Sarun) ...	1,52,967
Presidency ,, ...	72,818	Bhagulpore Division ...	83,994
Rajshahye ,, ...	1,62,673	Orissa ,, ...	2,287
Dacca ,, ...	84,376	Chota Nagpore ,, ...	15,941

The Rajshahye Division, it will be seen, is far ahead, and exceeds even the Calcutta remittances and those from the Patna Division, for it contains the districts of Darjeeling, Julpigoree and Rungpore. The Burdwan Division owes it high position to the figures for Hooghly and Howrah, the Presidency Division to the inclusion of the 24-Pergunnahs, and those of Dacca and Bhagulpore to the figures respectively for Mymensingh and Purneah.

22. Taking the districts in order, the first 16 are as follows:—

	Rs.		Rs.
Calcutta	1,44,935	Purneah	31,086
Darjeeling	65,548	Rungpore	29,595
Chumparun	51,671	Mozufferpore	25,274
Mymensingh ...	47,884	Dacca	23,182
24-Pergunnahs ...	45,649	Durbhunga	22,782
Julpigoree	40,507	Patna	22,325
Howrah	40,461	Bhagulpore	20,811
Hooghly	35,756	Monghyr	18,727

23. Omitting, as in paragraph 17 above, the other districts of the Patna Division, the order is as follows :—

Calcutta.	Julpigoree.	Rungpore.
Darjeeling.	Howrah.	Dacca.
Mymensingh.	Hooghly.	Bhagulpore.
24-Pergunnahs.	Purneah.	Monghyr.

A reference back to paragraph 17 will show that the home districts eliminated in each case are the same, viz., Chumparun, Mozufferpore, Patna, Durbhunga, and in the emigrant list only Shahabad.

24. But the close similarity will be all the clearer if the two lists are placed in juxtaposition as below, when it will be noticed that out of the 15 names which appear, eight are common to both lists and only seven appear in only one list, viz., Dinagepore, Maldah and Tipperah in the census list, and Darjeeling, Julpigoree, Hooghly and Dacca in the other—

Districts arranged by census figures.	Districts arranged by postal money-orders.
Calcutta and Suburbs.	Calcutta.
Rungpore.	Darjeeling.
Mymensingh.	Mymensingh.
Bhagulpore.	24-Pergunnahs.
Purneah.	Julpigoree.
24-Pergunnahs.	Howrah.
Howrah.	Hooghly.
Dinagepore.	Purneah.
Monghyr.	Rungpore.
Maldah.	Dacca.
Tipperah.	Bhagulpore.
	Monghyr.

25. I do not know that much more remains to be said on the subject, except that I would draw attention to the figures for Assam in the appendix as bearing out my statement that very few Sarun men go to the Assam tea districts. The whole of Assam sends only Rs. 87,183, and there is only one district, viz., Goalpara, which sends more than Rs. 10,000.

26. The Burmah figures also are significant, and the total amounts to Rs. 46,951, of which Rs. 22,692, or nearly half, comes from Rangoon alone. It is also interesting to note that of the whole sum, only Rs. 4,908 was paid in the Sewan circle, thus leading to the conclusion that an appreciation of Burmah and its advantages as a colony has not yet reached into the more distant part of the district. It is also to be noted that nearly all the villages which send recruits to the army and the Burmah Police are in the south and east of the district.

27. Over the passenger statistics in the half-yearly revenue reports of the Bengal and North-Western Railway I have spent a good deal of time without much result. I had hoped to get figures showing month by month the passenger traffic out of the district and into the district, and the places whither and whence our railway passengers travelled. But I found that the preparation of these statistics was so elaborate and expensive an undertaking that it had to be abandoned. From the abstracts given in the reports I find that the inward passenger traffic by Digha Ghât is greater in the second-half year than in the first (Sonepore no doubt accounts for some of this), and that the outward passenger traffic, which, if many Sarun emigrants went by train, would be much larger in the second-half year than in the first, is in reality a good deal smaller, even though it includes the visitors returned from Sonepore.

28. This result is disappointing to me, as I had expected to find further proof in these figures of what I have already pointed out as a law of emigration ; but it fully supports the allegations of many of my informants in the district, viz., that a vest majority of the Sarun emigrants tramp every foot of the way out and home.

Appendix showing the value and place of despatch of money-orders paid in Sarun in 1889.

	Rs.
Calcutta	1,44,935
Lower Provinces (excluding Calcutta and Sarun) ...	6,87,701
Assam	87,183
Burmah	46,951
North-Western Provinces and Oudh	47,340
Central Provinces	4,545
Punjab	5,825
Rajputana	3,437
Central India	1,262
Sindh and Beluchistan	285
Mysore	379
Coorg	150
Madras	3,711
Bombay	6,640
Total ...	10,40,294

J. A. BOURDILLON,
Magistrate.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 6th December 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
	Burdwan Divn.		
1	Burdwan Dec. 6, '90	Nil	Weather—bright and cold. *Amun* paddy being reaped with good outturn. *Rubbi* crops doing well. Prices of common rice:— Srs. Sudder ... ... 16¾ Culna ... ... 16 Cutwa ... ... 19 6/16 Ranigunge ... ... 17 } per rupee.
2	Bankoora ,, 6, '90	Nil	Weather—bright and cold. *Amun* harvest has commenced. *Rubbi* eaten by locusts in places. Such lands have been resown. Another swarm of locusts has just passed over the Sudder station from south-west to north-east. The size and colour of the insects are the same as of those that appeared on the 21st ultimo. Common rice selling at 20 seers per rupee at Sudder and 20½ seers at Bissenpore.
3	Birbhum ,, 6, '90	Nil	Weather—seasonable. The crops are being gathered in. Price of rice from 17 to 21 seers per rupee.
4	Midnapur ,, 6, '90	Nil	Weather—seasonable; growing colder. *Amun* rice being generally reaped; about 12 annas outturn expected. Prices of common rice:— Srs. Sudder .. .. 18 Tumlook ... ... 16 Ghatal ... ... 16 Contai ... ... 18 } per rupee.
5	Hooghly ,, 6, '90	Nil	Cold weather set in completely. Prospects of crops good. Outturn of rice may be expected to be 12 annas. Potatoes, peas, &c, expected to turn out well. Prices of common rice:— Srs. Sudder ... ... 13½ Serampore ... ... 13½ Jehanabad .. .. 15¾ } per rupee.
6	Howrah ,, 6, '90	Nil	Weather—seasonable. Prospects of crops good. *Amun* crop being reaped. Coarse rice sells at 14½ seers per rupee.
	Central Districts.		
	Presidency Divn.		
7	24-Pergns. Dec. 9, '90	Nil	Weather seasonable. Prospects of crops good Harvesting of *amun* and sowing of winter crops still continue. Locusts which appeared in parts of the Barrackpore, Baraset, and Bassirhat subdivisions are reported not to have done much damage to the crops. Price of common rice from 13 to 20 seers per rupee.
8	Nuddea ,, 6, '90	Nil	Weather—seasonable. Harvesting of winter rice, *kalai*, *mung*, and *til* going on. Prospects good.
9	Khoolna ,, 6, '90	Nil	Weather—seasonable. Harvesting of *amun* in progress. Prospects favourable except in flooded area.
10	Jessore ,, 6, '90	Nil	Weather—seasonable. Harvesting of *amun* and sowing of winter crops going on. Locusts have done some injury to the crops in all subdivisions except Jhenidah. Price of rice stationary, and prospects of standing crops good.
11	Moorshedabad ,, 6, '90	Nil	Weather—cool *Amun* being harvested. Prospects of *rubbi* favourable. *Kalai* doing well.
	Rajshahye Divn.		
12	Dinagepur ,, 6, '90	Nil	Weather—seasonable. Prospects of crops continue good. Mustard sown to the extent of 10 annas. Price of rice unchanged.
13	Rajshahye ,, 6, '90	Nil	Weather—seasonable. Harvesting of *amun* continues. Reaping of sugarcane commenced. Condition of standing crops good. Sowing of winter crops begun. Transplantation of tobacco not finished.
14	Rungpur ,, 6, '90	Nil	Weather—cloudy with morning fogs. Great damage reported to have been done to the ripening paddy in many places by caterpillars. In other respects prospects are good all round.
15	Bogra ,, 6, '90	Nil	Weather—seasonable. State and prospects of crops satisfactory. Harvesting of winter rice and sowing of spring crops going on; some of the latter are growing well. Common rice selling at 16 seers per rupee.
16	Pubna ,, 6, '90	Nil	Weather—seasonable. Prospects of crops continue good. *Amun* being harvested. Mustard and tobacco sowings going on. Prices stationary.
17	Darjeeling ,, 6, '90	Nil	Weather—cold and misty. Winter rice being harvested. In the hills *bara marua* and *fafar* doing well. Prospects good. *Aghani* rice in Terai now estimated at 16 annas.
18	Julpigoree ,, 6, '90	Nil	Weather—seasonable. *Haimanti* paddy being cut; about 15 annas outturn expected. Sowing of mustard and tobacco going on. No change in the price of rice.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 19	Dacca — Dec. 6, '90	Nil	Weather—seasonable. Harvesting of *amun* going on. Winter crops being sown. In thana Monoharди *mung*, *kalai*, and other *rubbi* crops reported to have been damaged by locusts. Price of common rice from 13 to 17 seers per rupee.
20	Furreedpur — „ 6, '90	Nil	Weather—seasonable. Harvesting of *amun* in progress. Sowing of winter crops will shortly be finished. Common rice selling at from 14 to 18 seers per rupee. Locusts appeared again on the 3rd instant.
21	Backergunge — „ 6, '90	Nil	Weather—cold and seasonable. State and prospects of crops good. Harvesting of *amun* commenced. Common rice selling at 13½ seers per rupee.
22	Mymensingh — „ 6, '90	Nil	Weather—mornings foggy; days clear, but occasionally cloudy. Reaping of *amun* paddy has begun. *Rubbi* crops doing well. Sugarcane ripening. Coarse rice sells at 16½ seers per rupee.
Chittagong Divn. 23	Chittagong — „ 9, '90	Nil	Weather—seasonable. Cultivation of vegetable crop nearly over. Harvesting of early winter rice continues. State and prospects of *amun* very good. Prices steady.
24	Noakholly — „ 6, '90	Nil	Weather—seasonable. Reaping of *amun* and sowing of *rubbi* crops continue. Prospects good.
25	Tipperah — „ 6, '90	Nil	Weather—cold and sunshiny. *Amun* being cut. Cold-weather crops doing well.
26	Chittagong Hill Tracts. — „ 4, '90	Nil	Weather—cold with foggy mornings throughout the week. Gathering of cotton continues. Mustard and other cold-weather crops progressing. Harvesting of late rice crop commenced. Common rice being sold at 11 seers 6¼ chittacks per rupee.
BEHAR.			
Patna Divn. 27	Patna — „ 6, '90	Nil	Weather—cold. Harvesting of paddy in progress. *Rahar* in flower. *Rubbi* crops look well. Prospects of poppy continue good. Prices of food-grains show a tendency to fall.
28	Gya — „ 6, '90	Nil	Weather—cold. Harvesting of paddy continues. Prospects of *rubbi* and poppy favourable. Prices of food-grains falling.
29	Shahabad — „ 6, '90	Nil	Weather—cool and bright with light west winds. State of all crops excellent. Harvesting of paddy continues. Price of rice falling.
30	Durbhunga — „ 6, '90	Nil	West winds prevailing. Harvesting of rice crop in progress. *Rubbi* crops have germinated well. Tobacco and *rahar* promising. Weather favourable for poppy plants. Price of common rice varying from 17 to 18 seers per rupee.
31	Mozufferpur — „ 6, '90	Nil	Weather—seasonable. Prospects of all crops continue good. Harvesting of *aghani* rice commenced. Poppy doing well.
32	Sarun — „ 6, '90	Nil	Weather—colder than before. *Rubbi* sowings completed; prospects excellent. Poppy sowings approaching completion. Paddy harvest commenced; outturn estimated in Sudder subdivision at 5 annas, in Sewan 8 annas, and in Gopalgunge 14 annas.
33	Chumparun — „ 6, '90	Nil	Weather—cool; occasionally cloudy. *Rubbi* and poppy sowings coming to a close; germination healthy and young plants doing well. Harvesting of paddy in progress; new rice has begun to come into the market. Prices tending to fall.
Bhagulpore Divn. 34	Monghyr — „ 6, '90	Nil	Weather—seasonable. Harvesting of winter rice in progress. *Rubbi* sowings still going on. Prospects continue favourable.
35	Bhagulpore — „ 6, '90	Nil	Harvesting of rice progressing fairly.
36	Purneah — „ 6, '90	Nil	Weather—Nights cool. Sun getting less warm during the day. *Aghani* rice still being harvested. Prospects of *rubbi* crops favourable. Mustard doing well.
37	Maldah — „ 6, '90	Nil	Weather—fine and cool. Strong westerly wind began to blow. Harvesting of winter rice going on. Other standing crops doing well. Price of common rice stationary.
38	Sonthal Perghs. — „ 6, 90	Nil	Weather—seasonable. Harvesting of *aghani* crop still going on. Sugarcane pressing has commenced in Deoghur. Prospects of crops good.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divs.	39	Cuttack Dec. 6, '90	Nil	Weather—seasonable. Planting of tobacco going on. Prospects of *guru sarad* (late winter rice) good.
	40	Pooree „ 6, '90	Nil	Weather—seasonable. *Laghu sarad* (early winter rice) being harvested. Late *sarad* ripening. *Dalua* crop being sown. Miscellaneous crops doing well. Price of common rice from 21 to 27 seers per rupee.
	41	Balasore „ 6, '90	Nil	Weather—seasonable. Winter rice being harvested. *Rubbi* crops, sugarcane, and mustard promising.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divs.	42	Hazaribagh Dec. 6, '90	Nil	Weather—cold and seasonable. Harvesting of winter rice continues. *Rubbi* crops doing well. Prospects of poppy continue favourable.
	43	Lohardugga „ 6, '90	Nil	Weather—seasonable. Harvesting of winter rice continues. Rain badly wanted for *rubbi*.
	44	Singbhoom „ 6, '90	Nil	Weather—warm for the season and somewhat cloudy. Harvesting of winter rice continues with excellent results. Prospects of *rubbi* also excellent.
	45	Manbhoom „ 6, '90	Nil	Weather—fairly cool. Rice crop may be said to be a bumper one. Locusts have been seen in the district for some 3 or 4 days past; it is feared that some damage has been done to the *rubbi* crops.

Published for general information.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF NOVEMBER 1890.

THE normal features of the meteorology of Bengal during November are very simple. Northerly winds blow over the whole of Bengal, and these usually extend as a north-easterly wind current over the north and centre of the Bay. These northerly winds are dry, and usually give in Bengal almost cloudless skies; temperature also diminishes steadily during the month, the diminution being strongly marked in the night temperatures, and humidity is low. As a rule, little or no rain falls unless it is brought up by one or other of two kinds of disturbances, which almost reverse the normal weather conditions. The first class of disturbances consist of cyclonic storms which are formed in the middle or south of the Bay in front of the retreating south-west monsoon. When they form, as they do occasionally, they usually advance towards the Madras coast, and expend their main force over the south of the peninsula, but sometimes they advance towards the north of the Bay. In the first case, they generally modify the weather over the whole of the Bay; and if the disturbance is a large one, humid winds will again be forced over Bengal, when skies will cloud over and temperature and humidity rapidly increase, and rain may fall, particularly over the southern parts of the province. In the second case, if a large and influential storm which has formed in the Bay advances towards Bengal and should happen to strike the coast, the weather conditions in Bengal will naturally be entirely reversed. Over the area where the storm passes excessively heavy rain will fall, and if the storm be a large one, the whole of Bengal will feel its effects, and general rain may be brought up for a considerable period. The second class of disturbances consist of land-formed barometric depressions, which originate over Upper India and drift sometimes over Bengal, giving clouded skies, increased humidity and temperature, and sometimes light rain. These land-formed disturbances seldom occur in November; and if they do occur, they are generally of very little importance.

Except, therefore, for rainfall brought up by the occurrence of storms in the Bay, as a rule, the province is almost rainless in November. Its occurrence and distribution are therefore very capricious, and the normal rainfall of November in Bengal is extremely small. Orissa usually receives a fall of about an inch and-a-third, and East Bengal one of about an inch; but in the other districts the fall is only from about a tenth up to a third of an inch.

Meteorology of the month.—At the commencement of November weather conditions in the south of the Bay of Bengal were distinctly unsettled, though at no time did the disturbed conditions concentrate to form a definite storm. The disturbance was, however, sufficiently influential to affect the weather conditions over the southern half of Bengal, and cloudy weather with a decidedly moist atmosphere obtained, and occasional rain fell during the first week of November. In Orissa the fall was general, but in South-West, East and North Bengal and in Chutia Nagpur showers only were reported. Cool clear weather, on the other hand, obtained during this period over Behar and over the northern districts of Bengal. At the end of the first week, however, weather conditions began to improve with the disappearance of the unsettled weather in the Bay, and during the second week of November fine weather prevailed almost without interruption throughout the week. The general conditions during this time underwent very little change from day to day, and conditions were fairly normal, except that pressure was above the average, while temperature fell pretty steadily throughout the week. The north-east monsoon season may indeed be said to have thoroughly set in over the whole of Bengal from the end of the first week in November, and from this date up till the end of the month conditions were of the ordinary cold weather character, and the changes which have taken place from day to day have been of the usual oscillatory nature which characterizes fine settled weather. Barometric pressure has remained high, and the mean for the month is very distinctly above the normal. Temperature has generally fallen by small amounts up till the close of the month, and the mean temperature for the month has been slightly below the normal. Humidity after the first few days has been fairly low, though the mean humidity for the month has been distinctly in excess of the usual amount. The sky during this period has also been generally only lightly clouded; indeed, if anything, rather less clouded than usual, and at most stations the mean cloud proportion for the month has shown that the sky has only been clouded over to about one or two-tenths of the possible amount. During the last three weeks of November also rainfall has been entirely absent throughout the whole province, the last light showers which fell were reported from Orissa on the 10th and 11th of the month.

Pressure.—During the first week the average pressure was in excess of the normal by amounts which varied from 0·03 inch in Orissa, South-West Bengal, and Chutia Nagpur to about 0·07 inch at some of the more northern stations. In the second week pressure was again in excess by amounts varying from 0·02 inch over the greater part of the province to 0·05 inch in East Bengal. In the third week the excess pressure was rather more pronounced, and it varied from a twentieth of an inch in Behar and North Bengal to a tenth of an inch in the south of Orissa. In the last week of the month also the excess was perhaps even larger than in the third, and it varied usually from six to ten-hundredths of an inch. For the whole month, therefore, pressure has been in excess of the normal, the usual excess varying from about four to seven-hundredths of an inch; the excess being usually largest in

East Bengal, where it averaged 0·06 inch, though in Assam the excess was not quite so large as at the stations in East Bengal, for there it only has averaged 0·05 inch.

Temperature—Was very distinctly below the normal for the first three weeks of the month, though in the last week it was almost normal. For the whole month five out of the seven large meteorological divisions shew mean temperatures distinctly below the normal, the defects generally varying from about half to one degree; but, on the other hand, Chutia Nagpur and North Bengal shew mean temperatures of about a third to one degree above the normal. The mean temperature of the whole province for the month may be said to have been only 0·3° below the normal for the period. The general variation of the day and night temperatures from the normal during the month is, however, best seen in the following table, where the weekly variations of the average maximum, minimum, and mean temperatures from the normal are given at nine typical stations in different districts of the province. It will be seen that the variations both of the day and night temperatures have been considerable:—

Stations.	Week ending 7th November 1890.			Week ending 14th November 1890.			Week ending 21st November 1890.			Week ending 28th November 1890.		
	Variation of actual mean maximum temperature of week from normal mean.	Variation of actual mean minimum temperature of week from normal mean. Rainfall—Was entirely confined to the first ten days of the month, and the only district receiving anything like a considerable fall was Orissa, the stations in which registered an average fall of 1·80 inches, which is slightly above the normal fall for the period. North Bengal received the next largest fall; but this district only averaged 0·22, which is again slightly in excess of the normal. In East Bengal there was an average fall of 0·17 inch only, which is about one-sixth of the usual amount, and in South-West Bengal the fall also averaged 0·17 inch, or about half the usual fall. The other districts received practically no rain at all.

The following table gives in a condensed form the rainfall information for each of the seven large meteorological districts of Bengal for the present year up to the close of November. The numbers there given, as in the case of the former months of the year, are the actual average-rainfalls in each month in each district, expressed as a percentage of the normal fall for the period, and the last column also gives the total rainfall up to the end of November expressed as a percentage of the normal amount:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	Actual rainfall of first eleven months of 1890 expressed as a percentage of the normal fall for the period.

The lowest pressure in the month	29·865	2nd	16
The range of pressure	0·302		
	Hours.		
The total number of hours of bright sunshine during the month	254·1		
The maximum possible number of hours of sunshine ...	330·8		
	°		
The mean temperature of the month	71·4		
The average temperature of November from 24 years' registers	74·8		
The highest temperature in the month	82·7	4th and 9th.	
The lowest temperature in the month	57·4	16th.	
The range of temperature during the month	25·3		
The mean daily range of temperature	17·4		
The greatest range of temperature in one day	21·8	16th.	
	Per cent.		
The mean humidity of the month	78		
The average humidity of November from 24 years' registers ...	72		
	Inches.		
The mean vapour tension of the month	0·591		
The average vapour tension of November from 9 years' registers	0·616		
The mean cloud proportion of the month	1·78		
The average cloud proportion of November from 13 years' registers	2·64		
The total rainfall of the month	0·01		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	Nil		
The average fall of November from 48 years' registers ...	0·65		
The greatest fall in 24 hours	0·01	2nd.	
	Days.		
The number of rainy days in the month	1		
The average number of rainy days in November from 24 years' registers	2		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	137·0		
The mean difference of sun and air temperatures	57·0		
The greatest sun temperature	144·0	1st.	
The greatest excess of sun over air temperature	62·6	7th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	55·9		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	6·9		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	9·3	30th.	
	Miles.		
The mean movement of the wind per day	28·0		
The greatest movement of the wind in one day	65·0	24th.	
The greatest movement of the wind in one hour	10·0	24th, noon to 1 P.M.	

The number of hours with winds from each of the 8 points—

N. 143, N.E. 66, E. 34, S.E. 10, S. 3, S.W. 8, W. 30, N.W. 62, Calm 364.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1·6 lower; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer which is the standard of reference at the present Observatory.

* Mean of six days.

Remarks.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the la
The humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numb
are the normal means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the p
stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

ıe week ending Friday, the 5th of December 1890.

Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	District observations. Rainfall. Since 1st of November. Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 9th December* 1890

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 5TH OF DECEMBER 1890.

THE meteorological changes during the week have again been of very slight importance. On November 29th, or the first day of the week, pressure was decidedly high, and was about 0·05 inch to 0·07 inch in excess of the normal. A fairly steady northerly wind current was blowing over the whole province except at a few stations in the west of Behar, where winds were southerly. Temperature was generally from one to two degrees below the normal except again at many of the stations in Behar, where excess temperature was registered. The sky was also practically clear, and no rain had fallen since the early part of the month. On the 30th November a somewhat rapid fall of the barometer took place which brought pressure almost to the normal amount This was accompanied by a moderately large fall of temperature in North Bengal and a much smaller fall in all other districts except Chutia Nagpur, and on this day winds were northerly at almost all stations in the province. Humidity and cloud proportion remained to a great extent unchanged. A further and rather more rapid fall of pressure again took place on December 1st, the fall at many stations equalling seven and eight-hundredths of an inch, and thus pressure became for the first time for a considerable period rather largely below the normal. Temperature also fell slightly on the 1st at all stations except those in Behar and Chutia Nagpur, and while the stations in the west of the province showed a temperature considerably in excess of the normal, at the eastern stations there was a very decided defect. On the 2nd pressure had commenced to rise by from two to four-hundredths of an inch, while temperature was generally rising by small amounts; these changes continued, but by rather variable amounts, on the 3rd and on the 4th, though on the 5th pressure and temperature began to fall rapidly, and by the end of the week pressure was from about 0·02 inch to 0·04 inch in defect of the normal in all districts except over part of Behar, where defect was larger than this. Temperature also on the 4th was decidedly in excess of the normal in all districts except South and South-East Bengal, where a defect was registered. The excess on the 5th was large at many of the Behar and Chutia Nagpur stations, and at Chupra, Buxar, Arrah, Dehree, and Ranchee the excess varied from 5° to 7°. Towards the end of the week also the northerly wind current had rapidly decreased in force, and on the 4th westerly and in some cases south-westerly winds were reported in Behar, Chutia Nagpur, and even over large parts of Central and part of East Bengal. Cloud proportion also commenced to increase rather rapidly at a considerable number of stations, though no rainfall of any kind was reported, except slight showers of no practical importance, from one or two stations in the Darjeeling Hills district. The changes therefore during the present week have been decidedly more marked than they were in the week ending November 28th, but still conditions have on the whole been very settled and weather has been fine.

Pressure.—The mean pressure for the week has not been very far removed from the normal, the variations being as a rule not larger than one or two-hundredths of an inch. At most of the stations in Orissa, South-West Bengal and East Bengal, pressure has been in excess, but in the other districts it has generally been in defect.

Temperature.—The mean temperature for the week has been nearly normal in Orissa, South-West and North Bengal, but it has been 2·2° below it in East Bengal. In Behar and Chutia Nagpur, on the other hand, temperature has been in excess of the normal by from 2° to 3°.

The distribution of temperature during the week and its variation from the normal are best seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with their normal values for the same period. The variations, it will be seen, have been considerable both in the day and night temperatures, though the night temperatures of these nine stations on the whole are below the normal, while the day temperature, are considerably above it :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending the 5th of December 1890.

	Normal mean maximum temperature for the week ending 5th December 1890.	Actual mean maximum temperature for the week ending 5th December 1890.	Variation of actual mean from the normal. Rainfall.—With the exception of a few drops of rain at Siliguri and Buxa in the Darjeeling Hills district, the whole province has been rainless throughout the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 5th of December 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of November.		Since 15th May 1890.

The average fall of the corresponding period for 24 years, S.-G.'s Office ...	65·19

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≏, dew; ≡, fog.

METEOROLOGICAL OFFICE, INDIA ;
The 8th December 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 22nd November 1890.

Births.

The births registered during the week ending with Saturday, the 22nd November 1890, in twenty-seven principal towns of Bengal, excluding one (Gya) from which no return has yet been received, correspond to an annual rate of 27·1 per 1,000 of the aggregate population of the twenty-six towns, which is 985,453. This rate is equal to the average rate of the corresponding week of the past five years, and is below the rate of the corresponding week of any of the past five years except 1886 and 1887, *vide* the figures below:—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	28·2	23·4	25·1	29·0	29·9	27·1	27·1

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 1st Nov. 1890.	8th Nov. 1890.	15th Nov. 1890.	22nd Nov. 1890.	Towns.	Weeks ending— 1st Nov. 1890.	8th Nov. 1890.	15th Nov. 1890.	22nd Nov. 1890.
Burdwan	33·6	32·0	21·4	39·7	Naraingunj	66·2	115·9	74·5	37·3
Midnapore	20·1	17·0	15·5	23·2	Chittagong	11·7	14·1	16·4	9·4
Hughli and Chinsurah	42·7	27·9	32·8	44·3	Comillah	19·3	27·0	23·1	27·0
Serampore	53·0	39·3	55·0	43·2	Patna City	11·4	15·3	10·7	13·3
Utterpara	47·2	37·7	37·7	56·6	Gya	16·4	17·8	21·9	Not furnished.
Howrah	31·5	33·8	28·1	36·1	Arrah	21·5	43·1	10·8	33·5
Bali	10·5	21·1	21·1	31·6	Mozufferpore	37·7	32·8	32·8	10·9
Krishnagar	22·7	18·9	13·2	11·4	Durbhanga	59·0	31·5	36·2	40·1
Ranaghat	12·0	12·0	24·0	12·0	Chupra	33·2	19·1	14·1	22·1
Santipore	19·3	15·8	19·3	24·5	Bhagulpore	46·2	50·7	37·1	24·4
Jessore	..	12·2	30·6	6·1	Monghyr	51·5	44·3	30·7	38·9
Rampore Beauleah	36·8	44·7	44·7	52·5	Purneah	8·4	27·7	6·9	10·4
Darjiling	..	14·8	44·5	29·6	Poori	21·0	27·3	14·7	14·7
Dacca	27·9	31·1	24·0	31·1	Total	29·1	28·9	24·2	27·1

It will be seen that last week the highest birth-rate was returned from Uttorpara (56·6) and the lowest from Jessore (6·1).

Deaths.

The deaths registered during the week under review correspond to an annual rate of 26·4 per 1,000 of the population. The rate of the week is 6.7 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1887, *vide* the figures below:—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	35·7	43·4	22·8	27·1	39·6	33·1	26·4

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population:—

Towns.	Weeks ending— 1st Nov. 1890.	8th Nov. 1890.	15th Nov. 1890.	22nd Nov. 1890.	Towns.	Weeks ending— 1st Nov. 1890.	8th Nov. 1890.	15th Nov. 1890.	22nd Nov. 1890.

Midnapore	21·7	24·8	29·4	29·4	Chittagong	25·8	21·1	14·1	9·4
Hughli and Chinsurah	31·2	27·9	52·5	37·7	Comillah	11·6	23·1	19·3	23·1
Serampore	82·4	45·1	72·6	36·4	Patna City	13·3	16·2	14·8	14·8
Utterpara	56·6	37·7	66·1	28·3	Gya	27·3	44·4	44·4	Not furnished.
Howrah	18·9	19·5	22·9	26·9	Arrah	10·8	22·7	12·0	13·2
Bali	14·0	24·6	21·1	17·5	Mozufferpore	16·6	20·7	17·6	17·0
Krishnagar	11·4	18·9	5·7	5·7	Durbhanga	26·0	14·2	18·9	33·0
Ranaghat	24·0	6·0	12·0	30·0	Chupra	17·1	13·1	8·0	18·1
Santipore	10·5	10·3	7·0	17·5	Bhagulpore	18·1	16·8	17·2	19·0
Jessore	49·0	21·5	49·0	18·4	Monghyr	37·1	40·7	37·1	32·2
Rampore Beauleah	39·4	47·3	13·1	47·3	Purneah	27·7	24·2	13·9	6·9
Darjiling	66·7	26·6	7·4	..	Poori	35·7	25·3	65·0	58·7
Dacca	26·8	21·4	15·0	45·4	Total	23·7	23·9	23·4	26·4

It will be seen that last week the highest mortality occurred in the town of Serampore (86·4) and the lowest in Krishnagar (5·7). No deaths were registered during the week in Darjiling town.

Measured by last week's mortality, the highest annual death-rates from cholera, fever, bowel-complaints and other causes occurred in the following towns :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*

		Hughli and Chinsurah ...	23·0			Poori ...	10·5
		Durbhanga ...	21·2				

The total mortality from the several registered death-causes in the twenty-six principal towns amounted to 2·3 from cholera, against 1·6 per 1,000 in the preceding week; ·2 from small-pox, against ·3; 12·7 from fever, against 9·5; 3·8 from bowel-complaints, against 3·7; ·4 from injury, against ·3; and 7· from other causes, against 6·3 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows :—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	27·9	Christians ...	37·5	Under 1 year ...	182·9
Females	24·7	Hindus ...	26·7	1 and under 5 years ...	30·0
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	113	Mahomedans ...	25·6	5 ,, 10 ,, ...	14·6
				10 ,, 15 ,, ...	11·0
				15 ,, 20 ,, ...	18·5
				20 ,, 30 ,, ...	15·1
				30 ,, 40 ,, ...	19·8
				40 ,, 60 ,, ...	22·1
				50 ,, 60 ,, ...	24·2
				60 years and upwards ...	78·1

Detailed information regarding the vital statistics of the twenty-six principal towns dealt with in the above review will be found in the statement appended

W. H. Gregg, *Dip. Publ Health, Camb.*,

The 9th December 1890. *Sanitary Commissioner for Bengal.*

The 12th December, 1890.—At page 2265, line 1, to the Supplement to the *Calcutta Gazette* of the 12th November, 1890, *for Rs.* 12,87,625 *read* 12,87,625.

P. NOLAN,
Secretary to the Govt. of Bengal.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Saturday, the 13th December, 1890.

Present:

The HON'BLE SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding*.

The HON'BLE SIR CHARLES PAUL, K.C.I.E., *Advocate-General*.

The HON'BLE H. J. S. COTTON.

The HON'BLE P. NOLAN.

The HON'BLE T. T. ALLEN.

The HON'BLE SIR HENRY HARRISON, KT.

The HON'BLE SIR ALFRED CROFT, K.C.I.E.

The HON'BLE DR. MAHENDRA LAL SIRCAR, C.I.E.

The HON'BLE C. H. MOORE.

The HON'BLE SHAHZADA MAHOMMED FURROKH SHAH.

The HON'BLE DR. RASH BEHARI GHOSE.

The HON'BLE RAJA RAMESHWAR SING BAHADUR.

The HON'BLE A. H. WALLIS.

NEW MEMBERS.

The Hon'ble Messrs. Cotton and Wallis took their seats in Council.

COURSE OF LEGISLATION.

His Honour the President said:—"Gentlemen, I am afraid you will consider that I have called you here to-day rather under false pretences when the ostensible cause is, that I am going to make a statement regarding the course of legislation during the Session. But, as a matter of fact, the statement that I have to make is, regarding the absence of any legislative business.

"There is on the notice paper a motion in regard to a Bill to repeal certain obsolete enactments. The Government of India in their Legislative Council, in the words of Sir Andrew Scoble, were clearing away dead matter from the Statute Book, and they desired that a similar course should be taken by us in regard to the Bengal Statutes. The Hon'ble Mr. Allen has in hand and will move to-day for leave to introduce a Bill for that purpose, which will be proceeded with somewhat later after careful examination.

"Then there is another Bill which is on the anvil and which has been printed and is ready to be introduced. But, after some correspondence with the Secretary of State, we find that it will require certain alterations to be made, and it will probably take some little time. It is a Bill in connection with the amendment of the Court of Wards' Act.

"These are the only two Bills which I can say are at all ready to be laid before the Council at present.

"There is another Bill which has been printed and circulated and which some of the members may have seen in their capacity as members of the Associations consulted. It has reference to our Bengal Revenue Sale Law. It is a very important Bill and will require careful consideration. But the reports of all the bodies which have been consulted have not yet been received, and it will probably be some months before it will be ready to be laid before the Council.

"Beyond these Bills I have no work in hand that will require your attention. I am glad, however, of the opportunity of calling you together before my departure; first, that I might have the pleasure of introducing you to my successor, Sir Charles Elliott, and secondly, that I might express, before I go, my gratitude for the assistance you have given me, and my extreme satisfaction at the way in which business has always been conducted in this Council. It is a matter of great regret to me that I am leaving you, and that I shall have nothing more to say in this Council. The Presidency hereafter will devolve on my friend Sir Charles Elliott, and I am quite sure you will give him all the loyal assistance which you have given me in this Council."

OBSOLETE ENACTMENTS BILL.

The Hon'ble Mr. Allen moved for leave to introduce a Bill to repeal certain obsolete enactments and to amend certain other enactments.

He said:—"The Bill in question is a purely technical one, and I therefore can promise the Council that it will be without a particle of interest for any single member of it, unless it be the hon'ble jurist opposite, who may take the opportunity of favouring us with one of his exhaustive discourses on abstract principles. In fact, however, the Bill is nothing more or less than a waste-paper basket, in which it is desirable to collect some of the litter which still encumbers the Bengal Code. I have already seen the provisions of the Bill, and I do not think it can be better described than the waste-paper basket of the Bengal Council."

The Motion was put and agreed to.

The Council was adjourned for one month.

Calcutta;
The 15th December, 1890.

C. H. REILY,
Assistant Secretary to the Govt. of Bengal,
Legislative Department.

SONTHAL SETTLEMENTS.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 15th December 1890.

RESOLUTION.

READ—

A letter No. 1899R, dated 31st October, 1890, from the Commissioner of the Bhagulpore Division and Sonthal Pergunnahs, with enclosures.

A letter No. 1680T—A, dated 6th December, 1890, from the Director of the Department of Land Records and Agriculture, Bengal, with enclosure.

A note on the proposed rules for settlement of rent in the Sonthal Pergunnahs by Mr. W. Mating Grant, a proprietor of land in that district.

When the settlement of certain private estates was initiated under the Sonthal Pergunnahs Settlement Regulation of 1872, it was originally assumed by the local officers that the rent could be most equitably fixed by applying the recorded village rates to the areas ascertained by the new measurement, but as the work proceeded this course was found to be impracticable. The Deputy Commissioner reported that an assessment framed on this principle would lead to excessive enhancements, injurious to the interests of the landlord as well as to those of the tenants. It, moreover, appeared that these rates had not been strictly enforced at the last settlement; that the measurements then made were very rough; and that the assessment of all newly cultivated land at full rates could not be reconciled with section 21 of the Regulation, which requires the Settlement Officer in any case in which the tenant has reclaimed waste to regard that fact in settling the rents. In view of these considerations, the Commissioner has requested Government to issue instructions for the guidance of Settlement Officers in fixing rents, and the following draft rules have been framed. They are now published for general criticism, and, if no objection to them is received, will be confirmed after the interval of one month.

The first of the draft rules merely draws attention to the fact, which in the correspondence has sometimes been overlooked, that the law requires the Settlement Officer to fix a fair rent in every case, either accepting the existing rent as having that character, or altering it to meet the circumstances as ascertained by the survey. The second is framed on the principle that existing rents must, in the absence of an alteration in area shown by the settlement itself, be assumed to be fair and equitable till the contrary is proved. Rule 3 has been prepared in communication with the local officers to indicate the margin of error which should ordinarily be allowed in view of the rough measurements made at the original settlement. It is not applicable where the particular lands formerly settled are demarcated or can be identified with certainty, so that the new cultivation is clearly distinguishable. Rule 4 embodies the existing practice for the assessment of new lands, which is in conformity with section 21 of the Regulation. The case of villages not previously measured is provided for in the fifth rule. Rule 6 embodies the principle accepted by the Bengal Tenancy Act for giving the landlord the benefit of improvements made by him. The limit imposed on enhancement by the seventh rule is considered necessary to prevent an excessive increase of rent in a district such as the Sonthal Pergunnahs.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

RULES.

1. A fair rent shall be settled FOR EVERY holding.

Method of settling fair rents.

2. Where the Settlement Officer has reason to believe that area rates were fixed at the last settlement, and that rentals were determined by the application of these rates to areas of holdings, ascertained by measurement, the rates then

fixed and rentals then ascertained shall ordinarily be held to be fair for the areas at that time in the raiyats' possession.

3. In determining what area was in each raiyat's possession at the time of the last settlement, the Settlement Officer shall have regard to the inaccuracies in the survey and in classification of soils then made, and to differences in areas which are due to the difference between the methods of survey then and that now adopted, and he shall allow a reasonable percentage on the old recorded areas (not ordinarily less than 15 or more than 25), which shall be determined by the Commissioner for each village or class of villages, on the grounds above specified. The difference between the areas of holdings as shown by the present and the former measurement, after the aforesaid allowance is made, shall be presumed until the contrary is proved to be "newly cultivated."

4. "Newly cultivated lands," as defined in the last preceding rule, shall be assessed at half the rates current in the village for lands of the class to which they belong.

Settlement of rents where rents were not based on application of rates to areas of holdings ascertained by survey at the last settlement.

5. Where the rentals of holdings were not determined by the application of rates to areas ascertained by measurement at the last settlement, the Settlement Officer shall now settle fair and equitable area rates, having regard to the considerations mentioned in sections 20 and 21 of Regulation III of 1872, and shall determine the rent of every holding by the application of these rates to the area of holdings resulting from survey.

General.

6. When the productive power of the land has been increased by an improvement effected by the landlord during the currency of the present settlement, the rent may be increased on that account, and in such cases the Settlement Officer in determining the amount of the enhancement shall have regard to—

(i) the increase in the productive powers of the land caused, or likely to be caused, by the improvement,
(ii) the cost of the improvement,
(iii) the cost of the cultivation required for utilizing the improvement, and
(iv) the existing rent and the ability of the land to bear a higher rent.

7. The aggregate full rental of any village shall not exceed by more than 50 per cent. the rental fixed at the last settlement, and the increase in rental up to this maximum may, in the discretion of the Settlement Officer, be made progressive.

8. The rents now settled shall remain unchanged for 15 years.

9. An appeal shall lie from orders of the Settlement Officer under these rules to the Deputy Commissioner, and when the Deputy Commissioner's order differs from that of the Settlement Officer, an appeal shall lie from the Deputy Commissioner to the Commissioner, provided that an appeal on questions regarding rates shall lie in every case from the Deputy Commissioner to the Commissioner.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 13th December 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
BURDWAN DIVN. 1	Burdwan Dec. 13, '90	Nil	Weather—seasonable and cloudy. Harvesting of *amun* going on. Sugarcane doing well. Locusts appeared on the 7th in parts of the district and did some injury to *rubbi* crops Prices of common rice :— Srs. Sudder ... ... 18½ Culna ... ... 17 Cutwa ... ... 18⅛ Ranigunge ... ... 16¾ } per rupee.
2	Bankoora ,, 13, '90	Nil	Weather—cloudy and cold. *Amun* harvest continues. *Til* is being reaped. Injury to *rubbi* crops by locusts considered as a whole is not much, but these have been completely destroyed where they alighted. Sugarcane is thriving. Common rice is selling at 20 seers per rupee at Sudder and 21 seers at Bishenpore.
3	Birbhum ,, 13, '90	Nil	Sky seems to threaten rain. Crops are being fast gathered in. Price of common rice ranges from 18 to 24 seers per rupee.
4	Midnapur ,, 13, '90	Nil	Weather—seasonable, but a little warm at noon. Paddy crop is being harvested. *Rubbi* and indigo crops doing well. Prices of common rice :— Srs. Sudder ... ... 18 Tumlook ... ... 16 Contai ... ... 18 Ghatal ... ... 16 } per rupee.
5	Hooghly ,, 13, '90	Nil	Weather—cloudy and warm. *Amun* is being harvested with prospect of good outturn. *Rubbi* sowings almost completed. Locusts left the district without doing any damage. Prices of common rice:— Srs. Sudder ... ... 14 Serampore ... ... 14 Jehanabad .. .. 16½ } per rupee.
6	Howrah ,, 13, '90	Nil	Weather—seasonable. *Amun* crop is being reaped. Prospects of harvest good. Price of common rice about 15 seers per rupee.
	Central Districts.		
PRESIDENCY DIVN. 7	24-Perghs. Dec. 16, '90	Nil	Weather—seasonable. Prospects of all crops favourable. Harvesting of *amun* in progress. Sowing of winter crops nearly finished. Prices stationary.
8	Nuddea ,, 13, '90	Nil	Weather—a little cloudy. Harvesting of *amun* rice nearly finished. Winter crops doing well.
9	Khoolna ,, 13, '90	Nil	Weather—seasonable. Harvesting of *amun* going on. Prospects favourable except in flooded area.
10	Jessore ,, 13, '90	Nil	Weather—cool and cloudy in the latter part of the week. *Amun* is being harvested. Sowing of winter crops still going on in places. Locusts appeared in all subdivisions and did some injury to the standing crops. Price of rice stationary.
11	Moorshedabad ,, 13, '90	Nil	Weather—getting cool. *Amun* is being harvested. Prospects of *rubbi* favourable.
RAJSHAHYE DIVN. 12	Dinagepur ,, 13, '90	Nil	Weather—seasonable. Prospects of crops continue good. Price of rice both at Sudder and Thakurgaon 18 seers per rupee.
13	Rajshahye ,, 13, '90	Nil	Weather—seasonable. Rice is being harvested with a fair outturn. Prospects of other crops good.
14	Rangpur ,, 13, '90	Nil	Weather—cloudy with morning fogs. *Amun* is being cut. Mustard is in flower. Prospects generally good.
15	Bogra ,, 13, '90	Nil	Weather—seasonable. State and prospects of crops good. Winter rice is being reaped, and sugarcane is being cut. Sowing of *rubbi* crops still going on. Common rice selling at 14½ seers per rupee.
16	Pubna ,, 13, '90	Nil	Weather—seasonable. Prospects of crops continue satisfactory. Harvesting of *amun* still continues. Prices slightly lower.
17	Darjeeling ,, 13, '90	Nil	Weather—cold and misty. Winter rice is still being harvested. Potatoes, mustard, and tobacco doing well. Prospects good.
18	Julpigoree ,, 13, '90	Nil	Weather—seasonable and cloudy at times. Harvesting of *Aoismanti* paddy in progress. Prospects of mustard and tobacco good. Common rice selling at 14 seers per rupee.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 19	Dacca Dec. 13, '90	Nil	Weather—seasonable. Harvesting of *amun* going on. Mustard, *mung*, *maskalai*, and *khesari* thriving. Common rice sold at from 14 to 18 seers per rupee.
20	Furreedpur „ 13, '90	Nil	Weather—seasonable. Harvesting of *amun* paddy continues. State of winter crops fair. Common rice selling at from 12 to 16 seers per rupee.
21	Backergunge „ 13, '90	Nil	Weather—cool with foggy mornings. Prospects of crops good. Harvesting of *amun* going on. Common rice selling at from 14 to 15 seers per rupee.
22	Mymensingh „ 13, '90	Nil	Weather—cold. Harvesting of *amun* paddy progressing; outturn expected to be 18 annas. Coarse rice sells at 16½ seers per rupee.
Chittagong Divn. 23	Chittagong „ 16, '90	0·33	Weather—seasonable. Cultivation of vegetable crop and harvesting of early winter rice nearly over. State and prospects of *amun* very good. Prices unchanged.
24	Noakholly „ 13, '90	Nil	Weather—seasonable. *Amun* crop is being harvested. *Rubbi* crops progressing. Price of rice stationary.
25	Tipperah „ 13, '90	Nil	Weather—cold and clear. *Amun* rice is being cut. Cold-weather crops prospering.
26	Chittagong Hill Tracts. „ 11, '90	Nil	Weather—cold with foggy mornings throughout the week. Cloudy to-day (11th). Gathering of cotton continues. Harvesting of late rice crop going on. Mustard in flower. Tobacco, chillies, and other cold-weather crops progressing. Common rice is being sold at 11 seers 6¼ chittacks per rupee.
BEHAR.			
Patna Divn. 27	Patna „ 13, '90	Nil	Weather—cold. Harvesting of paddy and *jowar* going on. *Rubbi* crops look flourishing. A few showers of rain will be beneficial to them. Prospects of poppy continue good. Prices of food-grains show a tendency to fall.
28	Gya „ 13, '90	Nil	Weather—cold. Paddy harvest going on. Prospects of *rubbi* and poppy favourable. Prices of food-grains low.
29	Shahabad „ 13, '90	Nil	Weather—cool with light west winds. Paddy still being harvested. Prospects of *rubbi* good. Prices stationary.
30	Durbhunga „ 13, '90	Nil	Weather—cool with light west winds. Harvesting of paddy in progress; outturn in Madhubani subdivision estimated at 14 annas. Prospects of poppy and *rubbi* very favourable. Common rice selling at from 14 to 18 seers per rupee.
31	Muzufferpur „ 13, '90	Nil	Weather—seasonable: cold. Prospects of all standing crops continue good. Harvesting of rice going on. Weather very favourable for poppy.
32	Sarun „ 13, '90	Nil	Weather—seasonable. Harvesting of paddy in full swing. Prospects of *rubbi* and poppy continue excellent. Prices falling.
33	Chumparun „ 13, '90	Nil	Cold has increased with west wind which prevailed in the middle of the week. *Rubbi* and poppy sowings almost over; the latter crop is being irrigated in some places. Harvesting of paddy is progressing.
Bhagulpore Divn. 34	Monghyr „ 13, '90	Nil	Weather—seasonable; getting colder with light west wind. Harvesting of winter rice going on. Prospects of *rubbi* and poppy continue favourable.
35	Bhagulpore „ 13, '90	Nil	Weather—seasonable. Harvesting of rice crop progressing fairly. Prospects of *rubbi* good.
36	Purneah „ 13, '90	Nil	Weather—much colder now. *Aghani* still being harvested. *Rubbi* crops doing well.
37	Maldah „ 13, '90	Nil	Weather—seasonable. Harvesting of *amun* paddy continues. *Kalai* is being gathered in some places. State of all other standing crops favourable. *Boro* seedlings are thriving. Prices of common rice falling owing to the new crop finding its way in the market.
38	Sonthal Perghs. „ 13, 90	Nil	Weather—cool with west wind. Harvesting of rice in full progress with good outturn. *Rubbi* promising well.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	39	Cuttack Dec. 13, '90	Nil	Weather—dry and cool. Harvesting of *guru sarad* has just commenced in the Banki subdivision. *Rubbi* doing well.
	40	Pooree „ 11, '90	Nil	Weather—hot. *Sarad* crop is being harvested. *Dalua* crop is being sown. *Rubbi* doing well. Price of common rice from 21 to 28 seers per rupee.
	41	Balasore „ 13, '90	Nil	Weather—warm for the time of year. Harvesting of winter rice drawing to a close. *Biri, mung,* and mustard promise well.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	42	Hazaribagh Dec. 13, '90	Nil	Weather—cold and occasionally cloudy. Harvesting of paddy continues; a 16-anna crop expected almost everywhere in the district. Prospects of *rubbi* and poppy crops continue favourable. Prices stationary.
	43	Lohardugga „ 13, '90	Nil	Weather—a little cloudy. Harvesting of winter rice continues. Rain still badly wanted for *rubbi* crops.
	44	Singbhoom „ 18, '90	0·20	Weather—warm for the season of the year. Slight rain on the 11th. Harvesting of the paddy crop continues with good outturn. Winter crops are in excellent condition. Prices stationary.
	45	Manbhoom „ 13, '90	Nil	Weather—seasonable, but mornings are generally cloudy. Harvesting of winter rice continues with excellent results. Prospects of *rubbi* crops good. Very slight damage done to *rubbi* crops by locusts. Coarse rice selling at from 20 to 26 seers per rupee.

Published for general information.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≏, dew; = fog; o, overcast; d, drizzling rain.

C. LITTLE,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 15th December 1890.

* Mean of six days.

Meteorological Division.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The constitution of the atmosphere is expressed as percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers given as normal means or average of the rainfall in that district are determined from the returns sent in by the sub-divisional station for the period in question during the past ten years. The means of the district are the numerical average of the returns divided by the number of stations. A rainy day is one on which at least [illegible] inch of rain fell.

he week ending Friday, the 12th of December 1890.

Rainfall.—The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.

Cloud.—The cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means are the numerical average of the rainfall return received in the district, *i.e.*, from total rainfall at the sub-divisional stations during the past ten years. The means of the district are the numerical average of the rainfall return received in the district, *i.e.*, from total rainfall at the sub-divisional stations during the past ten years. The means of the district are the numerical average of the returns divided by the number of stations.

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 12th of December 1890.

Meteorological division.	District.	Station.	Rainfall. Saturday, 6th December.	Sunday, 7th December.	Monday, 8th December.	Tuesday, 9th December.	Wednesday, 10th December.	Thursday, 11th December.	Friday, 12th December.	Total number of rainy days.	Total Rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May 1890.	Average rainfall from 15th May to date.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the retu[illegible] are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 16th December* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 12TH OF DECEMBER 1890.

THE week commenced with conditions which were a little abnormal for the period; pressure was rather considerably in defect of the normal, particularly in North Bengal and Behar, where in some cases the defect almost equalled a tenth of an inch. Temperature was at the western and southern stations rather largely in excess, stations like Chupra and Dehree showing an excess in the mean temperature of nearly 7°. Winds were also much more strongly westerly than usual, and at some stations even south-westerly winds were reported. On the 7th pressure had risen generally, the rise being largest in Behar and North Bengal, while it was comparatively small in South and South-West Bengal. This was succeeded by a slight rise on the 8th which was fairly equal in all districts, while on the 9th a similar slight fall was recorded. On the 10th, however, another fall of pressure was recorded, which was largest in North Behar and North Bengal, and which over the whole of Bengal was moderately large except at the stations in the extreme south-east of the province and in the south of Orissa. Indeed, on this date a distinct area of low pressure was lying over Behar, part of North Bengal, and the western parts of Central and South-West Bengal. The winds blowing over Bengal showed distinctly the effect of this low-pressure area, and at the head of the Bay and at many of the inland stations also southerly winds set in, bringing up moderate amounts of moisture from the Bay. Temperature had also generally increased steadily, and in some cases rather rapidly, on the 7th, 8th, 9th, and 10th, the rise in the mean temperature on the latter date averaging about 2°, so that by the 10th temperature had become particularly high for the season. Indeed, at the western stations on this date the mean temperature was in excess of the normal by from 5° at Calcutta to about 11° at Ranchee and Chybassa, though at the eastern stations the excess temperatures were comparatively small. It will thus be seen on the 10th conditions were distinctly abnormal, and indeed rather disturbed. These disturbed conditions gave a few scattered local showers which were reported on the morning of the 11th from a few stations in South-West Bengal, East Bengal, and Chutia Nagpur, but the amounts were of little importance. On the 11th pressure had continued to fall at most stations, the fall being largest in North Bengal, and the area of low-pressure over this district on this day was very distinctly marked, and this was accompanied by a marked tendency for southerly winds at many stations. The excessive temperature also continued, and even increased at some stations, and it had also spread to a greater extent over the province than it had on the previous day; and at Calcutta, for instance, the mean temperature was 7·2° in excess of the normal, so that the disturbed conditions continued on the 11th. On the 12th, however, a very rapid rise of pressure had taken place, the rise at many stations considerably exceeding a tenth of an inch. Winds on this day became more northerly than they had been, and therefore more normal; and finally, temperature fell generally by amounts varying from 3° to 6°. Thus on the last day of the week conditions were rather rapidly reverting to their normal condition.

Pressure.—The general changes of pressure throughout the week have been already described. The mean pressure for the seven days has however, not been very far removed from the normal, and at most stations pressure has been in defect by amounts ranging up to a twentieth of an inch, the defects being naturally largest at the northern stations.

Temperature—Has been largely in excess, and for the whole province the mean excess has been between three and four degrees; the largest excess has been in Orissa and Chutia Nagpur, where it has equalled between five and six degrees. The distribution of temperature during the week and its variation from the normal are best seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with their normal values for the same period. The variations, it will be seen, have been rather excessive both in the day and night temperatures.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending the 12th of December 1890.

	Normal mean maximum temperature for the week ending 12th December.	Actual mean maximum temperature for the week ending 12th December 1890.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 12th December.	Actual mean minimum temperature for the week ending 12th December 1890.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 12th December.	Actual mean daily temperature for the week ending 12th December 1890.	Variation of actual mean from the normal.

Rainfall—Has been entirely confined to a few local stations and has been of little practical importance. In no case does the average fall in any large meteorological district amount to more than a few hundredths of an inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 12th of December 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1890.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

Meteorological Office, India;
The 15th December 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 29th November 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 29th November 1890, in twenty-seven principal towns of Bengal, correspond to an annual rate of 26·5 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 1·8 below the average rate of the corresponding week of the past five years, and is also below the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below:—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	28·3	26·8	30·7	27·8	27·7	28·3	26·5

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population:—

TOWNS.	WEEKS ENDING— 8th Nov. 1890.	15th Nov. 1890.	22nd Nov. 1890.	29th Nov. 1890.	TOWNS.	WEEKS ENDING— 8th Nov. 1890.	15th Nov. 1890.	22nd Nov. 1890.	29th Nov. 1890.
Burdwan	32·0	21·4	39·7	33·6	Naraingunj	115·9	74·5	37·3	91·1
Midnapore	17·0	15·5	23·2	26·3	Chittagong	14·1	16·4	9·4	4·7
Hughli and Chinsurah	27·9	32·8	44·3	24·6	Comillah	27·0	23·1	27·0	42·4
Serampore	30·3	55·0	43·2	33·1	Patna City	15·3	10·7	13·3	12·3
Utterpara	37·7	37·7	50·6	50·6	Gya	17·8	21·9	34·2	21·9
Howrah	33·8	28·1	36·1	31·5	Arrah	43·1	10·8	33·5	10·8
Bali	21·1	21·1	31·6	14·0	Mozufferpore	32·8	32·8	10·9	24·3
Krishnagar	18·9	13·2	11·4	9·5	Durbhanga	31·5	36·2	40·1	46·4
Ranaghat	12·0	24·0	12·0	6·0	Chupra	19·1	14·1	22·1	21·1
Santipore	15·8	19·3	24·5	22·8	Bhagulpore	50·7	37·1	25·4	40·7
Jessore	12·2	30·6	6·1	6·1	Monghyr	44·3	30·7	38·9	37·1
Rampore Beauleah	44·7	44·7	52·5	49·9	Purneah	27·7	6·9	10·4	17·3
Darjiling	14·8	44·5	29·6	44·5	Poori	27·3	14·7	14·7	12·6
Dacca	31·1	24·0	31·1	31·1	Total ...	28·9	24·2	27·6	26·5

It will be seen that last week the highest birth-rate was returned from Naraingunj (91·1) and the lowest from Chittagong (4·7).

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 25·7 per 1,000 of the population. The rate of the week is 7·8 below the average rate of the corresponding week of the past five years, and also below the rate of the corresponding week of any of the past five years except 1888, *vide* the figures below:—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years, 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	39·1	43·2	28·2	24·7	32·0	33·5	25·7

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population:—

TOWNS.	WEEKS ENDING— 8th Nov. 1890.	15th Nov. 1890.	22nd Nov. 1890.	29th Nov. 1890.	TOWNS.	WEEKS ENDING— 8th Nov. 1890.	15th Nov. 1890.	22nd Nov. 1890.	29th Nov. 1890.

Jessore	24·5	48·0	18·4	36·7	Monghyr	40·7	27·1	26·2	38·0
Rampore Beauleah	47·3	15·1	47·3	47·3	Purneah	24·2	13·9	6·9	20·8
Darjiling	33·6	7·4	...	22·2	Poori	25·2	63·0	58·7	96·5
Dacca	21·4	15·6	45·4	28·5	Total ...	23·9	23·4	28·1	25·7

It will be seen that last week the highest mortality occurred in the town of Narainganj (120·1) and the lowest in Krishnagar (5·7).

Measured by last week's mortality, the highest annual death-rates from cholera, fever, bowel-complaints and other causes occurred in the following towns :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Narainganj	... 62·1	Rampore Beauleah	39·4	Serampore	... 13·7	Narainganj	... 29·0
Poori	... 39·8	Utterpara	... 37·7			Serampore	... 23·6
Howrah	... 5·7	Jessore	... 36·7			Poori	... 21·0
Dacca	... 3·2	Poori	... 33·6			Hughli and Chinsurah	18·1
		Comillah	... 23·1			Burdwan	... 12·2
						Gya	... 11·6
						Dacca	... 11·0

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3·5 from cholera, against 2·3 per 1,000 in the preceding week; 11·7 from fever, against 14·2; 2·5 from bowel-complaints, against 3·5; and ·3 from injury, against ·4. Small-pox and other causes exhibit the same ratios as in the preceding week, *viz.*, ·1 and 7·5 per 1,000 respectively.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows :—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	26·8	Christians	... 44·8	Under 1 year	... 149·5
Females	24·5	Hindus	... 26·2	1 and under 5 years	... 28·0
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	109	Mahomedans	... 24·4	5 ,, 10 ,,	... 16·5
				10 ,, 15 ,,	... 7·6
				15 ,, 20 ,,	... 13·5
				20 ,, 30 ,,	... 15·0
				30 ,, 40 ,,	... 22·0
				40 ,, 50 ,,	... 28·2
				50 ,, 60 ,,	... 25·5
				60 years and upwards	... 72·0

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

The 15th December 1890. *Sanitary Commissioner for Bengal.*

Increase. Tons.

Grains—
(2) Rice 22

This increase is due to greater despatches from intermediate stations.

Sugar—
(2) Undrained 19

This is due to greater demand at Azimgunj.

Decrease.

Cotton piece-goods—
(1) European 53

Grains
(4) Others 55

Oil-seeds—
(2) Mustard and rape 39

Salt 41

Silk, raw—
(2) Indian 33

All these decreases are due to breach of the line by flood.

R. G. MOOKERJEE,
Manager, Nalhati State Railway.

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of September 1890.

Increases. Tons.

Rice 1,882
From the Northern and Behar Sections principally.
Kerosine oil 673
The increase is due to the opening of Budge-Budge.

Decreases.

Cotton piece-goods 694
Due to suspension of traffic on account of floods.
Jute, unscrewed 14,545
Serajganj, Narayanganj, Goalundo and Pangsa show very large decreases due to suspension of traffic on account of floods.
Jute, screwed 6,031
This decrease was in traffic from Narayanganj and Goalundo, and is said to be due to the same cause as in the foregoing item.

F. P. Quinlan,
Examiner of Accounts.

Printed and published by Edwin Morris Lewis, at the Printing Office of the Bengal Secretariat, Writers' Buildings, in the City of Calcutta, 17th December 1890.

2. The offering is made in commemoration of Sir Steuart Bayley's late visit to Gya, with whose name Babu Rameswar Proshad Narain Singh wishes it to be connected.

3. I would ask you to bring this handsome donation to the notice of His Honour the Lieutenant-Governor, and would suggest that special mention of it should be made in the *Calcutta Gazette*.

4. I ask this more particularly because Babu Rameswar Proshad Narain Singh quite lately gave another handsome donation of Rs. 15,000 towards the Lady Doctor's fund when it was first started—*vide* Government order No. 2, dated 10th April 1890.

RICE CROP OF 1890.

THE following papers are published for general information.

REVENUE DEPT., AGRICULTURE,
CALCUTTA;
The 23rd December 1890.

By order of the Lieut.-Govr. of Bengal,
P. NOLAN,
Secretary to the Govt. of Bengal.

Note on the Final Forecast of the winter rice crop, 1890.

SINCE the issue of the preliminary forecast, dated 2nd October, abundant and timely rain has fallen over the whole province. Except in a few districts of North and East Bengal, where the winter rice crop was damaged to the extent of 2 to 3 annas by excessive rain and floods, the prospects of the harvest have been more or less improved by timely rain in the latter half of September and in October in almost every part of the province. Save in the tracts which have seriously suffered from floods, which form a very small proportion of the total area under rice, a full average crop, or more than a full average crop, may now be expected throughout Bengal. In the Sudder and Chuadanga subdivisions of the Nuddea district, in the Bongong and Jhenidah subdivisions of the Jessore district, and in the Sudder and Sewan subdivisions of the Sarun district, the probable outturn, owing to damage by floods, is reported to be only 8 annas or less, and in them there is, as remarked in the *bhadoi* forecast issued on the 30th October, cause for watchfulness on the part of the local authorities.

2. It has not been found possible in the present forecast to estimate, in tons, the total outturn of rice or the probable amount available for export. The safest indication of the amount likely to be available for export is the amount actually exported in past years when the crop was a full average one, as it is in the present year. The figures noted in the margin show the total exports of rice by sea from Bengal for the past five years. Looking to the fact that the character of the winter and *bhadoi* rice of last year was nearly the same as in the present year, it may be assumed that the quantity likely to be available for export in the coming year will be at least as large as in the present year, and will probably be about 10,000,000 cwt.

Total exports by sea from Bengal.

1887	9,871,108
1888	10,685,218
1889	7,090,919
1890 (for 10 months up to 31st October) ...	7,860,328

M. FINUCANE,
Director of the Department of Land Records and Agriculture, Bengal.

CALCUTTA,
The 10th December, 1890.

II.—*Final Forecast of Winter Rice Crop in Bengal for the year* 1890.

1	2	3	4	5	6	7	8	9	10	11
District.	Sub-division.	Total area of sub-division in square miles.	Total area estimated to be under cultivation in square miles.	Approximate normal area under winter rice.	Approximate area under last year's winter rice.	Estimated area under this year's winter rice.	Taking 16 annas to represent the average outturn, how many annas represented last year's outturn.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officer.	Remarks by the Agricultural Department, Bengal.
							Annas.	Annas.		
Burdwan ...	Sudder	1,242	993	663	466	651	9	14	The crop was affected to some extent by floods and excess of rainfall during transplanting time. The difference between this and the previous forecast is so slight that no explanation is necessary.	In June the rainfall was in excess of the normal, but in July and August, which include the transplanting season, the fall was short of the normal, and not in excess as stated by the Collector, except in the Sudder sub-division, where the fall was in excess in July, but short in August.
	Raneegunge ...	671	398	352	352	352	13	15		
	Cutwa	352	265	217	68	214	4	14		
	Culna	432	350	200	133	203	7	16		
	District Total ...	2,697	2,006	1,432	1,059	1,417	8 to 10	About 15		
Bankoora ...	Sudder	1,921	670	570	570	570	12	16	In the current year the weather was favourable, except in the months of August and September, when the young plants suffered to some extent for want of sufficient rainfall. In the Bishenpore sub-division, which differs from the Sudder in agricultural conditions, the unfavourable state of the weather in August and September so far affected the crop as to reduce the outturn formerly estimated from 16 to 14 annas.	The rainfall appears to have been well distributed and in excess of the normal up to end of July: in August the fall was to judge from the meteorological returns, very deficient. At Bankoora only 4·25 inches of rain were recorded in the first four weeks of August against the normal fall of 13·51 inches, and at Bishenpore, 3·52, against 14·51 inches. The transplanting operations appear to have suffered from this deficiency, particularly in the Bishenpore sub-division.
	Bishenpore ...	700	350	290	290	290	14	14		
	District Total ...	2,621	1,020	860	860	860	13	15		
Beerbhoom ...	Sudder	1,108	777	694	604	620	16	20	The rainy season has throughout been almost ideally perfect in Beerbhoom. Good rain in June (and very early in June too), very heavy rain in July, good sun in August, sufficient rain in September and a crowning mercy of mild rain in October. It is hardly possible to conceive of better than this. Floods do not trouble this district, and there has been no abnormal condition: the land is bearing about as much as it can produce.	
	Rampore Hât ...	648	468	350	324	400	15	20		
	District Total ...	1,756	1,245	954	928	1,020	15½	20		
Midnapore ...	Sudder	3,283	1,799·5	1,255	1,242	1,252·5	14	14	Owing to deficiency of rainfall there has been a partial failure of crops almost throughout the whole district. On account of deficiency of rainfall at the time of sowing, the lands could not be wholly cultivated, and again owing to the excess of rainfall in November the crop was damaged to some extent. Owing to rainfall in October some lands that were not cultivated at the time of the former report were cultivated, and hence the difference in area under this year's winter rice.	In the Sudder and Contai sub-divisions the rainfall was very scanty in July and August, only 11·66 inches having fallen at Midnapore during these two months, against the normal fall of 26·42 inches, and 10·3 inches at Contai against 28·63 inches. In Ghattal and Tumlook the fall was slightly short of the normal, though quite sufficient in July, but in August it proved to be very scanty (4·25 inches and 6·5 inches against 16·05 and 14·56 inches respectively).
	Contai	881	713	645	641	617	13	12		

1	2	3	4	5	6	7	8	9	10	11
District.	Sub-division.	Total area of sub-division in square miles.	Total area estimated to be under cultivation in square miles.	Approximate normal area under winter rice.	Approximate area under last year's winter rice.	Estimated area under this year's winter rice.	Taking 16 annas to represent the average outturn, how many annas represented last year's outturn.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officer.	Remarks by the Agricultural Department, Bengal.
Midnapore—*concld.*	Tumlook ...	630	465	435	435	435	Annas. 14	Annas. 16	Although there was scanty fall of rain during the transplanting season, this part of the district being low, there was no marked damage as was apprehended. The copious fall of rain in September and October did much good to the crops.	
	Ghatal ...	266	228	206	206	206	13	14	Owing to deficiency of rainfall during the ploughing season and also owing to scantiness of rainfall in September, two annas of the crop on the whole has been damaged.	
	District Total ...	5,119	3,203·5	2,541	2,524	2,510·5	134	14	...	The rainfall was scanty all over the district throughout the season, the following being the figures for rainfall in July and August :—
Hooghly ...	Sudder	443	276·25	221	221	221	8	16	...	Actual. Normal. Sudder ... 13·90 25·22 Serampore ... 16·49 26·09 Jehanabad ... 22·89 29·23 Howrah ... 17·38 25·94 Oolooberiah ... 13·96 28·38
	Serampore ...	343	226	167	157	157	14	16	Deficiency of rain at ploughing and sowing time affected the crop to the extent of two annas, but the balance is an exceptionally fine crop and brings the harvest up to at least an average one. A loss of 2 annas is due to deficiency of timely rain and to Damoodar flood.	The crop is likely to have suffered from this cause, especially in the Sudder and Oolooberiah sub-divisions.
	Jehanabad ...	283	226	151	151	131	14	14	.....	
	Howrah	171	109	95	83	95	14	16	There was deficiency of rain during the rainy season and also later on.	
	Oolooberiah ...	205	200	170	156	140	16	16		
	District Total ...	1,097	1,037·25	774	747	744	13	About 16		
24-Pergunnahs.	Sudder	1,070	717	593	575	590	16	15	The scanty fall of rain at the sowing season and the unequal distribution of rain affected the crop of the current year. The heavy fall of rain followed by the floods in a small area of the Basirhat sub-division reduced the former estimate by one anna.	The rainfall was seasonable and sufficient in May and June. In July and August the fall was scanty, particularly in Baraset. The recorded fall in July and August was 16·79 inches against the normal fall of 25·76 inches.
	Diamond Harbour ...	513	413	445	445	446	16	16		
	Baraset	342	243	183	182	183	16	12		
	Basirhat	630	430	333	309	333	16	13		
	Barrackpore ...	42	12	6	6	6	16	12		
	Dum-Dum	86	86	24	27	30	16	16		
	District Total ...	2,603	1,900	1,368	1,552	1,588	16	14		

KHOOLNA ...	Sudder	1,572·40	396	305	317	302	15	12	Heavy rain during the sowing season and the floods have affected the outturn of the winter rice crop.	The rainfall during April, May, and June, which include the sowing season, was not particularly heavy in the district, except in June, in the Bagirhat sub-division. The estimates of outturn appear to be too low.
	Satkhira	1,272·88	449	321	309	309	14	9		
	Bagirhat	1,508·63	520	308	300	300	14	14		
	Area of boundary, khals, and rivers of Sunderbuns in this district.	496	.....	.....	.....	.....	.....	.....		
	District Total ...	4,849·91	1,359	934	917	911	14	11		
NUDDEA ...	Sudder	701	484	159	159	159	5	3	The rainfall has been favourable to the crop, but a considerable portion of it has been destroyed by the floods. The prospects of the crop in Chuadanga have changed for the better since the date of the first forecast.	The rainfall, although slightly deficient in August, was on the whole favourable. The losses must be wholly ascribed to floods. If the outturn in the Sudder and Chuadanga sub-divisions is as low as reported, there is cause for watchfulness and apprehension of distress.
	Kushtea	588*	441*	330*	104	110	8	10		
	Meherpore ...	627	500	62	62	62	12	10		
	Chuadanga ...	457	272	60	60	60	8	3		
	Ranaghat	427	236	64	64	64	8	10		
	District Total ...	2,780	1,953	675	449	455	9	About 7	The inundation has destroyed about one-fourth of the winter rice crop.	
JESSORE ...	Sudder	889	475	260	260	260	16	12	For insufficiency of rainfall at the sowing season, a portion of the land annually sown with winter rice remained fallow. The crop has this year been mostly destroyed by the floods.	
	Bongong	649	389	259	240	240	10	4		
	Narail	497	293	200	200	225	18	16	In the first forecast the outturn was estimated at 12 annas, as it was apprehended that the flood would cause much damage to the crops. The prospect has since changed for the better and a 16-anna outturn is estimated.	
	Jhenidah	475	317	100	100	100	12	8	The early inundation has destroyed about a moiety of the winter rice crop.	
	Magurah	425	268	128	128	1	16	14	A little damage has been done by floods.	
	District Total ...	2,925	1,742	947	928	953	144	11		
MOORSHEDABAD.	Sudder	767	576	84	84	94	8	10	Late sowing owing to deficient rainfall and unusual floods affected the outturn of this year's crop in parts.	
	Lalbag	372	223	204	280	198	10	13		
	Jungipore	508	351	63	63	63	18	15		
	Kandi	512	353	235	235	233	17	18		
	District Total ..	2,159	1,503	586	582	578	14	14		
DINAGEPORE ...	Whole district ...	4,118	2,600	2,000	1,950	2,000	16	18	There would have been a bumper crop but for the damage done to the crops of lowlands by excessive rain. Excessive but timely rain throughout the sowing season has caused the prospects of the crop this year to be better than those of last year's.	
RAJSHAHYE ...	Sudder	944	588	300	336	300	17	14	The inundation caused by the heavy showers of the latter part of September has damaged the crop to some extent at the Sudder sub-division, and so the outturn has been reduced by 1½ annas. Though flood has done some injury to the crops both at Nattore and Nowgong sub-divisions, still good outturn is expected.	
	Nattore	817	612	590	578	590	14	15		
	Nowgong	603	500	300	300	280	20	16		
	District Total ...	2,364	1,700	1,190	1,214	1,170	17	15		

* During the current year Chur Meerchader, having an area of 30 square miles, was transferred from the Rajshahye district to the Kushtea sub-division; hence the increase over those hitherto shown in crop forecasts.

1	2	3	4	5	6	7	8	9	10	11
District.	Sub-division.	Total area of sub-division in square miles.	Total area estimated to be under cultivation in square miles.	Approximate normal area under winter rice.	Approximate area under last year's winter rice.	Estimated area under this year's winter rice.	Taking 16 annas to represent the average outturn, how many annas represented last year's outturn.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officer.	Remarks by the Agricultural Department, Bengal.
							Annas.	Annas.		
Rungpore	Sudder	1,151	900	675	675	675	10	16	The unusual flood and overflowing of the river have damaged the crop. Owing to this cause the previous estimate of the crop in the Nelphamari, Kurigram, and Gyabanda sub-divisions has been reduced.	
	Nelphamari	638	480	365	360	365	12	12		
	Kurigram	937	700	500	500	500	16	13		
	Gyabanda	760	580	440	440	470	14	13		
	District Total	3,486	2,660	1,980	1,975	2,010	13	13½		
Bogra	Whole district	1,452	913	440	440	440	17	13	The rainfall this year was plenteous and timely up to 26th September. Since then excessive falls and floods have destroyed some and damaged more of the crop, especially in the north and north-west of the district, and have reduced the previous estimate.	
Pubna	Whole district	1,847	1,462	639	574	623	13	12	Owing to the excessive rain and sudden rise of the rivers, the standing crops have been further damaged to the extent of 3 annas.	
Darjeeling	Sudder, including Kalimpong.	726	92	16	16	16	14	12	The heavy rains caused this year's outturn to be less than that of last year. No winter rice crop is grown in the Kurseong sub-division. The crop has suffered less in Siliguri than was expected from heavy rains; hence the increase of the estimate of outturn.	
	Kurseong	185	.....	.....	.....	.....	.....	.....		
	Siliguri	253	180	95	94	95	15	15		
	District Total	1,164	272*	111	110	111	14½	14		
Jalpaiguri	Bykantapore	447	298	180	180	160	10	14		
	Boda	402·72	295	182	180	181	12	11	Rainfall has been heavy but well distributed so far as the rice crop is concerned.	There was a constant downpour of rain in June and July. At Jalpaiguri the rainfall was 40·82 and 41·46 inches in June and July, respectively, against the respective normals of 29·12 and 26 inches. In June there were only three rainless days, and in July only one. The seedlings must have suffered to a certain extent from this cause, and transplantation on lowlands was impeded.
	Patgram	86·68	75	48	45	47	12	13		
	Mynaguri	524	219	109	125	141	12	14		
	Alipore	649	200	120	100	120	13	14

	Bholka	132	44	40	40	40	12	14		
	District Total	2,737·90	1,301	759	750	789	12	13½		
Dacca	Sudder	1,206	633	422	422	422	14	12	Extraordinary high floods and strong gales in September and October caused much damage to this year's crop in the Sudder and Manickgunge sub-divisions, and hence the outturn is reduced.	
	Manickgunge	459	306	274	274	274	12	8		
	Rajbari	491	300	90	90	90	12	12		
	Faridpore	641	360	90	90	90	16	16		
	District Total	2,797	1,599	886	886	886	14	12		

FURREEDPORE	Sudder	860	662	451½	429	383	14	10	The plants in low lands have be considerably damaged by floods.
	Madaripore ...	979	652	440	440	440	14	12	The state of winter rice crop in the *bil* lands is reported to have improved since the submission of the last report.
	Goalundo	428	321	214	214	214	12	14	Damaged in places by floods, but on the whole a 14-anna crop may be expected.
	District Total ...	2,267	1,575	1,105½	1,083	987	13½	12	
BACKERGUNGE	Sudder	1,111	698	450	450	450	16	16	Season conditions have been normal, except that in places slight damage was done by floods.
	Perosepore ...	692	500	370	370	370	14	16	
	Bhola	615	400	250	250	250	16	16	
	Patuakhali ...	1,231	800	350	350	550	16	16	
	District Total ...	3,649	2,098	1,420	1,420	1,420	16	16	
MYMENSINGH	Sudder	1,849	1,070	400	375	400	18	16	The outturn of *aman* rice crop is expected to be fair. The unusually high flood has not considerably damaged the crop.
	Tangail	1,061	780·75	365	351	365	16	16	
	Jamalpore	1,244	930	367	415	289	14	13½	The crop was affected to some extent on account of excessive rain in September.
	Netrokona ...	1,389	694	550	500	500	12	16	The estimate of 14-anna crop is not likely to have been affected by the rainfall, as was apprehended in the last report.
	Kishoregunge ...	744	350	150	175	180	14	14	
	District Total ...	6,287	3,824·75	1,862	1,816	1,734	15	15	
TIPPERAH	Sudder	1,142	856	599	599	599	16	16	Since the submission of the former report timely rain has done much good to the crop.
	Brahmanneria ...	769	553	359	359	375	19	16	The high flood-water partially damaged the winter rice in some places.
	Chandpore ...	580	415	300	300	300	18	18	Rain at intervals, after the submission of the last report, has improved the condition of *aman* crop.
	District Total ...	2,491	1,824	1,258	1,258	1,274	18	About 17	
NOAKHALLY	Sudder	1,298	1,000	666	578	619	18	13	The decrease in the outturn is due to unequal distribution of rain at the sowing, transplantation, and harvesting time. Excessive rain and flood (and partly insects) have damaged the crop.
	Fenny	343	280	216	216	216	18	12	
	District Total ...	1,641	1,280	882	794	835	18	12½	
CHITTAGONG	Sudder	1,630	611·25	382	382	382	19	16	Heavy rainfall in the months of July and August did not do much damage. The outlook is promising.
	Cox's Bazar ...	937	654·78	582	466	582	19	16	The season throughout has been a most favourable one. A full harvest is expected.
	District Total ...	2,567	1,266·03	964	848	964	19	16	

The Collector's remark as to the irregularity of rainfall in the Sudder subdivision is not at all borne out by the meteorological returns. The character of the rainfall here was the same as in Fenny. There was slight excess of rain (only 3 inches) in Fenny subdivision in July; in June and August it was less than the normal. In September the fall was considerably short, and in October slightly in excess, of the normal. The loss of paddy must therefore be ascribed to floods.

In July the rainfall was exceptionally heavy (51·2 inches against 22·13 inches), but in August it appears to have been normal.

* This includes the area under tea cultivation.

1		3	4	5	6	7	8	9	10	11
District.	Sub-division.	Total area of sub-division in square miles.	Total area estimated to be under cultivation in square miles.	Approximate normal area under winter rice.	Approximate area under last year's winter rice.	Estimated area under this year's winter rice.	Taking 16 annas to represent the average outturn, how many annas represented last year's outturn.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officer.	Remarks by the Agricultural Department, Bengal.
HITTAGONG HILL TRACTS.	Sudder	3,583·5	43·25	7	7·5	5·8	12	14	The heavy and continuous rainfall throughout the ploughing time and proportional rain after transplantation this year were favourable to the winter rice, and a 14-anna crop may be expected.	The Commissioner remarks that, from information received from Mr. Pughe and Captain Shakespear, it seems probable that the crop beyond the frontier will be a bumper one. If the rainfall proved favourable, why should not an average crop be expected?
	Sungoo	1,835·5	23·86	4	4	3·5	12	14		
	District Total ...	5,419	67·11	11	11·5	9·3	12	14		
ATNA ...	Sudder	617	457	216	216	200	15	14	The outturn has been affected by excessive rainfall and flood, but the fall of *hatiya* rain has done much good to the crop and increased the estimate to 14 annas.	
	Dinapore	143	118	52	52	50	12	10	This year's crop has been greatly damaged by flood and excessive rain.	
	Barh	526	405	120	141	109	13	18	Seasonable rainfall at the time of ploughing and transplanting, and the *hatiya* rains particularly, give hopes of a bumper crop. There having been rain both at the end of September and the second week of October, the outturn of winter rice crop has been put down at 18 annas.	
	Behar	793	575	352	352	352	11	16	The rainfall this year has been very favourable for the winter rice crop throughout the season.	
	District Total ...	2,079	1,555	740	761	711	13	15		
RA ...	Sudder ...	1,339	1,434	775	968	775	12	16	Excess of rain at the sowing and transplantation season has caused the decrease in area under winter rice by one-fifth of that of the last year's cultivation.	
	Aurungabad ...	1,246	747	336	340	340	12	16	.....	
	Jehanabad ...	607	503	325	325	325	8	14	.....	
	Nowada ...	1,020	765	573	480	587	14	14	Two annas out of 16 annas were damaged for want of rain in September 1890.	
	District Total ...	4,712	3,449	2,009	2,113	2,027	13	15		

SHAHABAD ...	Arrah	915	778	389	389·25	390	14	17	The continuous excessive rainfall just after the crop was sown prejudiced the prospects of a bumper crop, but afterwards *hatiya* rain made up the loss. Lately, however, the appearance of a crop disease called *dakhisara* has again marred the prospects. The outturn has been a little more than average.
	Buxar	656	563	282	282	282	12	14	The heavy and continuous rainfall is likely to prove favourable to the winter rice, and a 14-anna crop may be expected.
	Sasseram	1,495	850	430	374	415	10	15	*Hatiya* rain came on copiously, so a good harvest is expected.
	Bhaboca	1,301	976	488	400	450	12	18	The rain has been sufficient and, as reported in my first forecast, a bumper crop is expected this year.
	District Total ..	4,365	3,167	1,639	1,445·25	1,537	12	16	
DURBHUNGA ...	Sudder ...	1,222	929	586	585	585	17	12	Excessive rainfall and floods in August affected the outturn this year. The *hatiya* rainfall improved the crop of the Samastipore sub-division, but did not fully counteract the damage already done by excessive rain.
	Samastipore (Tajpore). ...	764	611	259	192	259	16	12	
	Madhubani .	1,349	1,100	800	719	700	18	16	
	District Total ...	3,335	2,640	1,645	1,496	1,544	17	Over 13	
MOZUFFERPORE.	Sudder ...	1,218	957	602·52	602·32	560	12	16	Floods swamped large tracts in these two sub-divisions and destroyed the rice crop; hence the area cultivated with rice was reduced. Over the area not affected by floods, a full crop may be expected, the later rain having been most opportune and beneficial.
	Hajeepore ...	771	529·6	204·31	204·31	170	14	14	The rain which has fallen since the last report has greatly improved the condition of the crops, ensuring a good outturn from the late as well as early transplantation.
	Sitamarhi ...	1,014	770·64	500	481·64	500	16	18	The sub-division suffered very slightly on the whole from the floods, so far as the rice crop is concerned, while the timely and abundant rain at the end of the season has ensured an excellent crop on the higher lands, which form a large proportion of the cultivated area. A more than 18-anna crop is thus expected.
	District Total ...	3,003	2,257·24	1,307·13	1,288·77	1,230	14	16½	
SARUN ...	Sudder	998	849	235	217	217	14	5	Transplantation was effected with facility owing to favourable rainfall, but subsequently the crop was damaged by heavy rainfall, floods and want of sun. In most low lands the crop was entirely lost. On the floods subsiding transplantation was done again in many places, but the seedlings were destroyed by the floods, and paddy could not be retransplanted in all places. The land where paddy failed will be sown with *rabi* crops. The *hatiya* rain exceedingly benefited the rice crop and raised its prospects from 2 annas, as previously estimated, to 5 annas.
	Sewan	883	693	255	255	275	8	8	The continuous heavy rainfall damaged the paddy much, and in consequence the outturn will be less than was estimated before.
	Gopalgunge ...	771	550	180	239	180	14	14 .	The unusually heavy rains in July and August damaged the transplanted paddy, a part of which had to be replanted, and about one-fourth of the whole area under paddy was not replanted at all for want of seedlings.
	District Total ...	2,652	2,092	660	711	672	12	9

	District Total ...	4,268	3,065	1,980	2,054	2,064	13	16		
Purneah ...	Sudder	2,872	1,500	600	600	600	12	14	The rainfall was favourable both in the ploughing and sowing time, but the flood has destroyed a part of the crop here and there. Floods were more destructive last year in the Sudder sub-division than this year.	
	Kishengunge ...	1,340	900	600	500	600	16	18	The rainfall in September has benefited the crops: hence the outturn is expected to be 18 annas.	
	Arrareah ...	1,044	600	400	400	400	17	16	There has been a sufficient and timely rainfall. But in parts of thanas Ranigunge and Matiari there has been a slight damage done to the crops by floods.	
	District Total ...	4,956	3,000	1,600	1,500	1,600	15	16		
Malda ...	Whole district ...	1,902	1,068	450	450	450	16	16	For sufficient rainfall during the months of September and October the outturn is expected to be 16 annas.	

SONTHAL PERGUNNAHS.	Dumka	1,429	710	366	354	360	12	18	Owing to abundant and seasonable rain, the former estimate is increased by 2 annas.	
	Deoghur	964	358	198	198	193	16	18		
	Godda	967	676	450	409	420	13	16		
	Rajmehal	740	555	381	381	381	16	12	.....	The low estimate of outturn for Rajmehal is not explained by the Deputy Commissioner. In May the fall was slightly deficient (3·18 against 4·93 inches), but was well distributed over the latter half of the month. In June and August the fall was slightly in excess of the normal, and in July slightly deficient. In September and October, the fall was copious and well distributed. On the whole, the fall was such as would meet all the requirements of the crop.
	Pakour	683	511	410	410	410	16	18	The crop in the villages east of the Pakour thana was somewhat injured by flood.	
	Jamtara	696	195	199	99	199	13	19	Deficiency of rainfall at the sowing time affected the winter rice.	
	District Total ...	5,469	2,905	1,809	1,753	1,824	14½	About 17		
CUTTACK ...	Sudder	989	773	578	578	576	16	14	The somewhat low outturn in the Sudder sub-division is due to deficient rainfall at the time of sowing (June, 12·24 inches against the normal, 18·34 inches). The outturn is less than the average in the Kendrapara and Jajepore sub-divisions owing to deficient rainfall in August. In Kendrapara the crops of a portion of the Kujong estate were damaged by the storm-waves of 30th June 1890.	In August the rainfall recorded at Cuttack was in excess of the normal (14·03 against 11·64 inches); at Kendrapara it was 9·12 against 13·24, but not so scanty as to reduce the crop by 4 annas, in July the rainfall having been normal; at Jajepore, there was marked deficiency in August (5·49 against 11·74 inches). The rainfall throughout the season in the Sudder sub-division, although somewhat in excess in July, was very well distributed, and there is no reason why an average crop should not be expected.
	Banki	116	60	36	36	36	16	16		
	Kendrapara ...	1,424	641	511	452	499	12	12		
	Jajepore	1,104	500	450	450	450	16	13		
	Angul	.....	.....	.....	.....	.....	.....	.....		
	District Total ...	3,633	1,973	1,575	1,516	1,561	15	13		
BALASORE ...	Sudder	1,188	670	589	589	589	9½	13	The outturn this year is less than average owing to excess of rainfall at the time of sowing and insufficient rain in July, August, and first half of September.	The rainfall in June was in excess of the normal in all places, but was not of an exceptional character. In July and August, however, the fall was singularly scanty in all places: at Balasore only 5·7 inches fell in July against the normal fall of 11·89 and 7·86 inches in August, against 12·78 inches.
	Bhuddruck ...	909	720	580	580	580	14	12		
	District Total ...	2,066	1,390	1,169	1,169	1,169	12	12½		
POOREE ...	Sudder	1,530	720	506	506	516	14	16	Owing to excessive rain at the time of sowing up to the present date the outturn of the winter rice crop has been estimated at 16 annas in the Sudder sub-division; but if there be heavy showers or high winds in the present month, the outturn will be much lessened. There is at present (1st November) very unsettled and rainy weather, which, as well as the untimely rain at the end of October, have affected the outturn of Khurda sub-division, where the crop is far advanced.	Early in July the rainfall was very excessive; on the 2nd 8·24 inches were recorded at Khurda and 6·22 inches at Pooree.
	Khurda	990	415	251	251	251	14	14		
	District Total ...	2,520	1,135	757	757	767	14	15½		
HAZARIBAGH	Hazaribagh ...	4,575	2,593	1,124	1,124	1,124	14	20	Throughout the district the rainfall was excessive both in July and August, and therefore favourable for rice crops both in sowing and transplanting seasons; and as sufficient rain fell both in September and October, a bumper crop is expected this year.	The rainfall in June and July was in excess of the normal. In August the fall was short of the normal; at Hazaribagh it was 10·99 inches against the normal fall of 12·87 inches, and at Giridih 9·57 inches against 11·90 inches, but the fall being well distributed and sufficient, the slight deficiency could do no harm.
	Giridih	2,446	1,280	555	555	555	18	20

DISTRICT.	SUB-DIVISION.	Total area of sub-division in square miles.	Total area estimated to be under cultivation in square miles.	Approximate normal area under winter rice.	Approximate area under last year's winter rice.	Estimated area under this year's winter rice.	Taking 16 annas to represent the average outturn, how many annas represented last year's outturn.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officer.	Remarks by the Agricultural Department, Bengal.
LOHARDUGGA	Sudder	7,784	1,662	1,455	1,298	1,420	14	14	In the last report the outturn in Palamow was estimated at 14 annas, but subsequently it has been reduced to 12 annas. The showers in the latter part of the season improved the prospects of the crop.	The rainfall in June and July was slightly in excess of the normal and was well distributed; in August the fall was much in excess of the normal at Lohardugga and Palamow, but short at Ranchi. Excess of rain cannot have done harm at this time. No reason is assigned why the crop should be less than the average, or why the previous estimate has been reduced by 2 annas.
	Palamow	4,260	2,000	852	852	600	10	12

	District Total ...	4,147	1,660	863	686	863	15	17		
SINGHBHOOM ...	Kolhan	1,946	973	450	450	425	13	13	The deficient outturn is due to want of sufficient rain. The crop was slightly improved by the late rain.	In June the rainfall was seasonable and sufficient to judge from the rainfall returns, but in July it was rather scanty, 9·42 inches against 14 inches at Chyebassa. In August and up to the 12th September the fall was still scantier, only 3·2 inches having been recorded at Chyebassa in August, against the normal fall of 13·2 inches and 1·06 inch in the first 12 days of September against the normal fall of 4·32 inches.

Final Note on the outturn of the bhadoi crops, 1890.

AT the time of the preparation of the preliminary *bhadoi* forecast (15th September), most of the *bhadoi* crops had been harvested, and the remainder was nearly ready for the sickle. Deficiency or excess of rainfall after that date could not have affected these crops to any appreciable extent. The estimates of outturn consequently remain unaltered except in a few districts where slight changes have been made, as the result of further enquiries instructed by the local officers since the submission of their preliminary forecasts.

M. FINUCANE,

Director of the Dept. of Land Records and Agriculture, Bengal.

CALCUTTA,
The 10th December 1890.

II(a).—Final report on bhadoi crops in Bengal, 1890.

1	2	3	4	5	6	7		9	10	11	12
District.	Sub-division.	Total area of sub-division in square miles.	Total area estimated to be under cultivation in square miles.	Approximate normal area under bhadoi crops.	Approximate area under last year's bhadoi crops.	Estimated area under this year's bhadoi crops.	Names of principal bhadoi crops.	Taking 16 annas to represent the average outturn, how many annas represented last year's outturn.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officer.	Remarks by the Agricultural Department, Bengal.
								Annas.	Annas.		
Burdwan	Sudder	1,242	993	139	111	130	Early paddy—Aus, kelash and nehali.	10	12	The crops were partially affected by excess of rainfall at the sowing time and by floods before harvesting time.	
	Raneegunge	671	398	30	30	30	Aus paddy	13	15		
							Biri kalai				
							Jowar				
	Cutwa	553	285	33	22	32	Early paddy—Toca	8	12		
							Nehali				
							Jhanti				
							Kalsi				
	Culna	432	350	100	80	100	Aus paddy	10	16		
	District Total ...	2,697	2,006	302	243	292		10½	14		
Bankoora	Sudder	1,921	670	45	45	45	Early paddy—Aus, kelash, tetko and chali.	14	16	Deficiency of rainfall in August and September affected to some extent the growth of the plants, or there would have been a bumper crop.	
	Bishenpore	700	350	43	43	43	Aus and kelash paddy	16	16		
	District Total ...	2,621	1,020	88	88	88		15	16		
Beerbhoom	Sudder	1,103	777	170	173	157	Bhadoi paddy—Aus, bora	16	20	The rainy season has throughout been almost ideally perfect in Beerbhoom.	In the latter half of June and throughout July the rainfall was considerably in excess and incessant in the Sudder sub-division. In the Rampore Hat sub-division, there was considerable excess in June, but in July the fall was nearly normal. Some damage is likely to have been caused in the Sudder sub-division by excess of rainfall.
							Tora				
	Rampore Hat	648	468	73	64	68	Bhadoi paddy—Aus, kalma	15	20		
							Mahepal				
							Bonous				
							Neyali				
							Bhoosa				
	District Total ...	1,751	1,245	243	237	225		More than 15	20		
Midnapore	Sudder	3,252	1,799·5	419	390	399	Aus paddy	13½	10	Deficiency of rainfall at harvesting time is the cause of short outturn.	
							Til		18		
							Jowar		9		
							Biri		13		
	Contai	881	713	68	69	58	Aus paddy	14½	10	Owing to the deficiency of rainfall at the time of ploughing and sowing and growth, the bhadoi crops have been partially damaged.	
							Biri		8		
							Til		16		
							Hemp		12		
							Jute		12		
	Tumlook	620	465	38	38	38	Aus paddy	15	8	The deficiency of rainfall in July and August (i.e. at the transplanting time), as well as the excess of rainfall in September and October, i.e. in the harvesting season, caused great damage to the crop.	In July and August taken together, the rainfall was deficient all over the district, particularly in the Sudder and Contai sub-divisions; the mean actual rainfall of the district during these two months having been 13·37 against 27·01 inches. In May the fall was nearly normal, and in June considerably in excess of the normal in all parts of the district; the deficiency of rainfall at the time of ploughing and sowing noticed against Contai is not borne out by rainfall records.

TIPPERAH ...	Sudder	1,142	856	171·3	171·3	171·3	Early paddy— Kamini shail ... Kali do. ... Dhali do. ... Kacholani ... Bailam ... Muri ...	14	12	Owing to excessive rain and inundation the crops were partially damaged in some places at the harvesting time.	
	Brahmanberia ...	769	553	138·42	138·42	138·42	Early paddy— Jeto jali ... Asari do. ... Satia do. ...	18	12	Frequent rains during the time of sowing and weeding and the flood reduced the yield.	
	Chandpore ...	580	415	60	60	60	Aus paddy	16	14	Flood in harvesting time reduced the yield.	
	District Total ...	2,491	1,824	369·72	369·72	369·72	.....	16	About 13		
NOAKHALLY ...	Sudder	1,298	1,000	238	324	238	Early paddy— Sholoi ... Green ... Bailam ... Sultanbhoog ... Shatia ... Kalimooga ... Harali ...	15	10	Excessive rain in March while sowing was going on, and in July and August while the crops were being cut and harvested, affected the outturn.	
	Feneg	343	280	85	85	85	Early paddy— Chegaal ... Sholoi ... Shatia ... Bailam ... Bhadori ...	12	12	The crop has been damaged by excess of rain, flood and insects, to the extent of four annas.	
	District Total ...	1,641	1,280	323	409	323	.....	13½	11		
CHITTAGONG ...	Sudder	1,630	611·25	152·8	152·8	115	Early paddy— Bailam ... Chiknal ... Khaia ... Shaitha ...	18	12	Heavy rainfall in June and July affected the crop injuriously, and the yield has not been more than 12 annas this year.	The cause for the decrease in the area sown this year, as compared with the normal area under bhadoi crops, is not shown.
	Cox's Bazar ...	937	654·68	20·15	20·15	20·15	Early paddy— Pania paddy ... Khaia ...	18	18	This has been a favourable season.	To judge from the rainfall records there was no excess of rain in the Chittagong district in June; the recorded fall in this month was short of the normal at every station except Cox's Bazar, where the excess amounted to only 1 inch. At Chittagong the difficiency was nearly 6 inches, and the number of rainy days fewer in the month
	District Total ...	2,567	1,266·03	172·95	172·95	135·15	.....	18	15		In July the fall was excessive, being 49·23 against 28·22 inches.

Jessore	Jhenidah	475	317	60	60	60	Aus paddy	12	6	The early inundation has destroyed the greater part of the aus paddy which was about to be harvested. In the second forecast of jute, 16 annas were shown to be the estimated outturn, but the early inundation has since destroyed about 3 annas of the crop; hence the difference.
							Jute	12	13	
	Narail	487	253	30	30	28	Aus paddy	8	6	Early rise of water first destroyed the plants when they were young, and subsequent flood destroyed the ripe paddy.
	Magurah	425	268	84	84	84	Aus paddy	6	8	The crops were affected by excess of rainfall at harvesting time and by flood.
							Jute	12	14	
							Til	4	8	
							Indigo	13	6	
	District Total ...	2,925	1,742	578	578	576	.....	11	10	
Moorshedabad ...	Sudder	767	576	320	320	320	Aus paddy	8	4	
	Lalbagh	372	223	7½	7½	7½		8	6	
	Jungipore	508	351	120	120	120	Aus paddy	10	9	Deficiency of rain at ploughing and sowing time caused late sowings. Floods caused most damage being early, and catching the crop which was late, on account of the sowings being late.

It has damaged the jute crop on low lands and the grass to a greater extent than was anticipated in the preliminary forecast.	

Chittagong Hill Tracts.	Sudder	3,583·5	43·25	36	37·45	35·50	Jum paddy	10	10	In many cases jum cutting this year was retarded as the hill-people were engaged in cooly work; consequently almost all jums cut later were not sufficiently burnt. Incessant rain too throughout the season has washed away the earth from the roots of the plants and promoted weeds. These causes have reduced the outturn to some extent.	In the latter half of June and in July the rainfall was very heavy and incessant in the Patna district except ing Barh where the excess was not appreciable.

District.	Sub-division.	Total area of sub-division in square miles.	Total area estimated to be under cultivation in square miles.	Approximate normal area under bhadoi crop.	Approximate area under last year's bhadoi crops.	Estimated area under this year's bhadoi crops.	Names of principal bhadoi crops.	Taking 16 annas to represent the average outturn, how many annas represented last year's outturn.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officer.	Remarks by the Agricultural Department, Bengal.
BHAGULPORE —*contd.*	Madhepura ...	872	566	175	175	175	Marua	Annas. 10	Annas. 12	Marua has been affected by excess of rainfall at harvest time, and bhadoi paddy was slightly damaged by heavy flood.	In Madhepura the rainfall was in excess in June (13·61 against 9·31); in July it was still heavier (23·5 against 12), but there was plenty of fine weather, the number of rainy days being only 13 against 15·4; hence the bhadoi crops did not suffer so much here as in other parts of the district from excessive rainfall. In August the fall was normal with plenty of fine weather. There was no rain in the first-half of September. It does not therefore appear how marua harvest can have been interfered with by excess of rainfall at harvest time. The injury was probably caused by excess in June and July.
							Bhadoi paddy	16	16	Insufficient rainfall at ploughing time, unequal distribution at the sowing time, and continued rain in July and August, caused injury to marua plants; but the conditions were beneficial to the bhadoi paddy, which was further improved by a good deal of hatua rain. The estimated outturn of this crop has been therefore increased by 2 annas.	
	Socpole ...	1,275	954	280	239	239	Bhadoi paddy	16	16		
							Marua	8	8

PURNEAH ...	Sudder ...	2,572	1,500	700	643	650	Aus paddy	8	12	The rainfall was on the whole favourable both in ploughing and sowing time, but damage was done at the harvesting time by flood caused by excess of rainfall. This caused the deficiency of four annas.	The rainfall in the Sudder and Kissengunge sub-divisions was very heavy in June (20·1 and 25·4 against 10·8 and 15·3 inches respectively) and moderately heavy in July; but no injury from this excess is noticed by the Collector.

MALDAH	Whole district ...	1,902	1,008	425	423	425	Bhadoi paddy ..	8	6	Just after sowing, the crops suffered to some extent from the rains being partial, and when earing, the unusual and untimely inundations damaged them to a great extent. Jute and mulberry were not so much damaged as was originally expected.	The cause of the low outturn is not understood. In June and July the rainfall was nearly normal, and there was no unusual stretch of rainless weather. The injury from inundation to the winter rice crop appears from the winter rice forecast to have been small; it should be less in the case of upland *bhadoi* crops.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.

The humidity of the atmosphere is expressed as percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. Under the head District observations of rainfall the normal means, the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. Cloud amounts represent the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means, the district standing in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell. Their means of the district are the numerical average of the rainfall return received in the districts, viz., from total rainfall of the subdivisional stations.

Statement of Rainfall in Bengal for the week ending Friday (8 a.m.), the 19th of December 1890.

Meteorological division.	District.	Station.	Rainfall. Saturday, 13th December.	Sunday, 14th December.	Monday, 15th December.	Tuesday, 16th December.	Wednesday, 17th December.	Thursday, 18th December.	Friday, 19th December.	Total number of rainy days.	Total Rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May 1890.	Average rainfall from 15th May to date.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the r are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the* 23*rd December* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 19TH OF DECEMBER 1890.

FOR some days before the close of the previous week a fairly well-marked but feeble barometric depression had existed over North Bengal and parts of Central and South-West Bengal, and this had given rise to slightly disturbed weather with rather excessive temperature and with occasional rain showers. On the 12th, or the last day of the week, however it appeared as if the general weather conditions were becoming rather more normal, but on the 13th again a rather rapid fall of pressure took place over Chutia Nagpur and parts of Central and South-West Bengal and Orissa. Pressure on this day was in considerable defect of the normal over Chutia Nagpur and Orissa and the western and south-western parts of South-West Bengal, as well as over parts of North Behar and North Bengal, the defect over other districts being comparatively small, and this was accompanied by rather high temperature, the excess above the normal varying from nearly two degrees at Calcutta to about seven degrees at Cuttack and False Point. Conditions were therefore again somewhat abnormal on this day, and their effect was seen in the somewhat numerous local rain showers which were reported on the 14th in Orissa, South-West Bengal, and Chutia Nagpur From the 13th to the 14th pressure generally rose by small amounts, but still Chutia Nagpur, the south-western stations of South-West Bengal and part of Orissa showed a distinctly defective pressure on the 14th compared to the remainder of the province, and again on the morning of the 15th rain showers were reported from Orissa, but conditions were evidently less disturbed than they were; and though temperature was rather largely in excess of the normal over the whole of the south-western districts, the largest excess temperatures of about 5° and upwards were confined to such stations as Saugor Island, Balasore, Cuttack, and False Point A very rapid rise of pressure had taken place on the 15th, and at many stations it equalled more than a tenth of an inch. This had the effect of bringing the general pressure of the province above the normal, and temperature commenced to fall rather rapidly, though it still was above the normal. The wind current blowing over the province on the 15th was, however, still a little unsteady, though it was evident conditions were less disturbed than they were. On the 16th pressure changes were very small, but the fall of temperature continued, and over a large part of the province temperature was lower than the normal, while also a steady northerly wind current was blowing at almost all stations; so that on this day practically normal cold season conditions were again established. The pressure variations on the 17th and 18th were of little importance, but temperature at the western stations commenced to increase on the 17th, and this increase continued rather rapidly on the 18th; so that on this date at all the western stations the mean temperature was in excess of the normal by amounts ranging up to more than 5° at Dehree, Gya, Ranchee, Chyebassa, and Cuttack. On the 19th, or the last day of the week, pressure commenced to rise more rapidly, and became generally in excess of the normal, and temperature began to decrease at the western stations, though it rose in the centre and east of the province; and on this day the mean temperature was in excess of the normal at practically all stations except a few in the south-east of the province, the excess usually ranging from about 1° up to 5°. A fairly steady northerly wind current was, however, still blowing over practically the whole province on the 19th. It will therefore be seen that the principal feature of the week has been the continued relatively high temperature over the western districts of the province.

Pressure—Has varied rather considerably, as noticed above, but the mean pressure has been very nearly equal to the normal for the week, and about half the stations show slightly defective pressures and half slight excess pressures. The variations are however, rarely more than one or two-hundredths of an inch, and generally pressure has been in excess in Behar and North, East, and South-West Bengal, and below it elsewhere.

Temperature.—The mean temperature for the week has been more than 5° in excess of the normal in Orissa, about two and-a-half degrees in excess in Chutia Nagpur, and about 1° in excess in South-West Bengal and South Behar. In other districts slight defects are shown varying up to 1 2° in North Bengal.

The distribution of temperature during the week and its variation from the normal are best seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with

their normal values for the same period. It will be seen that the variations have generally been largest in the night or minimum temperatures:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending the 19*th of December* 1890.

	Normal mean maximum temperature for the week ending 19th December.	Actual mean maximum temperature for the week ending 19th December 1890.	Variation of actual mean from the normal. Darjeeling	48·9	44·5	—4·4	36·3	33·8	—2·5	42·6	39·2	—3·4

Rainfall.—The rainfall for the week has been rather local. The only district where the falls have been of any importance has been Orissa, which has averaged 0·39 inch. In the districts of South-West Bengal, Chutia Nagpur, South Behar, and East Bengal, the falls have averaged less than a tenth of an inch. North Bengal and North Behar have been rainless, except for a slight shower at Buxa in the Darjeeling Hills district.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 19th of December 1890:—

Meteorological Divisions	Temperature. Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Of lowest of each day.	Of mean for each day. The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≏, dew; ≡, fog.

MEMORANDUM.

Quarterly review of births and deaths registered in twenty-seven principal towns of Bengal for the Quarter ending 30th September 1890.

BIRTHS.

THE births registered in twenty-seven of the principal towns of Bengal during the three months ending with September 1890 were 5,503, and correspond to an annual rate of 20·72 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 1·52 lower than the mean rate of the corresponding quarters of the past five years (1885—89), and is also lower than the rate of the corresponding period of any of the past five years except 1887, *vide* the figures below:—

	Quarter ending 30th September of—						
	1885.	1886.	1887.	1888.	1889.	Quarterly average of five years 1885—89.	1890.
Ratio of births per 1,000 of the population per annum	26·80	22·60	18·36	21·52	32·44	22·24	20·72

The births registered in each of the twenty-seven principal towns during the third quarters of 1890, 1889, and the average of the five years 1885—89, correspond to the following rates per 1,000 of the population of those towns;—

Towns.	Ratio per mille. Quarter ending 30th Septr. of—			Towns.	Ratio per mille. Quarter ending 30th Septr. of—		
	1890.	1889.	Average of five years 1885—89.		1890.	1889.	Average of five years 1885—89.
Burdwan	24·28	20·40	18·76	Narainganj	23·88	19·40	18·76
Midnapore	15·84	14·88	16·92	Chittagong	9·54	12·28	19·68
Hughli and Chinsurah	25·24	28·40	22·32	Comillah	16·56	20·60	27·24
Serampore	28·52	33·96	25·48	Patna City	14·52	14·00	24·20
Utterpara	23·92	23·92	19·00	Gya	27·36	2·.20	33·36
Howrah	18·76	21·96	18·84	Arrah	20·88	38·44	24·36
Bali	14·28	18·08	15·36	Mozufferpore	18·12	24·76	19·36
Krishnagar	14·24	17·60	15·72	Durbhanga	25·08	25·08	27·20
Ranaghat	13 80	8·72	7·36	Chupra	17·56	29 88	18·48
Santipore	15·88	20·60	11·56	Bhagulpore	34·48	28·96	32·20
Jessore	7·52	13·16	6·56	Monghyr	37·24	34·32	33·48
Rampore Beauleah	34·12	27·08	22·00	Purneah	13·04	7·96	13·04
Darjiling	42·72	29·60	14·20	Poori	13·20	21·12	16·44
Dacca	14·36	13·12	12·12	Total ...	20·72	22·44	22·24

It will be seen that the highest birth rate during the third quarter of 1890 occurred in the town of Darjiling (42·72) and the lowest in Jessore (7·52). The supposed standard in India is 40 per thousand, but only in Darjiling town out of the twenty-seven principal towns of Bengal was this standard reached during the quarter under report. The nearest approach to it was attained in the towns of Monghyr (37·24) and Rampore Beauleah (34·12). In only three, however, out of the twenty-seven principal towns of the province,—viz. Darjiling. Monghyr, and Rampore Beauleah—did the statistics of birth registration exceed 30 per thousand. In all the rest the rate was very low, especially in the towns of Bali, Krishnagar, Ranaghat, Jessore, Dacca, Chittagong, Patna City, Purneah, and Poori, where the statistics are so imperfectly recorded that the ratio was less than 15 per thousand of population.

DEATHS.

The deaths registered in the twenty-seven principal towns of Bengal during the quarter ending with September 1890 were 6,200, and correspond to an annual rate of 23·36 per 1,000 of the aggregate population of those towns. This rate is 6·40 lower than the mean rate of the corresponding period of the past five years 1885—89, and is also lower than the recorded mortality of the corresponding quarter of any of the past five years with which comparison is instituted, *vide* the figures below:—

	Quarter ending 30th September of—						
	1885.	1886.	1887.	1888.	1889.	Quarterly average of five years 1885—89.	1890.
Ratio of deaths per 1,000 of the population per annum	35·46	29·92	26·72	27·36	29·44	29·76	23·36

The deaths registered in each of the twenty-seven principal towns during the third quarters of 1890, 1889, and the average of the five years 1885—89, correspond to the following rates per 1,000 of the population of those towns :—

Towns.	Ratio per mille. Quarter ending 30th Sept. of—			Towns.	Ratio per mille. Quarter ending 30th Sept. of—		
	1890.	1889.	Average of five years 1885—89.		1890.	1889.	Average of five years 1885—89.
Burdwan	20·72	27·44	25·08	Naraingani	15·92	21·96	18·12
Midnapore	19·40	20·96	20·84	Chittagong	17·88	12·44	19·12
Hughli and Chinsurah	21·24	30·52	27·12	Comillah	21·32	17·76	20·72
Serampore	42·12	42·72	35·76	Patna City	17·52	19·56	25·68
Utterpara	28·24	31·20	21·04	Gya	45·60	62·60	73·88
Howrah	14·06	18·52	17·96	Arrah	24·20	28·20	30·80
Bali	20·76	18·88	16·72	Mozufferpore	21·64	27·76	27·40
Krishnagar	9·28	14·52	16·28	Durbhanga	28·08	34·00	26·00
Ranaghat	17·04	11·48	7·36	Chupra	24·04	34·36	32·88
Santipore	14·92	12·52	9·56	Bhagulpore	10·28	31·36	39·04
Jessore	26·36	21·16	14·12	Monghyr	24·32	47·56	38·84
Rampore Beauleah	23·24	31·52	29·48	Purneah	15·16	15·68	22·08
Darjiling	45·00	45·00	35·20	Poori	37·12	72·44	71·88
Dacca	21·48	20·64	17·20	Total ...	23·36	29·44	29·76

The highest mortality during the third quarter of 1890 occurred in the town of Gya (45·60) and the lowest in Krishnagar (9·28). The total mortality of the twenty-seven principal towns in 1890 is lower than the total rates of the two past periods with which it is compared. Registration of deaths was particularly low in the towns of Krishnagar, Santipore, Howrah, Purneah, Naraingani, Ranaghat, Patna City, Chittagong, Bhagulpore, and Midnapore, where the ratios are less than 20 per thousand of population.

The total mortality during the quarter under review from the several registered death-causes is compared in the following table with the mortality from those causes in the corresponding quarters of 1889 and the average of the five years 1885—89 : —

	Ratio per mille during the—

Small-pox	·16	·24	·12
Fever	9·60	10·96	10·96
Bowel-complaints	3·00	4·20	4·00
Injury	·52	·52	·60
Other causes	6·60	8·96	8·28

The above statement, compared with the figures of both the past periods, shows a noticeable decrease in the mortality of the 3rd quarter of 1890 under the heads cholera, fever, bowel-complaints, and other causes.

The highest annual death-rates from the several registered death-causes occurred in the following towns : —

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille.	*Bowel-complaints.*	Ratio per mille.	*Other causes.*	Ratio per mille.
Chupra ...	11·92	Darjiling ...	25·04	Darjiling ...	14·24	Serampore ...	16·72
Mozufferpore ...	7·76	Gya ...	21·48	Utterpara ...	10·16	Gya ...	15·48
Arrah ...	7·52					Poori ...	14·52
Gya ...	6·80					Utterpara ...	10·16
Durbhanga ...	6·80						
Santipore ..	4·44						
Patna City ...	4·08						
Serampore ...	3·16						
Midnapore ...	2·72						
Poori ...	2·24						

The mortality of the quarter under review according to *Sex*, *Class* and *Age* was distributed as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males	24·40	Christians ...	17·80	Under 1 year ...	189·40
Females	22·20	Hindus ...	24·44	1 year and under 5 years ...	35·92
Ratio of male deaths to every 100 female deaths calculated on the proportion such mortality bears to the total male and female population	109	Mahomedans ...	20·88	5 years „ 10 „ ...	14·76
		Buddhists ...	3·92	10 „ „ 15 „ ...	12·28
		Other Classes ...	5·88	15 „ „ 20 „ ...	14·08
				20 „ „ 30 „ ...	12·40
				30 „ „ 40 „ ...	13·64
				40 „ „ 50 „ ...	17·00
				50 „ „ 60 „ ...	24·80
				60 years and upwards ...	55·16

Detailed information regarding the vital statistics of the twenty-seven principal towns of Bengal of the quarter under review will be found in the statement appended.

The 22nd December 1890.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL;
The *December* 1890.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 6th December 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 6th December 1890, in twenty-seven principal towns of Bengal correspond to an annual rate of 30·5 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 3·3 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of births per 1,000 of the population per annum	25·6	27·5	27·5	27·3	28·4	27·2	30·5

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 15th Nov. 1890.	22nd Nov. 1890.	29th Nov. 1890.	6th Dec. 1890.	Towns.	Weeks ending— 15th Nov. 1890.	22nd Nov. 1890.	29th Nov. 1890.	6th Dec. 1890.

Ranaghat	24·0	12·0	6·0	6·0	Chupra	14·1	22·1	21·1	35·2
Santipore	19·3	24·6	22·8	17·5	Bhagulpore	37·1	24·4	40·7	31·7
Jessore	30·6	6·1	6·1	..	Monghyr	30·7	38·9	37·1	41·6
Rampore Beauleah	44·7	52·5	49·9	44·7	Purneah	6·9	10·4	17·3	17·3
Darjiling	44·5	29·6	41·5	29·6	Poori	14·7	14·7	12·6	33·6
Dacca	24·0	31·1	31·1	42·8	Total ...	24·2	27·6	26·5	30·5

It will be seen that last week the highest birth-rate was returned from Naraingunj (74·5) and the lowest from Ranaghat (6). No births were registered during the week in Jessore town.

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 31·5 per 1,000 of the population. The rate of the week is 1·4 below the average rate of the corresponding week of the past five years, and is higher than the rate of the corresponding week of any of the past five years except 1885 and 1886, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885-89.	1890.
Ratio of deaths per 1,000 of the population per annum	34·3	40·2	26·2	30·3	29·0	32·9	31·5

The deaths registered in each of the last four weeks in each of the twenty-seven towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 15th Nov. 1890.	22nd Nov. 1890.	29th Nov. 1890.	6th Dec. 1890.	Towns.	Weeks ending— 15th Nov. 1890.	22nd Nov. 1890.	29th Nov. 1890.	6th Dec. 1890.
Burdwan	28·9	33·6	41·2	27·5	Naraingunj	58·0	58·0	120·1	120·1
Midnapore	20·1	29·4	20·1	29·4	Chittagong	14·1	9·4	18·8	28·2

Ranaghat	12·0	30·0	35·9	12·0	Chupra	8·0	15·1	8·0	27·2
Santipore	7·0	17·5	9·8	19·3	Bhagulpore	17·3	19·0	15·4	23·5
Jessore	49·0	18·4	30·7	18·4	Monghyr	27·1	20·2	28·0	28·0
Rampore Beauleah	18·1	47·2	47·2	31·5	Purneah	13·9	6·9	20·8	13·9
Darjiling	7·4	...	22·2	51·9	Poori	63·0	58·7	96·5	73·4
Dacca	18·6	46·4	25·5	51·1	Total ...	23·4	23·1	25·7	31·5

It will be seen that last week the highest mortality occurred in the town of Narainganj (120·1) and the lowest in Patna City (11·).

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns :—

Cholera.	Ratio per mille.	*Small-pox.*	Ratio per mille.	*Fever.*	Ratio per mille.	*Bowel-complaints.*	Ratio per mille.	*Other causes.*	Ratio per mille.
Narainganj	62·1	Chittagong	9·4	Darjiling ...	44·5	Serampore	11·8	Serampore ...	27·5
Howrah ...	14·9			Poori ...	35·6			Gya ...	26·6
Serampore	13·7			Gya ...	33·5			Poori ...	23·1
Dacca ...	5·8			Narainganj ...	29·0			Midnapore ...	21·7
				Arrah ...	21·5			Hughli and Chinsurah	11·5
				Burdwan ...	21·4			Howrah .	11·5
				Rampore Beauleah	21·0			Chupra ..	11·1
								Dacca ...	10·4

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 3·9 from cholera, against 3·5 per 1,000 in the preceding week; ·5 from small-pox, against ·1; 13·7 from fever, against 11·7; 3·3 from bowel-complaints, against 2·5; ·4 from injury, against ·3; and 9·7 from other causes, against 7·5 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males	33·2	Christians ...	22·4	Under 1 year ...	238·5
Females	29·7	Hindus ...	33·9	1 and under 5 years ...	36·4
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	111	Mahomedans ...	26·1	5 „ 10 „ ...	19·3
				10 „ 15 „ ...	14·0
				15 „ 20 „ ...	24·4
				20 „ 30 „ ...	20·7
				30 „ 40 „ ...	23·4
				40 „ 50 „ ...	18·7
				50 „ 60 „ ...	34·9
				60 years and upwards ...	79·1

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. Gregg, *Dip. Publ. Health, Camb.*,

The 23rd December 1890. *Sanitary Commissioner for Bengal.*

THE following report is published for general information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

The 29th December 1890. *Secretary to the Government of Bengal.*

METEOROLOGICAL SUMMARY OF THE MONSOON PERIOD OF 1890.

THE following statement is intended to give a very brief history of the more important features which have characterised the south-west monsoon period and the preceding months of 1890.

During January weather conditions were for the greater part of the month of the normal north-east monsoon character, and up till the 24th no disturbances of any importance entered Bengal. On this date, however, a well-formed barometric depression, which had originated in North-Western India on the 22nd, commenced to pass through the province, travelling through it on the 24th and 25th, and reaching Burma on the 26th. This storm brought rather heavy rain, and in fact practically the whole rainfall of the month was due to it. January was therefore decidedly more free from storms than is usually the case, and for the month rainfall was decidedly deficient in Chutia Nagpur, South Behar, Orissa, and North Behar while it was almost normal in amount in South-West Bengal and North Bengal, and almost twice as great as the normal in East Bengal. Pressure also during the month was rather largely in defect of the normal, the defect usually ranging from 0·06 inch to 0·08 inch; the defect being largest in West and Central Bengal, and smallest in the south of Orissa. Temperature was, on the other hand, in excess of the normal, the

excess averaging about 1·6°; humidity was also larger than usual, and cloud proportion rather smaller.

In February also there was a singular absence of cold-weather storms, and only two slight depressions affected the province, neither of which was sufficiently influential to produce general rain. During this month therefore rainfall was confined to a few local showers of no importance. South-West Bengal, Chutia Nagpur, and North Bengal were entirely rainless, and the average fall in the other districts did not amount to more than a few hundredths of an inch. Pressure also in this month was in defect in all districts by about 0·02 inch. Temperature for the firsthalf of the month was either below or about normal, but during the secondhalf it became in excess of the normal by about 3° to 4°. Cloud proportion continued below the usual amount in February, but humidity was about normal.

In March again there were no storms of the usual cold-weather type, but owing to the comparatively early setting in of hot-weather conditions, a few local storms of the class called nor'westers commenced as early as 4th March, and they continued to occur locally up to about the middle of the month; but they were, as a general rule, decidedly more feeble than usual. Owing, again, to the comparative absence of storms, rainfall was largely in defect of the normal in all districts except Chutia Nagpur and Orissa, the defects being particularly large in North Bengal, North Behar and South-West Bengal; while, on the other hand, Orissa received a fall rather more than twice as large as usual. Barometric pressure continued in March rather largely in defect, the usual defect equalling 0 04 inch to 0·07 inch. In March also the normal rapid increase in temperature was even more pronounced than usual, and the mean temperature was above the normal in all districts by from about half to two degrees. Notwithstanding the defective rainfall humidity was in this month about normal, while cloud proportion was in excess.

In April conditions were of about average hot-weather character, and the mean temperature for the month was almost absolutely normal. During the first half of the month only a few local storms were reported, and these were principally confined to East and North Bengal, but during the third and fourth weeks two small barometric depressions appeared over the province, and for about ten days from the 17th the weather was generally rather unsettled in all districts except Behar and Chutia Nagpur, while in East and North Bengal severe thunderstorms with heavy rain were of almost daily occurrence, and one of them in the neighbourhood of Mymensingh appears to have acquired the violence of a tornado. Rainfall for April was thus considerably in excess of the normal in North and East Bengal, and rather below it in South Behar and South-West Bengal: it was in large defect in North Behar and Orissa, and in Chutia Nagpur rainfall was practically absent. Pressure during the month was slightly below the normal in Lower Bengal, the difference being about a hundredth of an inch in Orissa, South-West Bengal and South Behar, but elsewhere there was a small excess of about corresponding amount.

In the early part of May there was a short period of intensely hot weather in Bengal, which was accompanied by abnormally low pressure and unusually light winds, and more or less complete absence of rainfall in all districts except East and North Bengal. This lasted up to about the 9th or 10th, during which period a small cyclonic storm had been forming in the Bay of Bengal, probably not far from the Andamans, which afterwards moved in a north-north-easterly direction, and on the 7th passed into Burma across the coast between Diamond Island and Akyab, where it broke up on the 8th. The wave of moist winds and disturbed conditions after the breaking up of the storm appeared to drift northwards, and from about the 11th or 12th rainfall became fairly general though by no means heavy over practically the whole province of Bengal. The rainfall for this month was in most districts a little below the normal, the only district in which the defect was considerable being Chutia Nagpur, while on the other hand the falls in East Bengal were slightly above the average. Owing probably to the effect of the cyclonic storm above noted, the general pressure for the month in Bengal was distinctly below the normal, the defect in many cases ranging from two to five hundredths of an inch. The variations of temperature during the month were exceptionally large, and in the early part temperatures of from 4° to nearly 10° in excess were registered, but with the setting in of rainfall

this excess disappeared, and for the whole month, though temperature was higher than usual, the excess was not larger than about one degree.

During the first five months of the year or, in what may be termed, the pre-monsoon months, it will be seen that conditions were somewhat abnormal. Pressure had been in distinct defect in each month, the defect at some stations exceeding a twentieth of an inch in January and March. Temperature also had generally been in excess of the normal. the only exception being in April, when it was practically normal. Rainfall also on the whole was very considerably below the normal in most districts. East Bengal had received a fall in the five months, about 6 per cent. below the normal only, but in Orissa and North Behar the defect was from 25 to 30 per cent., in South-West Bengal 40 per cent., in South Behar 50 per cent., and in North Behar and Chutia Nagpur about 60 per cent. During these five months also there were comparatively few storms; the cold-weather or north-east monsoon storms were indeed almost absent, the hot-weather local storms were also not very numerous, and most of them were not very influential, and the only storm of any importance at all was the cyclonic storm of May which passed over Burma.

In the south of the Bay of Bengal the first advance of the south-west monsoon current appeared to take place in the last day or two of April. This advance progressed rather farther up the Bay than usual, and gave rise to the small storm just referred to. About the second week in May again another advance of the monsoon current appears to have been felt in the south of the Bay, and fairly strong winds continued to be reported at the Ceylon stations up to the close of the month. These facts rather pointed to the probable early establishment of the monsoon current, and therefore of the regular rains over Bengal; but though moderately heavy general rain continued to fall in North and East Bengal from early in June, yet in other districts the commencement of the heavy, almost daily, rainfall which characterises the south west monsoon rains did not take place till about the 18th June. In some of the southern districts fairly general rain had occurred before this date on the 5th and 6th and the 9th and 10th of June, but these falls were again followed by periods of fine weather, and from the 13th and 17th of June only scattered showers of rain were reported. The large advance of the monsoon current which brought about the heavy general rainfall of the 18th and following dates was caused by the advance of a feeble barometric depression which formed in the north-west angle of the Bay on the 17th, after which it advanced into Chutia Nagpur, filling up there on the 20th; on the 22nd also a depression formed over the east of the province, and subsquently moved in a westerly direction, giving very heavy rainfall in its advance—several stations reporting from 5 to 10 inches. Both these depressions caused a large inflow of moist winds over the province, and the wind velocities for June were at the coast stations generally higher than the normal, indicating probably a stronger monsoon than usual. The rainfall for the month was however largely in excess of the normal in all districts except East Bengal, where there was a slight defect. The excess falls usually ranged from twenty-five to forty per cent in excess of the normal, but in South Behar the fall was nearly twice as large as usual.

The mean pressure for June was very nearly normal, the differences being generally under a hundredth of an inch. Temperature was in distinct, though slight, defect of the normal, the defect being generally under a degree.

The strength of the monsoon current blowing in July again continued rather largely above the normal as judged by the wind velocities at the coast stations, and, as will be seen subsequently, rainfall was also in considerable excess. There was also during the month a comparative and indeed an almost complete absence of barometric depressions or cyclonic storms such as usually occur during the rainy season. Only one small storm deserves mention, and this formed quite at the end of June in the north-west of the Bay, and moving in a westerly direction crossed the coast near False Point, early in July, but it only gave moderately strong winds, and brought up comparatively little rainfall. The second was a very unimportant whirl which formed in the north-west angle of the Bay on the 19th, and then passed through Chutia Nagpur to the North-West Provinces, where it filled up on the 24th. During this period a steady south-westerly current blew over the whole province, giving heavy rain in all districts. Indeed, the rainfall over the whole province in July was generally about twenty-five per cent. in excess of the normal,

but the variations in different districts were considerable. In Orissa, which had on the whole about a normal fall, the district of Pooree received a fall about half as large again as usual, while on the other hand the Balasore district received only about half the usual fall. South-West Bengal also received generally almost a normal fall, and included districts such as Midnapore and Howrah, where the falls were about half as much as usual, and on the other hand districts such as Burdwan and Moorshedabad, where they were from 40 to nearly 60 per cent. in excess of the normal. In East Bengal all districts received practically abundant rain, and the general fall was a fifth larger than usual. The falls in North Bengal averaged about thirty per cent. in excess of the usual amount, the excess falls being mainly determined towards the line of the hills, and in the Darjeeling district the falls were nearly twice as large as usual. In North Behar the falls were even larger, and they averaged 74 per cent. in excess, and all the districts in this division received very abundant falls. In South Behar the fall was 36 per cent in excess of the normal, and again all the districts received abundant rain, but in the Chutia Nagpur Division, though the rainfall averaged 16 per cent. in excess, in the district of Singbhoom the fall was only two-thirds of the usual amount.

The pressure changes were rather large during July, though the means of the month were fairly normal, the pressure in East Bengal being almost the average amount, while in the other districts it was below it by amounts varying from one to four hundredths of an inch. In the case of temperature also there were rather large changes, and towards the close of the month the maximum temperatures were at many stations 8° to 10° below the normal. The monthly means of temperature were therefore below the normal, the defect being about one to one and-a-half degrees in all districts except Orissa and South-West Bengal, where it equalled about half a degree.

August also was a month of entire absence of storms of any importance, though a few very unimportant depressions or whirls formed in the early part of August in the north of the Bay. They may perhaps have had the effect of diminishing the strength of the monsoon current blowing over Bengal, for the mean wind velocities for August showed that the winds blowing from the Bay were at almost all the coast stations very largely below their normal strength. Rainfall also in this month was rather considerably below the normal in all districts except North Bengal and Behar, where there was again excessive precipitation. Indeed this tendency for the excessive rainfall to be deflected towards the northern districts of the province, that is, towards North Bengal and Behar, was a most prominent characteristic of the monsoon season of 1890. In August Orissa received about four-fifths of the usual fall, and again, as in July, the Balasore district was most largely in defect. South-West Bengal generally was about 30 per cent. in defect, and in the district of Bankoorah in particular the fall was less than a third of the usual amount. In East Bengal the defect was small only, though in Backergunge and Tipperah districts the defects were considerable. In North Bengal and Behar, on the other hand, the falls were about a third in excess of the normal, and all the districts in these divisions received an abundant fall except Pubna and Rajshahye. In Chutia Nagpur, again, the fall was only three-fourths of the normal, and in the Singbhoom district in particular the fall was only 25 per cent of the usual amount.

The variations of pressure during August were not very large and of little practical importance, and for the whole month the means were above the normal by between two and three hundredths of an inch. As regards temperature, the monthly mean for South-West Bengal was normal, and for the other districts below the normal, the defect being under half a degree in Orissa and East Bengal, and between half and one and-a-half degrees in all the other divisions.

September was again a month in which nothing like a storm occurred in the Bay of Bengal, and during the greater part of the month only light monsoon weather prevailed. A very shallow depression did indeed form from the 13th to the 19th, remaining for the greater part of the time over Orissa, but it was not very influential in the matter of rainfall. A rather more important depression formed in the Bay off Vizagapatam on the 22nd, and gradually drifted inland between Gopalpore and Vizagapatam, moving in a north-westerly and northerly direction, and passing through Orissa into Chutia Nagpur, where it filled up on the 28th. This rather feeble depression nevertheless brought up a

very powerful wave of moisture-laden winds, and very heavy and general rain prevailed over the province during the latter part of the month. The rainfall of the first half of September was, however, much lighter and more scattered than usual, and thus the monthly rainfall was decidedly below the normal in East Bengal, Chutia Nagpur and Behar, while it was about normal in Behar. Orissa, however, through which both depressions passed, received the very heavy rainfall of nearly 70 per cent. in excess of the normal. North Bengal also received very heavy falls of rain as in the previous months, and showed a fall nearly half as large again as the normal. In the division of Orissa all the districts received very heavy falls, but in South-West Bengal, though generally there was a normal fall, Khoolna and Jessore showed rather serious defects. Practically also all the districts in East Bengal showed very seriously deficient rainfall, while all the districts in North Bengal had very heavy falls. In North Behar, Purneah received a large fall, and all other districts comparatively small falls; and in South Behar the falls were most deficient in Gya, South Bhagulpur and Monghyr districts. Finally, in Chutia Nagpur, Singbhoom, which had been in previous months recording most largely deficient falls, in September received comparatively rather larger falls, though even in this month they were below the normal amounts.

The variations of pressure during the first half of September were small and of little consequence, but during the second half they were rather large. The means for the month were below the normal by about 0·02 inch in the south of Orissa, and about 0·03 inch above it in East Bengal, but elsewhere the difference from the normal was only a few thousandths of an inch. In the case of temperature there were large variations, and during the early part of the month, when rainfall was rather deficient, temperature was in considerable excess, but with the heavy falls of rain towards the close of the month a very rapid fall of temperature set in, and it became much below the normal. For the whole month the mean temperature was nearly normal, some districts showing slight defects and others excess temperatures, but in no case did the variations exceed half a degree.

Up to the end of September weather conditions in Bengal continued to be influenced by the depression which had filled up on the 28th in Chutia Nagpur. Early in October, however, rainfall practically ceased over the province, the monsoon current became weak, and apparently commenced to retreat rapidly down the Bay. In its retreat, however, a barometric depression of rather greater importance than those in the preceding months commenced to form, and the little storm had a life history from the 8th to the 16th of October. The depression at first apparently covered a considerable part of the south of the Bay, but up till the 11th it had changed very little, when on this day the centre was probably to the east of Coconada, and was moving in a north or north-westerly direction. On the 12th the centre was close to the coast between Vizagapatam and Gopalpore, and it crossed the coast on the following morning, after which it moved northward, passing through Orissa and the adjacent parts of South-West Bengal and Chutia Nagpur. The small storm was not a severe one, but it brought up particularly heavy rain. The general rainfall in October was to a great extent due to this cause. After this the south-west monsoon current again commenced to retreat down the Bay, but on the 20th a second depression began to appear in the east of the centre of the Bay. This small storm, which was only of feeble character and of very local influence, moved in a northerly direction over the Sunderbuns into East Bengal, and on the 23rd its centre was near Furreedpore, and it filled up on the following day. Except in the immediate proximity of the storm centre, the rainfall brought up was light, and it did not extend generally beyond East Bengal. After the 25th October the monsoon current again retreated, giving a few showers in Orissa, but practically by the close of October the south-west monsoon rainfall had entirely ceased, and a steady northerly wind current was setting in over the whole of the province. The dates on which the general rainfall ceased in the various meteorological divisions were as follows:—in South Behar and Chutia Nagpur about the 15th, in North Behar and North Bengal about the 17th, in South-West Bengal the 18th to the 20th, in East Bengal on the 25th, and in Orissa about the 31st.

Owing principally to the heaviness of the rainfall brought up by the first of the two feeble storms described, the rainfall in October was considerably

above the normal, the general excess averaging nearly 50 per cent. In only one division were the falls below the usual amount, and in Chutia Nagpur the defect was about 30 per cent., and all the districts in the division showed large deficiency. In Behar the falls generally were slightly heavier than usual, but in the districts making up the division there were very great anomalies. The Sonthal Pergunnahs received a fall about three times as large as usual, receiving ten inches of rain instead of about three-and-a-half; the Chumparun and South Bhagulpur districts also received considerable excess falls; but on the other hand, the falls in Gya, Sarun, Patna and Shahabad were extremely defective. East Bengal generally received a fall of about a quarter larger than usual, but even here Chittagong was considerably in defect. In Orissa the fall was about half as large again as usual, all districts receiving an excess fall; and in South-West Bengal the general fall averaged eight inches against the normal amount of about four inches, and the excess falls in the districts of 24-Pergunnahs, Beerbhoom and Nuddea were particularly large. The Division of North Bengal, however, again showed the peculiar determination of the rain-bearing current towards this district, and it received nearly twelve and a third inches general fall as against a normal amount of about four inches and a third. In many of the districts of North Bengal in October indeed the actual falls were from three to four times the ordinary amounts.

In regard to the other meteorological elements for October pressure changes during the existence of the first small storm described were moderately large, but during the second storm they were small. For the whole month the mean pressure did not differ from the normal by more than a few thousandths of an inch. Owing apparently to the heaviness of the rainfall in October, the mean temperatures were rather largely below the normal, the defects ranging from 1·6° in Chutia Nagpur to 0·3° in North Behar.

The principal features of the monsoon season of 1890 and of the months preceding it in Bengal have therefore been—

1. Pressure was rather decidedly in defect of the normal up to the commencement of the rains.

2. Temperature was on the other hand in excess of the normal both during the north-east monsoon season and in the hot-weather season, and indeed up till practically the commencement of the rains.

3. There was an almost entire absence of cold-weather storms during the early months of the year, and the hot-weather storms were not very numerous nor were they of any particular intensity in most cases. The only storm of any importance whatever was one which occurred in front of the first advance of south-west monsoon winds in the Bay, and which afterwards struck the coast between Akyab and Diamond Island, but even this was not very intense.

4. Rainfall up to the setting in of the monsoon rains was on the whole considerably below the normal, the defects ranging from 6 per cent. of the normal in East Bengal to 50 and 60 per cent. in North Behar and Chutia Nagpur.

5. The actual monsoon rains set in a few days later than usual, the general date over the greater part of the province being about 18th June.

6. During the whole of the south-west monsoon and even during its retreat southwards down the Bay, not a single severe storm has occurred, and the only importance which any of the few whirls which were formed possessed has been due to the rainfall brought up by them. The monsoon period this year has therefore been a singularly quiet one.

7. The monsoon current appeared to be considerably in excess of its normal strength in June and July, though in August and September it was rather below it. It retreated from Bengal at about the normal period.

8. Rainfall was largely in excess of the normal in June and July, of more nearly normal amount in August and September, and again largely in excess in October.

9. The rainfall in October continued rather later than usual owing to the effect of a diffused barometric depression which advanced from the Bay over part of the province about the middle of the month.

10. There was a very singular and pronounced tendency for the heavy rainfall to concentrate itself towards the north of the province and towards the line of the hills. This tendency was particularly well marked in the districts of North Behar and to a rather smaller extent over North and South Behar. In

North Bengal the rainfall from June to October inclusive was about 63 per cent. in excess of the normal.

11. The following tables give briefly the amount and variation of the rainfall in each of the seven meteorological divisions, month by month, for the monsoon season, May to October inclusive :—

Actual Rainfall in inches.

Meteorological Divisions.	May.	June.	July.	August.	September.	October.	Year.
Orissa ...	3·84	11·05	12·05	9·28	17·21	9·00	62·43

South Behar ...	— 0·11	+ 5·58	+ 4·26	+ 2·78	— 1·45	+ 0·48	+ 11·54
Chutia Nagpur ...	— 0·93	+ 2·16	+ 2·13	— 3·51	— 1·68	— 0·90	— 2·73

Variation expressed in a percentage of the normal fall.

Orissa	— 1	+ 26	— 4	— 19	+ 68	+ 46	+ 18
South-West Bengal ...	— 13	+ 41	+ 2	— 32	+ 4	+ 86	+ 7
East Bengal ...	+ 2	— 11	+ 20	— 11	— 40	+ 27	— 5
North Bengal ...	— 19	+ 32	+ 28	+ 31	+ 43	+ 180	+ 36
North Behar ...	— 5	+ 40	+ 74	+ 34	— 3	+ 1	+ 33
South Behar ...	— 5	+ 83	+ 35	+ 24	— 18	+ 15	+ 26
Chutia Nagpur ...	— 35	+ 27	+ 16	— 26	— 19	— 30	— 6

12. Finally, the rainfall of the whole province from May to October inclusive averaged 65·43 inches, while the normal fall for the period is 56·81 inches, so that the actual average fall has been in excess by 8·62 inches. Expressed as a percentage, the actual rainfall in the province of Bengal for this period has been in excess of the normal by 15 per cent.

A. PEDLER,

Meteorological Reporter to the Govt. of Bengal.

Meteorological Office, Bengal,
The 13th December 1890.

TABLE I.

Actual Monthly Rainfall of districts in Bengal for the months of May to October 1890.

[*N. B.*—The figures in this table are the arithmetical averages of the corresponding figures in the returns for the sub-divisional stations.]

Division.	District.	May.	June.	July.	August.	September.	October.	Total.

METEOROLOGICAL OFFICE, BENGAL,
The 13th December 1889.

A. PEDLER,
Meteorological Reporter to the Govt. of Bengal.

LIBERALITY OF THE RAJAH OF DASPALLA IN THE TRIBUTARY STATES OF ORISSA.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 29th December, 1890.

RESOLUTION.

READ—

A letter from the Superintendent of Tributary States, Orissa, No. 2111P, dated the 13th November 1890, regarding the offer of the Rajah of the Tributary State of Daspalla to found a scholarship.

Read also—

A letter from the Director of Public Instruction, No. 6900, dated the 14th December 1890, reporting on this subject.

The Superintendent of the Tributary States of Orissa has reported that the Rajah of Daspalla has offered to make over Rs. 1,200 in order to establish, out of the interest of that sum, a scholarship of Rs. 4 a month awardable to a student of the Daspalla State Middle Vernacular School after passing the Middle Vernacular Scholarship Examination, the scholarship being called the "Worsley Scholarship," and being tenable for four years in the Ravenshaw Collegiate School, Cuttack. The Lieutenant-Governor is pleased to accept the offer, and tenders his thanks to the Rajah for his liberality. The Superintendent of the Tributary States will be the administrator of the fund, and the Rajah should be informed that his remittance to the Treasury should cover the market value of the note, plus 5 per cent. to cover incidental charges attendant on the purchase, it being understood that the 5 per cent. deposit is an advance subject to account.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Superintendent of the Tributary States, Orissa, for information and communication to the Rajah of Daspalla, and that a copy be forwarded to the Director of Public Instruction for information.

Ordered also that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 27th December, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
BURDWAN DIVS. 1	Burdwan Dec. 27, '90	Nil	Weather—bright and cold. *Amun* nearly all harvested. *Rubbi* looking well. Prices of common rice :— Srs. Sudder ... ... 18½ Cutwa ... ... 18 1/16 Ranigange ... ... 18 Culna ... ... 18¼ } per rupee.
2	Bankoora ,, 27, '90	Nil	Weather—seasonable, but not so cold as it should be. Harvesting of *amun* nearly finished. *Rubbi* and sugarcane doing well. Common rice selling at 20 seers per rupee at Sudder and 20½ seers at Bissenpore.
3	Birbhum ,, 27, '90	Nil	Weather—bright and cold. Winter rice now practically gathered in. Price of common rice unchanged at from 19 to 22 seers per rupee.
4	Midnapur ,, 27, '90	Nil	Weather—cool and fair. Reaping of paddy nearly finished; total outturn above average. *Rubbi* and indigo doing well. Prices of common rice :— Srs. Sudder ... ... 18 Contai ... ... 18 Tumlook ... ... 17½ Ghatal ... ... 17 } per rupee.
5	Hooghly ,, 27, '90	Nil	Weather—cold. Harvesting of *amun* paddy nearly finished. Winter crops look healthy. Prices of common rice :— Srs. Sudder ... ... 14 Serampore ... ... 14 Jehanabad .. .. 16¾ } per rupee.
6	Howrah ,, 27, '90	Nil	Weather—seasonable. Harvesting of winter paddy continues; outturn good. Price of common rice 14½ seers per rupee.
	Central Districts.		
PRESIDENCY DIVS. 7	24-Pergns. Dec. 30, '90	Nil	Weather—cold and seasonable. Harvesting of winter rice continues with favourable outturn. *Rubbi* crops progressing well. Prices stationary.
8	Nuddea ,, 27, '90	Nil	Weather—seasonable. Harvesting of *amun* rice almost over, and that of *kalai*, *mung*, and *til* going on. Prospects fairly good.
9	Khoolna ,, 27, '90	Nil	Weather—seasonable. Reaping of *chhotán amun* nearly completed, and that of *boran* has commenced; outturn very good in all parts of the district except in the inundated tracts. Prices are slowly falling. Winter crops doing well except in parts of the Satkhira subdivision where they have been damaged by locusts. *Boro* is being transplanted.
10	Jessore ,, 27, '90	Nil	Weather—seasonable. Harvesting of *amun* in progress. Prospects of winter crops good Prices of rice stationary.
11	Moorshedabad ,, 27, '90	Nil	Weather—cold. *Amun* is still being harvested. Prospects of *rubbi* favourable.
RAJSHAHYE DIVS. 12	Dinagepur ,, 27, '90	Nil	Weather—seasonable. Prospects of crops good. Price of rice as before.
13	Rajshahye ,, 27, '90	Nil	Weather—seasonable. Harvesting of *amun* paddy and sugarcane in progress. Condition of winter crops good. Tobacco transplantation almost finished. Ganja plants thriving.
14	Rungpur ,, 27, '90	Nil	Weather—cold with east wind. Harvesting of *amun* still going on. Some damage has been done by insect pest. Prospects on the whole continue good.
15	Bogra ,, 27, '90	Nil.	Weather—seasonable. Slight injury to the winter rice crop is reported from thana Shibgunge (north) by caterpillars; but the harvest is going on with good outturn, and the spring crops are doing well. Common rice is selling at 14½ seers per rupee.
16	Pubna ,, 27, '90	Nil	Weather—clear. Rain wanted for mustard; prospects otherwise good.
17	Darjeeling ,, 27, '90	Nil	Weather—cold and misty. Winter rice, *marua*, and *phafar* are being harvested. Potato doing fairly well. Prospects good.
18	Julpigoree ,, 27, '90	Nil	Weather—cool and cloudy with morning fogs. Prospects of crops continue satisfactory. Harvesting of *haimanti* paddy going on. Price of rice stationary.

No.	District and date of return.	Rainfall at sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 19	Dacca Dec. 27, '90	Nil	Weather—seasonably cold and fine. *Amun* and *roachia* paddy being harvested. Winter crops doing well. Price of common rice from 18 to 18 seers per rupee.
20	Furreedpur ,, 27, '90	Nil	Weather—seasonably cold and bright. Harvesting of *amun* continues. Prospects of winter crops fair. Coarse rice selling at from 17 to 18 seers per rupee
21	Backergunge ,, 27, '90	Nil	Weather—seasonable. Prospects of crops fair. New common rice is selling at from 15 to 18 seers per rupee.
22	Mymensingh ,, 27, '90	Nil	Weather—cold. Prospects of crops good. Harvesting of winter rice continues. Rice selling at 16 seers per rupee.
Chittagong Divn. 23	Chittagong ,, 30, '90	Nil	Weather—seasonable. Harvesting of *amun* commenced; very good outturn expected. Vegetable crop thriving. Prices steady.
24	Noakholly ,, 27, '90	Nil	Weather—seasonable. Harvesting of *amun* continues. *Rubbi* crops progressing. Price of good rice is varying from 15 to 19 seers and coarse rice from 16 to 21 seers per rupee in the different parts of the district.
25	Tipperah ,, 27, '90	Nil	Weather—seasonable. Cutting of *amun* paddy over. Cold-weather crops prospering.
26	Chittagong Hill Tracts. 25, '90	Nil	Weather—seasonable; very cold throughout the week. Harvesting of cotton nearly at an end. Gathering of late rice continues. Mustard, tobacco, and other cold-weather crops progressing. Common rice is being sold at 11 seers 6¼ chittacks per rupee.
BEHAR.			
Patna Divn. 27	Patna ,, 27, '90	Nil	Weather—cold. Harvesting of paddy and *jowar* in progress. *Rubbi* crops growing well, but rain wanted. Prospects of poppy continue good. Prices of food-grains show a tendency to fall.
28	Gya ,, 27, '90	Nil	Weather—cold with west wind. Prospects of *rubbi* and poppy continue good. Harvesting of paddy about to be completed. Prices of food-grains stationary.
29	Shahabad ,, 27, '90	Nil	Weather—bright and cold. Prospects of crops good.
30	Durbhunga ,, 27, '90	Nil	Weather—cool: west winds prevailing. Harvesting of rice still going on. *Rubbi* crops look promising. Poppy and tobacco doing well. Prices remain stationary.
31	Mozufferpur ,, 27, '90	Nil	Weather—cool. Harvesting of paddy in progress. *Rubbi* crops look promising. Prospects of poppy crop continue good.
32	Sarun ,, 27, '90	Nil	Weather—colder than the preceding week. Harvesting of paddy completed. Prospects of *rubbi* and poppy crops continue favourable.
33	Chumparun ,, 27, '90	Nil	Weather—very cold: occasionally cloudy. Prospects of all standing crops, including poppy, are very good, though a shower of rain will be beneficial to them. Harvesting of paddy approaching completion.
Bhagulpore Divn. 34	Monghyr ,, 27, '90	Nil	Weather—seasonable: cool and clear. Harvesting of winter rice nearly completed. *Rubbi* crops promising.
35	Bhagulpore ,, 27, '90	Nil	Weather—seasonable. Harvesting of paddy crop going on. Standing crops promising.
36	Purneah ,, 27, '90	Nil	Weather—cold and clear. *Aghani* harvesting continues; outturn nearly 16 annas. *Rubbi* crops progressing favourably.
37	Maldah ,, 27, '90	Nil	Weather—seasonable. Harvesting of *amun* in progress. Other crops doing well. *Kalai* gathering going on. Price of common rice has fallen.
38	Santhal Pergha. ,, 27, '90	Nil	Weather—seasonable. Paddy harvesting still continues. Prospects of *rubbi* are excellent.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	ORISSA.			
Orissa Divn.	39	Cuttack Dec. 27, '90	Nil	Weather—seasonable. Harvesting of *guru sarad* rice nearly completed in the Jajpur subdivision. *Rubbi* crops doing well. Planting of tobacco continues. General prospects good.
Orissa Divn.	40	Pooree „ 25, '90	Nil	Weather—seasonable. *Sarad* crop is being harvested. *Dalua* crops are being sown. *Rubbi* crops (mustard and *kulthi*) are in ear. Price of common rice from 21 to 28 seers per rupee.
Orissa Divn.	41	Balasore „ 27, '90	Nil	Weather—warm for the time of year. The late winter rice crop is still being harvested.
	CHOTA NAGPORE.			
	South-West Frontier Agency.			
Chota Nagpore Divn.	42	Hazaribagh Dec. 27, '90	Nil	Weather—seasonable. Harvesting of winter rice finished. Rain wanted for *rubbi* crops. Poppy promising.
Chota Nagpore Divn.	43	Lohardugga „ 27, '90	Nil	Weather—cold. Harvesting of winter rice nearly finished. Rain wanted for *rubbi* crops.
Chota Nagpore Divn.	44	Singbhoom „ 27, '90	Nil	Weather—seasonable. Winter crops doing well. Paddy nearly all harvested.
Chota Nagpore Divn.	45	Manbhoom „ 27, '90	Nil	Weather—seasonable. Harvesting of paddy nearly over; outturn 14 annas. *Rubbi* crops are being gathered. Rice selling at from 20 to 28 seers per rupee.

Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the* 30*th December* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 26TH OF DECEMBER 1890.

It is desirable to notice that this is the last weekly meteorological report which will deal with the weeks ending on Fridays, and that in future, commencing with the week ending on January 3rd, the meteorological week will be considered to end on Saturdays at 8 A.M. The system with the week ending on Fridays has been in force for nearly eight years, since the first week of April 1883, but at the suggestion of the Government of India it is now to be changed, as above stated, to bring the Bengal weekly report into uniformity with the weekly rainfall reports to be published in all other provinces of India.

The week under review has been one in which the changes have been somewhat considerable, though fine weather has prevailed throughout. On the first day of the week pressure was in slight excess of the normal, while temperature was exceedingly high in the western districts, where at some stations the mean temperatures were 5° to 7° above the normal, though on the other hand in the east of the province temperature was in defect by one to two degrees. A steady northerly wind current of fairly normal direction was reported at all stations, weather was fine, and there was no rain. On the 21st there had been a rather considerable fall of pressure which continued on the 22nd, but the fall was succeeded by a sharp rise on the 23rd and 24th, the increase on the latter date at many stations equalling about one-eighth of an inch. Pressure again fell by about a twentieth to a tenth of an inch on the 25th, and by an almost similar amount on the 26th, and on this day pressure was in rather considerable defect of the normal over the north of the province, though it was more normal elsewhere. It will thus be seen the pressure changes during the week have been much larger than is usual during the north-east monsoon season. Temperature has also changed considerably. From the 20th to the 21st there had usually been a fall of rather less than a degree; this was succeeded on the 22nd by an increase of from two to three degrees, and on the 23rd by a fall varying at some stations up to more than five degrees, and on the 24th by a further fall which averaged about 3°, but which at many stations exceeded 5°. On the 26th a rise of temperature set in over the northern districts, though the fall continued at the southern stations, and on the 26th the rise continued at the majority of stations, the increase equalling 5° at such stations as Hazaribagh and Gya. It will be seen that in temperature also the changes during the week have been unusually large and variable, and at the close of the week again temperature was in excess of the normal by amounts generally ranging up to about 2°. Wind directions during the week have, however, been fairly steady and tolerably normal in character, and the sky has been usually cloudless, and at no station has there been any rainfall at all

Pressure.—The mean pressure for the week has varied from the normal by small amounts only, and at most stations it has been above the normal by one or two-hundredths of an inch.

Temperature.—The mean temperature for the week has been about five and-a-half degrees in excess of the normal in Orissa, three degrees in excess in Chutia Nagpur, two degrees in South-West Bengal and South Behar, and nearly one degree above it elsewhere. For the whole province the average excess has been rather more than two degrees. The distribution of temperature during the week and its variation from the normal are best seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations of the minimum or night temperatures at these stations have been larger than those of the maximum or day temperatures, and the mean excess of the minimum temperatures has been about two and-a-half degrees as against an excess of less than one degree in the day temperature:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending the 26th of December 1890.

	Normal mean maximum temperature for the week ending 26th December.	Actual mean maximum temperature for the week ending 26th December 1890.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 26th December.	Actual mean minimum temperature for the week ending 26th December 1890.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 26th December.	Actual mean daily temperature for the week ending 26th December 1890.	Variation of actual mean from the normal.

The average fall of the corresponding period for 24 years, S.-G.'s Office ...	65·24

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The [illegible]h of the rain-gauge is one foot above the ground.

⌂, [illegible] fog.

A. PEDLER,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 29th December 1890.

MEMORANDUM.

Weekly review of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 13th December 1890.

BIRTHS.

THE births registered during the week ending with Saturday, the 13th December 1890 in twenty-seven principal towns of Bengal correspond to an annual rate of 28·2 per 1,000 of the aggregate population of those towns, which is 1,061,574. This rate is 1·7 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years with which comparison is instituted, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885–89.	1890.
Ratio of births per 1,000 of the population per annum	26·4	26·6	26·3	26·4	26·9	26·5	28·2

The births registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 22nd Nov. 1890.	29th Nov. 1890.	6th Dec. 1890.	13th Dec. 1890.	Towns.	Weeks ending— 22nd Nov. 1890.	29th Nov. 1890.	6th Dec. 1890.	13th Dec. 1890.

It will be seen that last week the highest birth-rate was returned from Naraingunj (78·7) and the lowest from Arrah (13·2). No births were registered during the week in Jessore town.

DEATHS.

The deaths registered during the week under review correspond to an annual rate of 31·5 per 1,000 of the population. The rate of the week is ·2 higher than the average rate of the corresponding week of the past five years, and is below the rate of the corresponding week of any of the past five years except 1887 and 1888, *vide* the figures below :—

	1885.	1886.	1887.	1888.	1889.	Weekly average of five years 1885–89.	1890.
Ratio of deaths per 1,000 of the population per annum	34·7	33·8	26·5	24·8	31·6	31·3	31·5

The deaths registered in each of the last four weeks in each of the twenty-seven principal towns correspond to the following rates per 1,000 of the population :—

Towns.	Weeks ending— 22nd Nov. 1890.	29th Nov. 1890.	6th Dec. 1890.	13th Dec. 1890.	Towns.	Weeks ending— 22nd Nov. 1890.	29th Nov. 1890.	6th Dec. 1890.	13th Dec. 1890.
Burdwan	33·6	41·2	27·5	44·2	Naraingunj	53·0	120·1	120·2	[illegible]
Midnapore	29·4	20·1	29·4	52·7	Chittagong	9·4	18·8	23·5	[illegible]

Rampore Beauleah	47·9	47·9	31·3	47·9	Purneah	6·9	20·8	[illegible]	[illegible]
Darjiling	...	29·2	51·0	7·3	Poori	49·7	46·6	[illegible]	[illegible]
Dacca	45·5	25·9	31·1	39·8	Total ...	23·3	28·7	[illegible]	31·5

will be seen that last week the highest mortality occurred in the town of Narainganj (28·3) and the lowest in Santipore (7·).

Measured by last week's mortality, the highest annual death-rates from the several registered death-causes occurred in the following towns :—

Cholera.	Ratio per *mille.*	*Small-pox.*	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Narainganj	70·4	Midnapore	10·8	Rampore Beauleah	39·4	Serampore	21·6	Narainganj ...	49·1
Uttarpara	28·3			Gya ...	34·8	Howrah ...	10·3	Bali ...	21·0
Sanaghat	17·9			Bali ...	31·6			Serampore ...	19·9
Howrah ...	17·2			Burdwan ...	27·5			Midnapore ...	17·9
Bali ...	14·0			Jessore ...	24·5			Dacca ...	15·0
Dacca ...	9·7			Serampore ...	23·5			Monghyr ...	11·8
Serampore	7·9			Comillah ...	23·1			Hughli and Chinsurah	11·5
Krishnagar	7·5			Poori ...	23·1				
Hughli and Chinsurah	6·6								

The total mortality from the several registered death-causes in the twenty-seven principal towns amounted to 4·7 from cholera, against 3·9 per 1,000 in the preceding week; 6 from small-pox, against ·5; 13·4 from fever, against 13·7; 3·9 from bowel-complaints, against 3·3; 3 from injury, against ·4; and 8·3 from other causes, against 9·7 in the preceding week.

The mortality of last week according to *Sex*, *Class* and *Age* was as follows :—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	33·7	Christians ...	22·4	Under 1 year ...	215·1
Females	29·1	Hindus ...	32·5	1 and under 5 years ...	31·1
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population...	115	Mahomedans ...	29·3	5 ,, 10 ,, ...	18·8
				10 ,, 15 ,, ...	13·5
				15 ,, 20 ,, ...	23·8
				20 ,, 30 ,, ...	20·9
				30 ,, 40 ,, ...	19·9
				40 ,, 50 ,, ...	23·3
				50 ,, 60 ,, ...	32·9
				60 years and upwards ...	93·3

Detailed information regarding the vital statistics of the twenty-seven principal towns dealt with in the above review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 29th December 1890.
